

OnPoint Release 8.0 Enhancements		May 1, 2021 - July 31, 2021					
Release Notes - Web Version		Enhancement = improvement to an existing system feature					
Course Manager (OPCM)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-5328, CORE-5720, CORE-5815, CORE-5941	-	OPCM > Home > LRS Viewer	Yes	Enhancement	New LRS viewer available to review xAPI statements	The OPLRS viewer has been updated with new filter options and an entirely new appearance. This new interface allows for filtering by verb, verb description, user id, agent (email), course id, and/or date range. This is an update to the viewer only; all LRS functions remain unaffected.	8.0
CORE-5510	-	OPCM > Various Objects > Advanced > User Due Dates	Yes	Enhancement	Options to update due dates for existing assignments	If a dynamic or fixed due date is updated for any assignable object in OPCM, an "Update existing assignments" button is now available for administrators to automatically update the user-level due dates to match. This allows administrators to choose whether to propagate due date changes to all assigned users or to have them apply only to users assigned in the future.	8.0
CORE-5366, CORE-5367	-	OPCM > Users & Groups > Users & Managers > Select a User > Memberships > Group Membership > History	Yes	Enhancement	Group membership history now tracked and able to be viewed	A history of a user's group memberships is now recorded and can be viewed from the user's Memberships tab in OPCM. This view displays all of the groups a user has been added to or removed from, including the assigned and removal dates and which manager or administrator added or removed the user. Only group membership changes occurring after the 8.0 release are included in this history.	8.0
CORE-2084, CORE-2085, CORE-2086, CORE-2087	OPCM > Content > Library > Nugget Certificate	OPCM > Content > Nuggets > Select a Nugget	Yes	Enhancement	Certificates functionality now available for use with nuggets	In an expansion of certificate functionality, certificates can now be earned for the completion of nuggets in the same manner as was previously supported for other content object types.	8.0
CORE-6374	-	OPCM > Content > Reports	Yes	Enhancement	New Catalog Items report	A new report has been added that provides for selecting a specific Catalog and seeing the objects associated with that catalog as well as relevant information about those objects including metatags or display tags associated with the objects.	8.0.5
EPICS-149	OPCM > Assessments > Tests / Questions	Various > Assessments	Yes	Enhancement	Answer Confidence feature now available for use with assessments	Support has been added for asking learners to provide their confidence in their answers within assessments. Answer Confidence gives another data point as to the confidence level of user answers on an assessment and can be a valuable tool for interpreting actual knowledge versus guesswork. This information can be used to target areas within learning programs for improvement. The Answer Confidence prompt can be enabled or disabled for each test and for specific questions within the tests, and the range of confidence can be configured for each customer. New standard reports for "Tests with Answer Confidence" and "Answer Confidence by Test" are available for reviewing confidence responses. Test set templates need to be enabled for this feature to be utilized.	8.0
CORE-6140	-	OPCM > Events & Activities > Webinars > Select Event > Classes > Create Zoom Session	Yes	Enhancement	Limit Instructors in Zoom host list	The Instructor list for Zoom sessions now limits the list of instructors to those individuals who have been indicated as a Zoom host by the ZOOM API as well as having been marked as an Instructor in their Profile in OPCM. Previously this list was not limited by the Profile level Instructor value.	8.0.3
CORE-5600, CORE-5652, CORE-5736	OPCM > Messaging > Standard Notifications > Login Failure Notifications	OPPortal > Log In	Yes	Enhancement	New trigger action and associated report for users set inactive due to login failures	A new standard "Login Failure Inactivation" trigger is now available which fires when users falls to an inactive status due to reaching maximum password attempts. The number of allowed login attempts prior to inactivation can be set via the "Allowed Login Attempts" configuration. An associated "Login Failure Inactivated Users" report is also available which includes all users who were set inactive through login failures.	8.0
CORE-5524	-	OPCM > Administration > Import / Export > Import Data > Import URL Nuggets	Yes	Enhancement	New URL Nugget Import and Validation Tool	A new "Import URL Nuggets" option is now available for uploading a template spreadsheet of URL (link) nuggets for creation in the system. Once uploaded the nugget data is checked and any invalid data is highlighted for correction. This process was previously managed via an external tool which did not include the validation step. This tool is useful when importing multiple specific nuggets from a third party content repository.	8.0
CORE-5596, CORE-5892	-	OPCM > Administration > Import / Export > Import Data > Group Assignment	Yes	Enhancement	New tool for mass-assigning users to groups	A new "Group Assignment" option is now available for uploading a template spreadsheet of users to assign to specified groups. This import allows administrators to mass-assign users to groups using user and group ids. This tool is useful in situations where users need to be put into groups where the filters inside Course Manager are not sufficient to isolate the required sub-set of users.	8.0
Analytics Dashboards (OPAnalytics)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-5394, CORE-5472	-	Various > Analytics Dashboards	No	Enhancement	New widget visualization type available	A new "Subplot Line Graph" visualization is available for use with appropriate analytics dashboard widgets.	8.00
CORE-5228, CORE-5346, CORE-5353, CORE-5354, CORE-5355, CORE-5356, CORE-5529, CORE-5530, CORE-5575, CORE-5746	OPPM > Analytics	OPPM > Analytics	Yes	Enhancement	Support for manager favorite dashboards	Support has been added for managers to set one or more dashboards as their favorite dashboards via a heart icon. When the Analytics tab is viewed, the favorite dashboards are displayed first and appear at the top of the list of available dashboards. This allows managers to choose which information is most important to them and have it be immediately available without having to search for the desired dashboard on each access.	8.00
CORE-5537, CORE-5599	-	OPPM > Analytics	No	Enhancement	Support for linking to a pre-filtered dashboard	Support has been added for launching to an analytics dashboard pre-filtered for one or more specific groups. This can be used for linking to the dashboard and present useful information to managers without requiring their input. Custom interfaces will need to be updated to utilize this functionality.	8.00
