OnPoint Release 8.5	October 2022 - March 2023
Release Notes - Web Version	**Enhancement** = improvement to an existing system feature
	New Feature = new capability in the system
	Update = Improved Functionality

Course Manager (OPCM)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8250	OPCM > Various	-	No	Enhancement	Updates to Federated Distribution view	Various updates to the information about content distributed via the Federated Content Server. These updates provide additional management options for Distributed content for Admins. Speak to your Engagement Manager for additional information and details about the Federated Content Server.	8.5
CORE-8136	-	OPCM > Various	Yes	Update	OPCM quick filter text has been darkened	The text in OPCM quick filters has been updated to a darker shade to make it more visible on a wide range of displays.	8.5
CORE-8318	-	OPCM > Various Objects > Advanced	Yes	Update	Shared options added to OPCM Advanced Filters	If the Content Sharing module is enabled for a customer, the object Advanced Filters in OPCM now include a "Sharing" option for filtering for Primary objects, Replica objects, or unshared objects.	8.5
CORE-8146, CORE-8147, CORE-8148	-	OPCM / OPPM / OPDoc > All	Yes	Update	Updated typeface across applications for consistency	The typeface used in the OPCM, OPPM, and OPDoc applications has been updated to use Roboto. Previously these applications all used distinct typefaces.	8.5
CORE-8410	-	OPCM > Home	Yes	Update	OPCM Pending section now only displays messages if action is required	The Pending section of the OPCM Home page now only displays those messages for items requiring attention. For instance, the "Delete requests pending" message is now only displayed if there are deletion requests pending approval.	8.5
CORE-8303	-	OPCM > Home > Pending	Yes	Update	Notification added to OPCM Home page for newly shared content	To assist admins with managing shared content, a new "Shared content requiring publish" line now is now included in the Pending section of the OPCM Home page. Since newly shared "replica" items are unpublished by default, this effectively acts as a notification that there is new shared content requiring administrator attention.	8.5
CORE-8394, CORE-8400, CORE-8401, CORE-8402	OPCM > Home > Pending > Recertification requests pending approval	User Interfaces > Assignments > Recertification Request	No	Enhancement	Support available for users to request a reregister action for a previously attended event	Support has been added to allow users to request the ability to select a new session of an event that they have previously attended. Administrators or Managers must approve the request and will require custom updates to the UI in order to support this functionality. Actions taken to approve the request will save the user's previous attendance and then allow the user to select a new available session of the event.	8.5
CORE-8089	OPCM > Home > Pending > Deletion Requests Pending	OPCM > Home > Tasks	Yes	Update	User deletion now included in OPTask	User deletion (both quick and full deletion) has been added to the OPTask process so that Admins may review the status of deletion tasks from the OPCM Home page Tasks view and to improve performance. OnPoint recommends inactivation of users rather than deletion in most situations.	8.5
CORE-8212	-	OPCM > Home > LRS Viewer	No	Update	Status update added for xAPI courses reporting completion	An additional check has been put in place to ensure a user's status for an xAPI course is set to Completed if the course reports itself as completed to the OPLRS and the user exits in a non-standard way. This is in addition to the standard processes OPCV and OPMGW use to evaluate and update course statuses.	8.5
CORE-8265, CORE-8280, CORE-8315	-	OPCM > Various > Reports	Yes	Update	Additional reports updated to use new date range filter logic	Additional reports have been updated to use the new date range filter functionality to display date-specific statuses. These reports include 1075, 1292, 1344, 1346, 1365, 1393, 1394, 1401, 1410, 1432, and 1470.	8.5
CORE-7886	-	OPCM > Various Objects > Assignments > Found In	Yes	Update	Updated display of Triggers in object Found In	The display of Triggers in the Found In section for all objects in OPCM has been updated to make it more clear which objects contain the triggers set to assign the currently viewed object.	8.5
CORE-8127	-	OPCM > Various Objects > Select Object > Achievements > Certificates	Yes	Enhancement	Support added for bulk printing of certificates	Support has been added for printing multiple user-earned certificates through a single action. From the Achievements tab of an object, admins may filter by user ID, name, group, and certificate date, and from the list admins may select one or more users for whom to print certificates. This action can be used to generate a	8.5
CORE-8178, CORE-8187, CORE-8188, CORE-8189	-	OPCM > Various > Template Versioning	No	Update	Support for version-specific template files	For added flexibility to provide better forwards and backwards compatibility for assessment, gameboard, and progress board templates, each template now supports multiple files, each for a specific range of OPLS versions. Each customer server will automatically receive the template files specific for their version. This is a	8.5
CORE-8082	-	OPCM > Various > Reports	Yes	Update	Updates made to the report date picker	The date picker within reports has received several updates, including easier selection of the current date and preventing the selection of an End Date prior to the Start Date (if already picked).	8.5
CORE-8120	-	OPCM > Various > Replica Objects	Yes	Update	Updated informational text for replica content	The informational text for replica objects has been updated for additional clarity around the shared content restrictions.	8.5
CORE-8137	-	OPCM > Users & Groups > Users & Managers	Yes	Update	Styling update to filter buttons on OPCM user list page	The "Show Roles" filter options on the OPCM user list view have had their styling updated to make each button more distinct and to clarify which options are related to one another. The function of the filters remains unaffected.	8.5
CORE-8202	-	OPCM > Users & Groups > Users & Managers > Select an Administrator > Information > System Role	Yes	Update	Indications of SA+'s and SAs with OPDoc access now displayed in OPCM profiles	The user profile in OPCM now indicates if the currently viewed administrator is a "Site Admin +", with access to multiple slices on the same server, and/or an "OPDoc Admin", with admin access to the Document Manager application. These values were previously not displayed to administrators.	8.5
CORE-8281, CORE-8287, CORE-8289	-	OPCM > Users & Groups > Users & Managers > Select a User > User Extra > eCommerce Transactions	Yes	Update	Order subtotals now included in eCommerce log	The eCommerce log for each user now displays the Subtotal cost for each order listed in the log.	8.5
CORE-8132	-	OPCM > Users & Groups > Users & Managers > Select a User > Edit	Yes	Update	Users may now be set as instructors directly from their user record	To provide easier access to the option, users may now be set as instructors directly from their user record in OPCM. The existing instructor setting remains available on the Profile tab, along with the more advanced instructor options (webinar integrations, etc…).	8.5
CORE-8100	-	OPCM / OPPM > Users & Groups/Users & Managers/User Detail > Select User > User Extra/Options > Assignment Status	Yes	Update	Course scores now presented in Assignment Status view	The user Assignment Status view has been updated to include user scores for SCORM and xAPI courses where such scores are available. This view previously only included scores for OnPoint assessments.	8.5
CORE-8241	-	OPCM > Users & Groups > Users & Managers > Select a User > User Extra > eCommerce Transactions	No	Update	User eCommerce history now displays group memberships	The eCommerce history for a user now displays any group memberships they gained via an eCommerce transaction.	8.5
CORE-8198	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments	Yes	Update	Resetting a user's assignment status now clears First and Last Access dates	When manually resetting a user's course, nugget, or assessment set status to Not Attempted, the recorded First and Last access dates are now cleared to ensure the user data is properly reset.	8.5
CORE-8292	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments	Yes	Update	Setting a user's assignment status now updates First and Last Access dates	When manually setting a user's course, nugget, or assessment set status to Incomplete, Failed, or Completed, the First and Last access dates are now updated to ensure the dates are appropriate for the status changes.	8.5
EPICS-201	OPCM > Users & Groups > Users & Managers > Select a User > Profile	Various > Reports	Yes	Update	Test users now excluded from all reports	All reports have now been updated to exclude users designated as Test Users in their OPCM profiles. If test user data is desired in report results, admins must uncheck the Test User designation for the specific users.	8.5
CORE-8045	OPCM > Users & Groups > Users & Managers > Select a User > Profile	OPCM > Events & Activities > Webinars > Select an Adobe Connect Event > Classes > Add Session	Yes	Update	"Adobe Connect Host" session dropdown now limited to instructors	When selecting the instructor for an Adobe Connect session in OPCM, the dropdown previously included all valid Adobe Connect users in the system, not just those marked as instructors. This has been addressed, and the dropdown list is now limited to show only valid Adobe Connect instructors.	8.5
CORE-8151	-	OPCM > Users & Groups > Users & Managers > Select an Instructor > Profile	Yes	Update	Validating Adobe Connect instructors no longer displays a pending message indefinitely	When the "Validate Account" button is clicked for Adobe Connect instructor accounts, the "Validating account…" message previously continued to be displayed indefinitely even after the validation was completed. This has been addressed, and the Adobe Connect instructor status now updates as expected without requiring a page refresh.	8.5
CORE-7910	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments > Activities	No	Update	Updated activity recertification process	When recertifying an activity for a user, the archived file uploads for the previous completion are now archived as expected. Previously certain data was retained which prevented users from recertifying with a file upload.	8.5
CORE-8230	-	OPCM > Users & Groups > Groups > Select a Group > Group Extra	Yes	Update	Update to group-level welcome email options	The group "Send Welcome Message" option has been updated with additional functionality, such as options to generate welcome emails for SSO or password access, role selection, duration of login token, and restrictions for new users specifically.	8.5
CORE-8194	-	OPCM > Users & Groups > Reports > Report #1339 and #1432	Yes	Update	User Foreign ID now available for reports #1339 and #1432	To allow easier identification of users, the user Foreign ID field is now included as a Display Option field in reports #1339 User/Learner List by Org/Group and report #1432 User Course Status with Credit Hours.	8.5
CORE-8066	OPCM > Users & Groups > Reports > Report #1284	OPPM > Reports > Scheduled Reports	No	Update	Report #1284 can now be run on a schedule for org chart users	Support has been added for running report #1284 "User Assignment Status by Group" on a schedule for users in managed org chart nodes. Previously this report could only be scheduled to run for users in managed groups.	8.5

