

OnPoint Release 8.6
Release Notes - Web Version

March 2023 - September 2023

Enhancement = improvement to an existing system feature
New Feature = new capability in the system
Update = Improved Functionality

Course Manager (OPCM)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8506	-	OPCM > Various > Shared Content > Assignments	Yes (SA+)	Enhancement	"Shared to Slice" links added to Assignments tabs of shared objects	The Assignments tabs of Shared Objects now include a "Shared to Slice" section, displaying all of the slices to which the object is shared. If the current admin is an SA+ account, they can click on any of the slice names which will change the admin's current slice and allow them to manage the object and make assignments on	8.6
EPICS-169	-	OPCM > Various	Yes (if enabled)	Enhancement	New Content Presenter application now available	A new "Content Presenter" application is now available to customers. An alternative to the OPCV application, "OPCP" provides an improved platform for consuming content within a more modern presentation and with easy access to related materials, notes, and forums. Where OPCV included both assignment lists and playback functionality, OPCP is purely a content playback application, using the user's web or mobile CellCast interfaces to access each assignment. Please speak to your OnPoint Engagement Manager for more information.	8.6
CORE-8526, CORE-8583, CORE-8740	-	OPCM > Various > Reports	Yes	Enhancement	"Group Type" option added to reports with a Group filter	Most group-specific reports now additionally include a "Group Type" option. This option can be utilized to set which groups appear in the Group filter dropdown, with options for "All" (default), "Standard Groups", or "Event Session Groups". This helps admins or managers running reports by allowing them to select which group type they are looking to report on, shortening the Group list and removing groups not relevant to the current report.	8.6
EPICS-226	-	OPCM > Users & Groups > Users & Managers > Select a User > User Extra	Yes	Enhancement	New User Transfer functionality	If a slice is part of a slice cluster, a new "Transfer User" option is now available under the User Extra menu in OPCM. Limited to SA+ admins, this option allows for the transfer of the user account to a different slice within the same cluster. The existing account will have its Login ID changed and be set to an Inactive Record, and the newly created account on the other slice will inherit the original Login ID, user information, and all custom field values where the custom fields match between slices. The new account will inherit assignments for objects shared to or from both slices, but will not retain assignments for objects not shared between the slices. The new account will not retain any group or org chart assignments. Please speak to your OnPoint Engagement Manager with any questions about use of this new feature.	8.6
CORE-8514, CORE-8582	-	OPCM > Users & Groups > Reports > Report #1509	Yes	Enhancement	New report for groups without any active users (#1509)	A new report #1509 "Groups with No Active Users" has been created for listing groups without any active users assigned. The report can be set to return all groups with no active users, or only those groups within a selected Group Classification.	8.6
EPICS-232	OPCM > Content > Wizards > Content Wizard > Video	User Interfaces > Video Nugget	Yes	Enhancement	Support for utilizing Video Text Tracks with Video Nuggets	VTT (Video Text Tracks) support is now included in the OPLS. Administrators may now upload a VTT file as part of the video nugget wizard or manually for existing video assets, and users accessing the video nugget through the Content Presenter application will be presented with the subtitles while watching the video. This allows administrators an alternative to embedding the subtitles into the video itself, as well as additional flexibility with other languages. Additional support for displaying the VTT tracks within mobile CellCast apps will be included in the following release.	8.6
CORE-8458, CORE-8606	-	OPCM > Content > Reports > Report #1508	Yes (SA+)	Enhancement	New Multi-Slice Object Progress report	A new "Multi-Slice Object Progress" report #1508 is now available to SA+ admins for customers using the Shared Content feature. This report allows for the selection of a single object shared to or from the admin's current slice, and displaying the status of all users assigned to the object or any of its replicas on the slices to which it is shared. This report allows SA+ admins to monitor the assignment and user statuses of shared content across slices.	8.6