CORE ID	Path (From)	Path (To)	Client Req	Type	Title	Description	Version
CORE-8145, CORE-8211	-	OPCM > Users & Groups > Reports > Report #1292	Yes	**Update**	Updated date range filter functionality for report #1292	Report #1292 "User Course Status" has been updated so that the data filter shows each users' status within the selected date range, rather than the current status for users who completed the course within the date range. This logic is being extended to other reports in this and the subsequent release.	8.5
CORE-8297	-	OPCM > Uses & Groups > Reports > Report #1450	No	**Update**	Optimizations added to report #1450	Optimizations have been added to report #1450 "Assignment Status By Type By Group" to return results more quickly when run for large numbers of users.	8.5
CORE-8378	-	OPCM > Users & Groups > Reports > Report #1506	Yes	**Enhancement**	New report for eCommerce transactions	A new report #1506 "eCommerce Transaction Detail" is now available for reporting a list of Magento eCommerce transactions for managed users, with filters for group/org chart, user status/role, and date range.	8.5
CORE-8390	-	OPCM > Users & Groups > Reports > Report #1284	No	**Update**	Optimizations added to report #1284	Optimizations have been added to report #1284 "User Assignment Status by Group" to return results more quickly for large numbers of users.	8.5
CORE-8441	-	OPCM > Users & Groups > Reports > Report #1284	Yes	**Update**	Add User Role as optional column in report #1284	Updates have been made to User Assignment Status by Group report #1284 to allow for the User's System Role to be included in the generated output of the report as well as exported csv results.	8.5.1
CORE-8406	-	OPCM > Users & Groups > Reports > Report #1432	Yes	**Update**	User email added as option is report #1432	Report #1432 "User Course Status with Credit Hours" now includes user "Email" as an available display option field.	8.5
CORE-8436	OPCM > Users & Groups > Reports > Report #1339	-	Yes	**Update**	Additional User Expiration fields added to report #1339	The Roster (with Organization) Report #1339 has been updated to allow for selectively showing the user's expiration date in the report results.	8.5.2
CORE-8582	-	OPCM > Users & Groups > Reports > Report #1509	Yes	**Update**	Group custom fields added as display options in report #1509	Report #1509 "Groups with no active users by classification" now includes the defined group custom fields as display options for inclusion in the report results.	8.5.5
CORE-8806	-	OPCM > Users & Groups > Reports > Report #1280	Yes	**Update**	Further updates to report #1280	Report #1280 "User Access During a Specific Time Period" has received several updates, including re-adding the "# of OPPortal Logins" columns (with an associated language phrase) and updating the source of data for the "Primary Group" and "First Access Date" columns.	8.5.8
CORE-8725	-	OPCM > Users & Groups > Reports > Report #1280	Yes	**Update**	User Foreign ID now available to be included in report #1280	The user "Foreign ID" has been added as an optional display field to be included in report #1280 "User Access During a Specific Time Period".	8.5.7
CORE-8738	OPCM > Administration > Certifications	OPCM > Users & Groups > Reports > Report #1103	Yes	**Update**	Certification number added to report #1103	Report #1103 "Earned External Certifications" now includes the external "Certification Number" as a standard field in the report results, displaying the value set for the certificate in OPCM.	8.5.7
CORE-8243	-	OPCM > Content > Courses > Type	Yes	**Update**	Superscript label added to course list to indicate Federated Content	On the Courses list view in OPCM, courses which have been converted to Federated Content are now indicated as such with an "FC" superscript label on the course name. An associated legend has also been provided to explain the label.	8.5
CORE-8442	OPCM > Content > Courses/Nuggets > Select Course/Nugget > Sharing	-	No	**Update**	Ensure Sharing properly connects copies	Updates have been made to ensure that Courses and Nuggets shared to other slices are properly copied to the new slice. A rare condition could cause the copy to not be correctly created on the shared slice.	8.5.1
CORE-8017, CORE-8018	-	OPCM > Content/Assessments > Nuggets/Assessment Set > Select a Nugget or Assessment Set > Sharing	Yes	**Enhancement**	Content Sharing functionality extended to Nuggets and Assessment Sets	Content Sharing functionality has been extended to include Nuggets and Assessment Sets. If the Content Sharing module is enabled, admins will be able to share those object types to other slices on the same server. Please see the Content Sharing feature guide for more information.	8.5
CORE-8231	OPCM > Content > Courses/Nuggets > Advanced	OPCM > Content > Courses/Nuggets > Sharing	Yes	**Update**	Require Acknowledgement message now included in shared content updates	When pushing an update to shared courses or nuggets on other slices, any changes to the Require Acknowledgement message are now reflected on the shared slice(s).	8.5
CORE-8154	-	OPCM > Content > Nuggets > Select a Nugget > Publish	Yes	**Update**	Optional version incrementation added to nugget publish process	Similar to courses, republishing a nugget now provides an option to increment the version number of the nugget and optionally include a note on any changes. This assists with tracking changes over time.	8.5
CORE-8317	-	OPCM > Content > Nuggets > Select Nugget > Advanced	Yes	**Update**	Multiple updates to Nugget Advanced	The Nugget Advanced Filter in OPCM has been updated to correct a reference to Courses and to include a "Shared" filter if the slice is part of a "slice cluster" for content sharing.	8.5
CORE-8085, CORE-8099, CORE-8222, CORE-8376, CORE-8385	OPCM > Content > Wizards > Content Wizard	Various > Courses	Yes	**Enhancement**	Federated Content module now supports cmi5 and AICC packages	The Federated Content module now supports creating courses from cmi5 or AICC content in a SCORM wrapper. If a customer has the Federated Content module, a new "AICC/cmi5 to SCORM (zip package)" option is now available in the Content Wizard, allowing the upload of a cmi5 or AICC package to be converted to a Federated Content SCORM package. Please see the Federated Content feature guide for more information.	8.5
CORE-8293	-	OPCM > Content > Library > Certificates	Yes	**Update**	Certificate deletion option removed from OPCM	As OnPoint now supports the inactivation of certificates, the "Delete" option for certificates has been removed to help ensure data integrity. Inactive certificates are retained in the certificates list but are not available when assigning a certificate to an object.	8.5
CORE-8117, CORE-8118, CORE-8119	OPCM > Content > Library > Various Certificates	OPCM > Various > Achievements > Certificate	Yes	**Update**	Status added to certificates	Certificates can now have a status of Active or Inactive to allow admins better control over certificate management. All existing certificates will retain their Active status until made Inactive by an admin, and only Active certificates will now appear in the list for assignment to objects.	8.5
CORE-8326	-	OPCM > Content > Reports > Report #1055	Yes	**Update**	Optimizations added to report #1055	Report #1055 "Object Access by Time Period" has been updated to return results more quickly, especially for large numbers of users.	8.5
CORE-8710, CORE-8755	-	OPCM > Content > Reports > Report #1055	Yes	**Update**	Optimization of report #1055	Report #1055 "Course Access by Time Period" has been optimized to return results more quickly, especially in AWS environments.	8.5.7
CORE-8718	-	OPCM > Content > Reports > Report #1055	Yes	**Update**	Additional course custom fields added to report #1055	Previously report #1055 "Course Access by Time Period" only included course custom 1 as an optional display field. This report has been updated to allow the inclusion of the other 9 custom fields as well.	8.5.7
CORE-8784	-	OPCM > Content > Reports > Report #1055	Yes	**Update**	Further optimization of report #1055	Report #1055 "Course Access by Time Period" has been further optimized to return results more quickly, especially in AWS environments.	8.5.8
CORE-8165, CORE-8209	-	OPCM > Assessments > Assessment Sets > Presentation Templates	Yes	**Update**	Interactive Assessment templates split from Assessment templates	As each have distinct functionality, templates for Interactive Assessments have been separated as a distinct type from standard Assessment templates. The list of available Assessment templates now only includes those relevant for the current viewed type of Assessment.	8.5
CORE-8493	OPCM > Assessments > Review Feedback	-	No	**Update**	Optimize Feedback Detail view	The Feedback Detail page in Course Manager has been updated to better optimize the process for larger data sets.	8.5.2
CORE-8494	OPCM > Assessments > Reports > Report #1126	-	No	**Update**	Optimizations of Feedback Statistics Report	Optimizations have been made to the Feedback Statistics Report #1126 to improve load times with large data sets.	8.5.2
CORE-8221	-	OPCM > Events & Activities > Master Calendar	Yes	**Update**	Coaching Slots now included in OPCM Master Calendar print	The OPCM Master Calendar print function now includes Coaching Slots. Previously only sessions were included in the print results.	8.5
CORE-8381	-	OPCM > Events & Activities > Select a Webinar	Yes	**Update**	Coordinator assignments removed for webinar events and sessions	Webinar events may no longer have event or session coordinators assigned. These roles were added for ILT events and are not relevant for the vast majority of webinar sessions. Additional session instructors may still be added to webinar sessions if an additional person is needed to help run a session.	8.5
CORE-8430	OPCM > Events & Activities > Webinars > Select a Webinar > Select Session	-	Yes	**Update**	Extend the Webinar Other field to allow additional characters	The Webinar Session Other / URL field has been updated to allow up to 256 characters when adding a webinar url in the creation process. Previously this was limited to 100 characters and would not retain any characters past 100.	8.5.1
CORE-8383	-	OPCM > Events & Activities > Instructor-Led/Webinar > Select a Coaching Events > Classes	Yes	**Update**	Updated Instructor to 'Coach' within Coaching sessions	Several of the tabs for Coaching sessions in OPCM have been updated to display "Coach" in place of "Instructor" for sessions created from Coaching slots. This change means there is now consistent phrasing across all admin views.	8.5
CORE-8044	-	OPCM > Events & Activities > Webinars > Select an Adobe Connect Event > Classes > Add Session > Adobe Connect Host	Yes	**Update**	Instructor selection now required when creating Adobe Connect sessions	As the Adobe Connect software requires a "host" to create a session, the "Adobe Connect Host" field in OnPoint is now a required field when creating or editing an Adobe Connect session in OPCM.	8.5
CORE-7995	OPCM > Events & Activities > Webinars > Select a Microsoft Teams Webinar Event	OPCM > Events & Activities > Webinars > Select a Microsoft Teams Webinar Event > Classes	Yes	**Enhancement**	Event Coaching support extended to Microsoft Teams integration	The Event Coaching module functionality has been extended to include Microsoft Teams webinar events. If both the Event Coaching module and Microsoft Teams integrations are enabled for a customer, administrators are now able to create Coaching Slots for Teams events and manage them similarly to other events.	8.5
CORE-7993, CORE-7994	OPCM > Events & Activities > Webinars > Select a Teams Webinar	Various > Events	Yes	**Enhancement**	Teams webinars may now utilize coaching slots	Coaching functionality has been extended to Teams webinar events, enabling the creation and usage of Teams Coaching slots. Please see the Teams feature guide for more information. Coaching functionality was already supported via the WebEx, Adobe Connect, and Zoom modules.	8.5
CORE-8052	OPCM > Events & Activities > Webinars > Select a Teams Webinar > Classes > Select a Session > Instructors	OPCM > Home > Tasks	Yes	**Update**	Simplification of secondary instructor assignment for Teams sessions	The "Update MS Teams Attendees" button is no longer required to be clicked after adding or removing a secondary instructor from a Teams webinar session in the OPLS. This process is instead handled via an automatic background process, reviewable via the Tasks view on the OPCM Home page.	8.5

ID	Path 1	Path 2	Y/N	Type	Summary	Description	Version
CORE-8260	-	OPCM > Events & Activities > Webinars > Select a Zoom Event > Triggers	Yes	Update	"Zoom Passcode" added as substitution field for Zoom event triggers	Within Zoom webinars, "Zoom Passcode" is now an available substitution value for triggered notifications. This allows admins to embed the passcode for an upcoming Zoom session within an associated triggered notification if needed.	8.5
CORE-8173	-	OPCM > Events & Activities > Webinars > Select a Zoom Event > Classes > Sessions > Select a Session > Enrollment > Check Zoom Participants	No	Enhancement	OPZoom integration now attempts to match guest data to OPLS users	OnPoint's Zoom integration has been updated to attempt to match data for session guests to users in the OPLS. The system first checks for a matching Zoom ID value, and if that is not found it will check for a matching email address and finally name. Customer admins may still need to confirm these matches from the session in OPCM.	8.5
CORE-8174	-	OPCM > Events & Activities > Webinars > Select a Zoom Event > Classes > Select a Session > Enrollment	No	Update	Zoom session attendees who lack a Zoom ID now included in participants list in OPCM	The "Zoom Scheduled Meeting Participants" window for Zoom webinar sessions now lists all attendees of the session, even those without a Zoom ID in the data provided from Zoom. Previously only those with a Zoom ID were displayed.	8.5
CORE-8278	-	OPCM > Events & Activities > Webinars > Select a Zoom Event > Classes > Select a Session	Yes	Update	Replaced Zoom session passcode text	To better reflect the Zoom session functionality, if a Zoom session does not have a passcode the Session view in OPCM now displays "No Passcode" rather than "Waiting Room".	8.5
CORE-8078	-	OPCM > Events & Activities > Reports > Report #1211	Yes	Update	Additional display options added to report #1121	Report #1121 "Event Registration/Attendance by Date Range" has been updated to include "User Timezone" and "User Email" as additional output display options.	8.5
CORE-8131	-	OPCM > Events & Activities > Reports > Report #1313	Yes	Update	Email address field added to report #1313 output	Report #1313 "Users Missing Session Assignments by Event" has been updated to include a column displaying the email address for each user in the report output.	8.5
CORE-8435	OPCM > Events & Activities > Reports > Report #1376	-	Yes	Update	Additional fields added to Report #1376 results	The Event Session No-Show for One or all Events Report #1376 has been updated to allow for showing the following additional columns in the report results; Event Id, Event Name, Class ID, Class Name, Session ID, Session Date.	8.5.2
CORE-8766	-	OPCM > Events & Activities > Reports > Report #1512	Yes	Enhancement	New report #1512 for event session group reporting	A new report #1512 "Event Session Group Test Answer Analysis for All Questions" has been created. This report has the same functionality of report 1415 "Test Answer Analysis for All Questions - Multi Select", except it is targeted at event session groups and so only includes groups of that type for selection.	8.5.7
CORE-8767	-	OPCM > Events & Activities > Reports > Report #1511	Yes	Enhancement	New report #1511 for event session group reporting	A new report #1511 "Event Session Group Test Answer Response Comparison" has been created. This report has the same functionality of report 1501 "Test Answer Response Comparison", except it is targeted at event session groups and so only includes groups of that type for selection.	8.5.7
CORE-8177	-	OPCM > Skills & Games > Skill Profiles or Curriculums> Select an object > Sharing	Yes	Enhancement	Content Sharing functionality extended to Skill Profiles and Curriculums	Content Sharing functionality has been extended to include Skill Profiles and Curriculums. If the Content Sharing module is enabled, admins will be able to share those object types to other slices on the same server. Doing so automatically shares all objects with the Skill Profile or Curriculum as well. As of the 8.5 release, only Skill Profiles and Curriculums containing Courses, Nuggets, and Assessment Sets may be shared; sharing is blocked for any containing Events or Activities. Sharing Events and Activities will be enabled as part of the 8.6 release, including as part of a Skill Profile or Curriculum. Please see the Content Sharing feature guide for more information.	8.5
CORE-8185, CORE-8186	-	OPCM > Skills & Games > Skill Profiles > Recertify > Version	Yes	Enhancement	Version numbering added to Skill Profiles and Curriculums	Object version numbers and notes have been added to Skill Profiles and Curriculums in OPCM. This allows an admin to track changes to Skill Profiles and Curriculums over time, and the version numbers helps facilitates the sharing of Skill Profiles and Curriculums between slices.	8.5
CORE-8133, CORE-8135	-	OPCM > Skills & Games > Skill Profiles/Curriculums/Game Profiles > Progress Boards/ Game Boards > Select Board > Information > Status	Yes	Update	Status field and filters added to gameboards and progress boards in OPCM	Custom gameboards and progress boards now include a status field, allowing boards to be set to Active, Inactive, or Request Delete according to intended use. The lists of available boards in OPCM now include only Active boards by default, but a status filter allows for the view of Inactive or Request Delete boards as needed.	8.5
CORE-8224	-	OPCM > Skills & Games > Reports	Yes	Update	User Foreign ID now available for reports #1360 and #1367	To provide a secondary source of identification of users, the user Foreign ID field is now included as a Display Option in reports #1360 Skill Profile Status Summary and #1367 Skill Profile Progress Status by Group.	8.5
CORE-8448	OPCM > Skills & Games > Reports > Report # 1367	-	Yes	Enhancement	New Custom Skill Profile / Curriculum report	A new custom report has been created called Curriculum / Skill Profile Status Report by Group Report #1367 that shows the status of skill profiles or curriculums in the selected time frame and membership with the ability to limit the skill profile / curriculum list in the filter by defined validated responses for skill profile custom 5.	8.5.1
CORE-8139	OPCM > Messaging > Standard Notifications	OPCM > Various Objects > Triggers	Yes	Update	Standard notifications are now read-only at the object level	To ensure Standard Notifications are edited only from the Standard Notifications menu by admins with the appropriate rights, Standard Notifications are now read-only within the Triggers tab of individual objects in OPCM.	8.5
CORE-8158, CORE-8159	-	OPCM > Messaging > Monitor Queues	No	Update	Updated email processing to skip emails for invalid accounts	The email send process now sets emails destined for invalid accounts as "skipped". Previously these emails remained as "queued", which caused the Home page of OPCM to display a warning message in some situations.	8.5
EPICS-222	OPCM > Administration > Configuration > Customer > Adobe Connect Settings	OPCM > Events & Activities > Webinars/Event Session Wizard > Select Event > Create an Adobe Connect session	No	Enhancement	Support for utilizing Adobe Connect meeting templates for new sessions	The Adobe Connect webinar integration has been updated to support meeting templates, pulling in established templates from the configured Adobe Connect account and allowing them to be used as a base for new sessions in the OPLS. Please see the Adobe Connect documentation for additional information on how to create and manage templates.	8.5
CORE-8121, CORE-8122	OPCM > Administration > Configuration > Customer > Zoom Settings	-	Yes	Enhancement	Zoom integration updated to support additional user creation configuration	The OnPoint Zoom integration has been updated to support an additional "Create Zoom Accounts" configuration. This configuration controls whether free accounts are created within the Zoom system for users who join a Zoom webinar session and who lack a Zoom account within the configured Zoom tenant. Please see the Zoom feature guide for additional information.	8.5
CORE-8160	OPCM > Administration > Configuration > Customer > User Fields Configuration	OPPM > User Details > User Wizard	Yes	Update	OPPM User Wizard now follows User Fields Configuration settings	The User Wizard in OPPM has been updated to follow the Show/Edit/Mandatory settings for user fields set in OPCM.	8.5
CORE-8087	-	OPCM > Administration > Configuration > Customer > General	Yes	Update	Added maximum value to Password Reset Interval config	A maximum value of 120 [minutes] has been added to the "Password Reset Interval" customer configuration. This is to ensure password reset emails do not remain valid for an extended period of time.	8.5
CORE-8116	OPCM > Administration > Configuration > Customer > General	Various	Yes	Update	Update to the date format customer configuration	The "Imported Date Format" customer configuration has been renamed to "Date Format", with additional format options added for selection. This format is used in all applications which support the date format configuration. Additional applications and reports are being updated over the upcoming releases to support this.	8.5
CORE-8171	OPCM > Administration > Configuration > Customer > Course Manager	OPCM > Content > Courses > Select a Course > Publish	Yes	Update	Customer configuration added for 508 Compliance publish option	As not all customers have a 508 compliant UI, a new "Show 508 Publish Option" global customer configuration setting has been added to control whether the "508 compliant browser version" option is included on the course publish page in OPCM.	8.5
CORE-8167, CORE-8168	OPCM > Administration > Configuration > Customer > Performance Manager	OPPM > User Details	Yes	Update	Customer configuration added for OPPM User Wizard	For customers who do not utilize the User Wizard in OPPM, a new "Show User Wizard" customer configuration is now available in OPCM to control whether the User Wizard option is presented to managers.	8.5
CORE-8407	OPCM > Administration > Configuration > Customer > CellCast	Shared CellCast App	Yes	Enhancement	New customer configuration for shared device SSO login	A new customer configuration has been added for whether shared devices should utilize SSO or passwords to authenticate individual users. This allows for controlling whether shared device users can authenticate differently than individual device users.	8.5
CORE-8426	OPCM > Administration > Configuration > Customer > Email/SMS	-	Yes	Update	Ensure SMS settings stay enabled after restart	Updates have been made to ensure that the SMS settings are available to be managed for a given customer and also are not reset on restart of the applications.	8.5.2
CORE-8113	OPCM > Administration > Configuration > Dashboards	Various > Analytics Dashboards	Yes	Update	Question Analysis widget can now be configured for a specific test or question	The "Question Analysis" analytics dashboard widget builder now allows for selecting either a test or a specific question for which to display data. Previously this same functionality was achieved through a parameter filter.	8.5
CORE-7504	OPCM > Administration > Configuration > Dashboards	Various > Analytics	Yes	Update	Update to "Assessment - Confidence" widget disaggregations	The "Assessment - Confidence" widget now has a new disaggregation option to display correct/incorrect answers by question with user confidence per question, rather than for the overall assessment.	8.5
CORE-8075	OPCM > Administration > Configuration > Dashboards	Various > Analytics Dashboards	Yes	Update	Updated disaggregation display for Question Analysis widget	If the "Question Analysis" analytics dashboard widget is configured to disaggregate by question and then by user, it previously only displayed the first 5 responses. This has been addressed, and the widget now displays as many responses as possible given the size of the widget, with "Next" and "Previous" buttons to cycle to the rest.	8.5
CORE-8253	-	OPCM > Administration > Configuration > Dashboards	Yes	Update	Updated sizing of widget translations fields	The Translations window for analytics dashboard widgets has been updated to ensure the input fields maintain a consistent width.	8.5
CORE-8123	OPCM > Administration > Configuration > Dashboards	Various > Analytics	Yes	Update	Parameter filter replaced with a question selection in Performance - Question Analysis widget builder	In the dashboard builder, the Parameter filter for the "Performance - Question Analysis" widget has been replaced with a question/test selection filter. This change helps future-proof the builder for upcoming SQL changes.	8.5

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7507	OPCM > Administration > Configuration > Dashboards	Various > Analytics Dashboards	Yes	Update	New secondary disaggregation added to "Assessment - Confidence" widget	The "Assessment Confidence" analytics dashboard widget has been updated to support a secondary disaggregation of "Competency". This allows the widget to display a count of answers which fall within the four available competency combinations.	8.5
CORE-7188	OPCM > Administration > Configuration > Proxy Management	OPCM > Users & Groups > Organization Chart	Yes	Update	Org unit management may no longer be modified during active proxy periods	Similar to how group managers may not be removed during an active proxy period, org units may no longer have their manager removed if the org unit is managed as part of an active proxy period.	8.5
CORE-8005	OPCM > Administration > Configuration > Proxy Management	OPCM > Users & Groups > Users & Managers > Select a User > Memberships	Yes	Update	Dashboard groups now included in proxy management	When establishing a proxy management, the proxying manager is now also added to all dashboard groups of the proxied manager for the duration of the proxy. This provides the proxying manager access to the analytics dashboards relevant for their proxy management.	8.5
CORE-8067, CORE-8073	OPCM > Administration > Import / Export > Import Data > Import Users	OPCM > Messaging > Monitor Queues	Yes	Enhancement	Additional welcome message options added to user import function	The spreadsheet user import process has been updated with additional welcome message options for the imported users, such as including a registration code, a reset password link, or an account activation link as needed. The login type selected by the admin determines the function of the login links and other options.	8.5
CORE-8277	-	OPCM > Administration > File Management > File Download > Exports	Yes	Update	Export sub-directory items no longer indicate impending deletion	As items in sub-directories are not included in the automatic cleanup of the Export directory, these items are no longer displayed in red (indicating impending cleanup) no matter their duration in the directory.	8.5
CORE-8263	-	OPCM > Administration > File Management > Manage SCORM Files	Yes	Update	Restricted admin ability to delete SCORM packages associated with replica courses	Previously admins were able to delete SCORM packages associated with courses shared to their slices. This has been corrected, asset files associated with replica objects can no longer be deleted by an admin on the receiving slice.	8.5
CORE-8197	-	OPCM > Administration > System Administration > Languages	Yes	Update	Re-added language phrase options for administrators	The "Add New Phrase" and "Increment Version" buttons on the language file pages in OPCM have been re-added after being errantly removed in the previous release.	8.5
CORE-8258	-	OPCM > Administration > System Administration > Administration Matrix	Yes	Update	Corrected role name within Admin Matrix	The Admin Matrix previously displayed "Content Coord" within the Role Menu Visibility views. This has been corrected to "Course Coord" to properly reflect the role title.	8.5
CORE-8251, CORE-8252	OPCM > Administration > System Administration > Administration Matrix	OPCM > Events & Activities > Instructor-Led or Webinars > Select an Event > Classes	Yes	Update	New admin matrix flag for event session creation and edit	Support has been added for a new "Add/Edit Event Sessions" flag in the administration matrix. This flag controls whether admins roles or specific admins may create new event sessions or coaching slots, and edit existing sessions or slots.	8.5

OPCommon (OPCommon)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8013	-	Database	No	Update	Last update date now recorded for all pages	The date an object "page" was last updated by an admin is now recorded in the database for troubleshooting purposes.	8.5
CORE-8060	-	Background Processes	No	Update	Optimizations added to background processes	Indices have been added to a number of often-accessed tables to better optimize lookups.	8.5
CORE-8106	-	Login Page	Yes	Update	Expired token messaging added to login pages	If a user has received a Forgot Password or Account Activation email but they try to access after the allowed time period, they are now informed that their access token has expired and that they should request another email.	8.5
CORE-8143	-	Various > Generate Password Reset or Activation emails	Yes	Update	User password reset and activation links now expire after first use	In addition to the defined expiration period for the "Reset Password" and "Account Activation" login links, these also now automatically expire after a single use for security purposes.	8.5
CORE-8309, CORE-8311, CORE-8312, CORE-8313, CORE-8314	-	Adobe Connect Integration	No	Update	Additional methods added to Adobe Connect integration	The Adobe Connect webinar integration has been updated to include several new methods for updating sessions to allow for updating only the session attendees, session instructor, or additional session instructors.	8.5
CORE-8216	-	Various > Skill Profile / Curriculum Completion Time	Yes	Update	Assigning an object to a skill profile now recalculates completion time	If a user is assigned to a skill profile or curriculum that includes an object previously completed by the user, the object's completion time was not included in the total completion time of the skill profile or curriculum. This has been addressed, and the assignment process now checks the time of any previously completed objects and incorporates it into the skill profile or curriculum completion time.	8.5
CORE-8399	-	Various > Reports	No	Update	Cleanup of report database connections	The reporting process has been optimized to ensure all database connections are closed at the completion of each report to ensure better report resource management.	8.5

Content Viewer (OPCV)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8001	-	OPCV > Activities	Yes	Update	Activity "Submit" button now greyed out while file upload is in progress	When a user submits a file as part of an activity via OPCV, the "Submit" button is now greyed out after being pressed while the file upload is taking place. This ensures the file upload is completed prior to the submission being finalized.	8.5

Performance Manager (OPPM)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8094	-	OPPM > Evaluations	Yes	Update	Evaluations filter options updated for consistency	The filter options for the Appraisals, Interactive Assessments, and Performance Evaluations list views in OPPM have been updated to use consistent filter options across all three pages.	8.5
CORE-8261	-	OPPM > Reports > Scheduled Reports	Yes	Update	Headers of scheduled reports now only display groups managed by current manager	When a manager views a scheduled report, the report header now lists only those group(s) included in the current view, rather than all groups for which the scheduled report data is available. This is a report header change only; the report data itself remains unchanged.	8.5
CORE-8395	-	OPPM > User Details > New User	No	Update	Corrected preferred language setting for new users	Previously newly created users in OPPM had their preferred language set with upper case letters (e.g. "EN"), which could cause issues in some situations. This has been corrected, and preferred language is now set with lower case letters as expected.	8.5

Document Manager (OPDoc)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8245	OPDoc > Administration > Tree Structures	OPDoc > Various	Yes	Enhancement	Admins may now define translations for OPDoc nodes	Admins may now provide translations for OPDoc node titles, with users being shown the translation that matches their Preferred Language, or English if an appropriate translation is not defined.	8.5
CORE-8246, CORE-8247	-	OPDoc > Various	Yes	Enhancement	Language support added for OPDoc items	OPDoc items may now be set with a language, and a language filter has been added to the document lists to allow users to filter for only those documents in their language. The lists are auto-filtered by the user's Preferred Language, but this may be changed by the user.	8.5
CORE-8264	-	OPDoc > All Document Lists	Yes	Update	Updated OPDoc file type filter	The file type filter within OPDoc file lists has been updated to utilize a more modern filter field for better interactivity and type sensitivity.	8.5

User Experience (OPUX)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8093	-	OPUX/Mobile CellCast UIs > Various > Competency Matrix	No	Enhancement	UI support for launching to a user's Competency Matrix view	Support has been added for launching to a user's Competency Matrix view from their custom UI. Custom interfaces will need to be updated to support this functionality.	8.5
CORE-8103	-	OPUX > Customer UIs > Forums	No	Update	Updated storage method of special characters within forum posts	To ensure consistent display of forum post text, special characters in forum posts are now saved to the database as their HTML encodings. User views of forum posts remain unaffected.	8.5
CORE-8172	-	OPUX > Custom Interfaces > Various	No	Update	Linked session titles now included in UI data	To allow greater flexibility in the display of linked sessions, the titles of linked sessions are now included in the data provided to user interfaces. Custom interfaces will need to be updated to utilize this data.	8.5
CORE-8190	-	OPUX > Custom Interfaces > Various	No	Update	Badge information now included in UI data	Information on earned and available badges and their images is now included in the data provided to user interfaces. Custom interfaces will need to be updated to display badges and badge info to users.	8.5
CORE-8156	-	OPUX > Custom Interfaces > Various	No	Enhancement	Survey support can now be added to user interfaces	Support has been added for taking surveys for completed content directly from the user interface, without accessing through the OPCV application. This allows for easier indication of which objects have associated surveys, and a more seamless process for accessing and completing them to encourage more users to provide feedback. Custom interfaces will require an update to utilize this functionality.	8.5
CORE-8418	-	OPUX > User Interface	No	Update	Updates to available Event Data based on location	Updates were made to the information sent to the User Interface specific to Available events and specifically for showing event sessions available to the user even if that user has no Preferred event location.	8.5.1
CORE-8438	-	OPUX > User Interface	No	Update	Updates to Coaching slot selection for connected Webinars	Updates have been made to ensure that Coaching slot selection by a user works properly for coaching slots created for connected Webinar types such as ZOOM, WebEx, MS Teams, and Adobe Connect.	8.5.1
CORE-7663	-	OPUX > Various > Progress Boards	No	Update	Additional data provided to progress boards for unassigned items	Progress boards now receive the same data for items not yet assigned to users as those already assigned. This allows progress boards to display info such as ratings.	8.5

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8300, CORE-8301	-	OPUX > Custom Interfaces > Events	No	Enhancement	Support for users to recertify completed events	In situations where users had a No Show and need the option to select a replacement future session, a function can now be included in user interfaces to allow that. Please be aware that doing this effectively removes the user's current attendance status for the event. Please speak to your OnPoint Engagement Manager about a UI update to accommodate for this functionality.	8.5
CORE-8808, CORE-8840	-	OPUX > User Interfaces > My Profile	Yes	Update	Additional security checks added to My Profile field contents	For increased security, if a user includes HTML tags or strings in their My Profile fields, these are now automatically stripped out upon saving their changes.	8.5.9

Analytics Dashboards (OPAnalytics)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8112	-	Various > Analytics Dashboards	Yes	Update	Added event specific display to event widgets	The "Event Upcoming" and "Event Complete" analytics dashboard widgets now support the selection of specific events, limiting the widgets to display only data from these events.	8.5
CORE-8223	-	Various > Analytics	Yes	Update	Assessment Question Analysis widget now displays responses to 1 decimal point	To improve the detail of the displayed data, the "Assessment Question Analysis" analytics widget has been updated to display the question scores with one decimal point, rather than rounding to the nearest integer.	8.5
CORE-8176	-	Various > Analytics	Yes	Update	Text updated on "Objects Past Due" widget	To better reflect the most common use case, the "Pending" text has been updated to "Due Soon" on the "Objects Past Due" analytics dashboard widget.	8.5

API Integrations (OPAPI)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8393	-	OPAPI > User Deletion	No	Update	User deletions via OPAPI now set user as Request Delete	To help preserve data integrity, deleting a user via OPAPI now sets the user as "Request Delete", the same as if a user is marked for deletion from their profile in OPCM.	8.5
CORE-8446	-	OPAPI > Welcome Email	No	Enhancement	Provide a new API method to generate the Welcome Email	OPAPI has been updated to provide for a new API method that can be used to generate the Welcome Email for newly created users or those that need to reset their email. The process will generate the established Welcome email with a unique, one-time use link to authenticate the user in and force them to change their password if not using SSO.	8.5.1

Mobile Gateway (OPMGW)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8071, CORE-8077	-	Mobile CellCast Apps > Earned/Available Badges	No	Update	Updated format of badge information sent to mobile CellCast apps	The format of badge information sent to mobile CellCast apps has been updated to ensure badges appear to users as expected.	8.5
CORE-8225	-	Mobile CellCast Apps	No	Update	Added missing progress board data to relevant mobile sync calls	Previously whether or not a skill profile or curriculum had an associated progress board was not included in certain mobile sync calls. This has been addressed.	8.5
CORE-8751	-	Mobile CellCast Apps > Register	No	Update	Users can now include special characters in passwords set via CellCast	Users may now include special characters in passwords they create on first registration of a CellCast mobile app (if configured to require a password). Previously these characters were stripped out by a security check.	8.5.7

OPZOOM (Zoom Support)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8140, CORE-8153	-	OPZoom	No	Update	Updated OPZOOM to use defined meeting setting values	Updated the process of creating Zoom meetings to read from the configured values set with customer input.	8.5
CORE-8175	-	OPZoom Integration > Various	Yes	Update	Zoom session duration now excludes waiting room time	Attendees of Zoom webinar sessions now have their duration recorded using only their "in meeting" time. Previously the system was including time in the waiting room if the session had a waiting room enabled.	8.5

OnPoint Release 8.5 Bug Fixes

Release Notes - Web Version   **Bug** = feature not working as expected

Course Manager (OPCM)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8081	-	OPCM > Various > Reports	Yes	Bug	Corrected user role filter for repeated report runs	Previously when a report was run for a specific User Role, selecting Back and then re-running the report a second time with the same filters would return results for all users, not limited to the selected roles. This has been corrected.	8.5
CORE-8655	-	OPCM > Various > Reports	Yes	Bug	Corrected user status display in filtered reports	Previously if the reports using the updated date filters from CORE-8625 was filtered for specific dates, users who completed an assignment prior to the "From" date would appear as Incomplete in the report. This has been addressed, and user statuses are now appropriately reflected based on the selected dates.	8.5.6
CORE-8079	-	OPCM > Various > Analytics Dashboards	No	Bug	Updated Question Analysis widget display for users with the same name	Previously the "Question Analysis" analytics dashboard widget combined the display information for users with the same name in some situations. This has been corrected, and distinct users with the same name are now displayed as expected.	8.5
CORE-8091	-	OPCM > Various > Reports	Yes	Bug	Corrected special character issue in report group filter	Previously when searching in the group filter of a report, entering a special character would not return any results. This has been addressed, and searching when special characters are included in filters now returns results as expected.	8.5
CORE-8713	-	OPCM > Various > Reports	No	Bug	Listed reports no longer including objects from other slices	Previously several reports could include the incorrect object information if the object id matched the id of another type of object for recertified completions. This has been corrected for the following reports: - #1046 "Certification Completion" - #1075 "Course Progress for Multiple Groups" - #1182 "Nugget Progress for Multiple Groups" - #1292 "User Course Status" - #1344 "User Course Status by Group" - #1365 "Course Progress for Specific Group" - #1432 "User Course Status with Credit Hours"	8.5.7
CORE-8531	-	OPCM > Various > Archive Assignment	Yes	Bug	Corrected user assignment archiving	An issue has been corrected which prevented the archiving of user assignments by an admin from OPCM.	8.5.4
CORE-7903	-	OPCM > Various > User Skill Profile Status	Yes	Bug	Failing a course now progresses skill profile status	Previously if a user accesses and fails a course as their first item within a skill profile or curriculum, the skill profile or curriculum would remain as Not Attempted instead of progressing to Incomplete. This has been addressed, and the skill profile or curriculum status is updated as expected in such situations.	8.5
CORE-8391	-	OPCM > Various Objects > Advanced > Meta Tags	Yes	Bug	Meta Tag "Assigned To" list now only displays objects from the current slice	Previously when clicking on a Meta Tag for an object in OPCM, the "Assigned To" section displayed objects from all slices with the tag assigned. This has been addressed, and only objects from the current slice are now included.	8.5
CORE-8181	-	OPCM > Various > Assignments > Recommend	Yes	Bug	Corrected loading of object Recommend view	Corrected an issue which prevented the Recommend view for an object from loading.	8.5
CORE-8234, CORE-8307	-	OPCM > Messaging > Standard Notification > Login Failure Notifications	Yes	Bug	Corrected Login Failure Inactivation notifications	Corrected an issue which prevented "Login Failure Inactivation" triggered notifications from being sent to inactive accounts in some situations.	8.5
CORE-8138	OPCM > Various > Triggers	OPCM > Messaging > Monitor Queues	Yes	Bug	Corrected firing of Assign to Course triggers	Corrected an error which prevented the "Assign to Course" trigger from firing for users.	8.5
CORE-8152	OPCM > Various > Triggers	OPCM > Messaging > Monitor Queues	Yes	Bug	Corrected notification generation for "No Assigned Event Session" trigger	Corrected an issue which prevented the "No Assigned Event Session" trigger from generating user notifications.	8.5
CORE-8213	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments	Yes	Bug	Corrected user curriculum time totals	If an object is assigned to a skill profile within a curriculum, the time spent in the object previously did not get counted towards the Completion Time and Total Time for the curriculum in some situations. This has been corrected.	8.5
CORE-8101	-	OPCM > Users & Groups > Reports > Report #1339	Yes	Bug	Corrected issue with report #1339	Corrected an issue which prevented report #1339 "User List by Org/Group" from returning results in some situations.	8.5
CORE-8845	-	OPCM > Users & Groups > Reports > Report #1280	Yes	Bug	Corrected missing user info in report #1280 export	Previously user names and logins were displayed in report #1280 "User Access During a Specific Time Period", but were excluded from the report export function. This has been corrected.	8.5.9
CORE-8298	-	OPCM > Content > Reports > Report #1057	No	Bug	Corrected error in report #1057	Corrected an error which occurred while running report #1057 "Course Analysis by Group".	8.5
CORE-8779	-	OPCM > Content > Reports > Report #1075	Yes	Bug	Report ID #1075 ignoring User status filter	When report #1075 "Course Progress for Multiple Groups" was filtered for Active users only, the report previously included Inactive records at some situations. This has been corrected.	8.5.8

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8771	-	OPCM > Users & Groups > Reports > Report #1284	Yes	Bug	Expanded dates to be included in Report #1284 date picker	The date picker for Report #1284 "User Assignment Status by Group" has been updated to include a user assignment if any of the following dates are within the selected date range: Assigned Date, First Access Date, Last Access Date, Completed Date.	8.5.7
CORE-8058	-	OPCM > Assessments > Tests > Select a Test > Assignments > Assign Questions	Yes	Bug	Fixed a typo on the test question assignment page	Corrected a typo of the word "Numeric" on the test question assignment page in OPCM.	8.5
CORE-8427	OPCM > Assessments > Reports > Report #1415	-	Yes	Bug	Update CSV export for report #1415	Corrections made to the Test Answer Analysis for All Questions - Multi Select #1415 report to ensure that selected fields are properly being reflected in the exported csv results. In addition, the user's email address has been added as a display option to be selectively added to the report results.	8.5.2
CORE-8214	-	OPCM > Events & Activities > Master Event Calendar	Yes	Bug	Corrected Master Calendar print error	Corrected an error which occurred when printing the Master Calendar view in OPCM.	8.5
CORE-8124	OPCM > Events & Activities > ILTs or Webinars > Select an Event > Triggers	OPCM > Messaging > Monitor Queues	Yes	Bug	Corrected firing of the "No Assigned Event Session" trigger	Corrected an error which prevented the event-level "No Assigned Event Session" trigger from firing as expected.	8.5
CORE-8220	-	OPCM > Events & Activities > Various > Triggers	Yes	Bug	Corrected event session triggered notification preview option	Previously the triggered notification "Preview" option would load a blank page for all session-based triggered notifications. This has been addressed, and admins are once again able to preview notifications for session triggers.	8.5
CORE-8512	-	OPCM > Events & Activities > Reports > Various Reports	Yes	Bug	Corrected date picker issue in event reports	Previously the date pickers in event session reports did not allow for selecting dates in the future. This has been corrected.	8.5.3
CORE-8546	-	OPCM > Events & Activities > Reports > Report #1465	Yes	Bug	Empty sessions once again included in report #1465	Corrected an issue which caused sessions with zero registrats from being included in the report #1465 "Event Session Attendance Status".	8.5.4
CORE-8586	-	OPCM > Events & Activities > Reports > Report #1498	Yes	Bug	Empty sessions once again included in report #1498	Corrected an issue which caused sessions with zero registrants to be excluded from the results of report #1498 "Event Summary by Date".	8.5.5
CORE-8701	-	OPCM > Events & Activities > Reports > Report #1498	Yes	Bug	Report #1498 now displaying correct session instructors	Previously report #1498 "Event Summary by Date" would list a user registered for the session as the session instructor, rather than displaying the correct session instructor name. This has been corrected.	8.5.7
CORE-7898	-	OPCM > Messaging > Forums	Yes	Bug	Admin forum list filters no longer cleared when navigating away	Previously the filters on the forum list page in OPCM were cleared when navigating away from the page and then back. This has been addressed, and the filters are now retained for the administrator until they clear the filters or log out.	8.5
CORE-8255	OPCM > Messaging > Forums > Select a Forum > Trigger	OPCM > Messaging > Monitor Queues	Yes	Bug	Removed duplicate header and meta data in forum digest emails	Previously the daily forum digest notification included the header and other metadata for each layer of forum replies. This has been addressed, and this data are now only included a single time at the top of the forum digest.	8.5
CORE-8074	-	OPCM > Administration > Catalogs > Select a Catalog > Associated Objects	Yes	Bug	Corrected catalog assignment page filter issue	Previously if an administrator applied a filter on an object list view in OPCM (e.g. filtering the Course list), the Catalog Assignment page would not display any object of that type unless the filter was cleared. This has been corrected, and the filters are now carried over and applied as expected.	8.5
CORE-8125	OPCM > Administration > Display Hierarchy	Custom Interfaces > Display Hierarchy View	No	Bug	Corrected Display Hierarchy node access when set to All Groups	Previously if a display hierarchy node was set to display to "All Groups", it would be viewable for all groups across all slices on the server. This has been addressed, and the node view is once again appropriately restricted to the groups on the same slice.	8.5
CORE-8049	-	OPCM > Administration > Global Glossary	Yes	Bug	Corrected Global Glossary term proliferation	Corrected an issue which caused defined Global Glossary terms to be available on all slices of a server in some situations.	8.5
CORE-8104	OPCM > Administration > Configuration > Customer > Forum Profanity Filter	Various > Forums	Yes	Bug	Updated Forum Profanity Filter to support blacklist words containing special characters	The Forum Profanity Filter has been updated to recognize blacklisted words containing special characters. Previously the method used by the Filter meant that blacklisted words with special characters (e.g. bad word's) were not matched to user posts in most cases.	8.5
CORE-8558	OPCM > Administration > Configuration > Dashboards	Various > Analytics Dashboards	No	Bug	Corrected SQL error in Question Analysis widget	Corrected a SQL issue in the Question Analysis widget when a secondary disaggregation of User was selected for the widget.	8.5.6
CORE-7187	OPCM > Administration > Configuration > Proxy Management	-	No	Bug	Corrected proxy functionality for overlapping management	If a manager is set as the proxy manager for multiple other managers who manage the same group/org unit, the end of one proxy period previously removed the proxy management rights over the common group/org unit. This has been addressed, and groups/org units remain managed via proxy until the last relevant proxy management has ended.	8.5

OPCommon (OPCommon)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8599	OPCM > Administration > Configuration > Slice > Login Access Options	Various > Login	Yes	Bug	Corrected repeated prompting of users under fixed-date attestation	Previously if a slice was configured with Login Access Options that required attestation on a specific date, users would be prompted to respond multiple times in some situations. This has been corrected, and the system now records the users attestation on the first response.	8.5.5

Content Viewer (OPCV)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8115	-	OPCV > Events	Yes	Bug	Join link now included for linked webinar sessions in OPCV	Previously the Event Detail view in OPCV did not include a "Join" button for linked webinar sessions. This has been corrected.	8.5
CORE-8262	-	OPCV > Various > User Access Time	No	Bug	User status updates to better record user time	When a user exits content in OPCV, previously the user status was updated prior to the user's time spent being recorded in some situations. This has been corrected, which helps ensure the correct time is recorded for user access.	8.5
CORE-8680	-	OPCV > Various > Catalog	No	Bug	Corrected equivalency issue in OPCV catalogs	Corrected an issue which prevented the OPCV Catalog view from fully loading if the user had completed equivalent items with titles over a specific character limit.	8.5.6
CORE-8333	-	OPCV > Content > Course Finish page	Yes	Bug	Corrected early survey access for courses	Corrected an issue which allowed users to take the survey for an Incomplete course from the course finish page in OPCV.	8.5

Performance Manager (OPPM)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8239	-	OPPM > Pending > User activities pending approval	Yes	Bug	Corrected status selection in OPPM Activity review	Previously when reviewing an activity in OPPM, managers were able to select "Approve" and "Try Again" radio buttons simultaneously. This has been corrected, and selecting one now automatically unselects the other.	8.5
CORE-8041	-	OPPM > Analytics	No	Bug	Corrected user count issue in legacy Dashboard Analytics view	Previously the legacy Dashboard Analytics view in OPPM did not load for managers with a very large number of managed users. This has been corrected.	8.5
CORE-8558	-	OPPM > Dashboards	No	Bug	Corrected an issue that caused specific user question answer analysis widgets not to load.	An issue was corrected that was causing the Question Analysis widget to not load properly when the widget was set up with a diagregation of user and points.	8.5.4
CORE-8092	-	OPPM > Reports > Scheduled Reports	Yes	Bug	Corrected Scheduled Reports paginated navigation in OPPM	Corrected an issue which prevented managers from navigating the paginated list view for Scheduled Reports in OPPM. This view has also been updated to sort by report date (most recent at the top), rather than report name.	8.5

Analytics Dashboards (OPAnalytics)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8062	-	Analytics Dashboards	No	Bug	Corrected issue with "Event - Complete" widget display	Corrected a error in the "Event - Complete" analytics dashboard widget which presented itself when viewing the data for a single event.	8.5