CORE-9512	-	OPCM > Assessments > Reports	Yes	Enhancement	Created a new custom report based on Report 1329	Created a new custom report, based on the one for Assessment Sets #1329. This features many additional filters, as well as the ability to select multiple Assessment Sets, the inclusion of Foreign ID to the User information section, and a Group Classification option.	8.6.21
CORE-9517	-	OPCM > Assessments > Reports	Yes	Enhancement	Created a new custom IRR Progress report	Created a new custom report, called IRR Progress by Group Report. This report allows for reporting on the unique IRR Assessment sets and the various rounds attempted by the user.	8.6.21
EPICS-231, CORE-8452	-	OPCM > Events & Activities > Instructor-Led or Webinars > Select an Event > Sharing	Yes	Enhancement	Content Sharing functionality extended to ILT and Webinar Events, including event sessions	Content Sharing functionality has been extended to include ILT and Webinar Events. If the Content Sharing module is enabled, admins will be able to share events to other slices on the same server, with the option to share the events on their own or to also share all future scheduled sessions of the event as well. If the sessions are shared, the registration of the shared sessions will be the same across all slices; a single shared session may have registrants from two or more slices, all attending the same session. Please see the Content Sharing feature guide for more information.	8.6
CORE-8432	-	OPCM > Events & Activities > Activities > Select an Activity > Sharing	Yes	Enhancement	Content Sharing functionality extended to Activities	Content Sharing functionality has been extended to include Activities. If the Content Sharing module is enabled, admins will be able to share Activities to other slices on the same server. Please see the Content Sharing feature guide for more information.	8.6
CORE-8501, CORE-8522	-	OPCM > Messaging > Forums > Select a Forum > Sharing	Yes	Enhancement	Content Sharing functionality extended to Forums	Content Sharing functionality has been extended to include Forums. If the Content Sharing module is enabled, admins will be able to share Forums to other slices on the same server. Once shared, regardless of which slice a user is on all posts, replies, and uploads from the primary slice or any of its replicas will be included across the board for all members of the shared forum. Please see the Content Sharing feature guide for more information.	8.6
CORE-8523	-	OPCM > Messaging > News Items > Select a News Item or Slider > Sharing	Yes	Enhancement	Content Sharing functionality extended to News Items and Sliders	Content Sharing functionality has been extended to include News Items and Sliders. If the Content Sharing module is enabled, admins will be able to share News Items and Sliders to other slices on the same server. Please see the Content Sharing feature guide for more information.	8.6
CORE-8491, CORE-8498, CORE-8500	OPCM > Administration > Common Glossary	Various > Object Glossaries in OPCM and User Assignment Views	Yes	Enhancement	New "Slice" option for slice-specific glossary terms	If a slice is part of a cluster, Glossary terms can now be set as "Global". Global terms are automatically shared to all slices within the cluster and are displayed in object glossaries in OPCM and within user assignment views. The previous "Global" glossary label has been renamed to "Slice" glossary, indicating that the terms are included in all glossaries for all Courses or Nuggets, but are not shared to other slices.	8.6
CORE-8555, CORE-8556	OPCM > Administration > Configuration > Slice > External Content	-	No	Enhancement	New Percipio External Content Aggregation module	Percipio has been added as a supported External Content aggregation module. Please see the Percipio Integration Feature Guide for more information.	8.6
EPICS-227	OPCM > Administration > Configuration > Slice > External Content	OPCM > Various	No	Enhancement	New External Content Integration for Xyleme	Xyleme has been added as an integrated foreign source. This integration supports both sending and receiving content to/from Xyleme. Please see the Xyleme Feature Guide for more information.	8.6
EPICS-233	OPCM > Administration > Configuration > Slice > External Content	OPCM > Various	No	Enhancement	New External Content Integration for Percipio	Percipio has been added as an integrated foreign source. Please see the Percipio Feature Guide for more information.	8.6
CORE-8502, CORE-8503, CORE-8504, CORE-8511, CORE-8735	OPCM > Administration > Configuration > Slice > General > Parameter for Competency Matrix	OPCM / OPPM > User Profile > User Extra	Yes	Enhancement	New User Transcript available for displaying user progress	A new "User Transcript" has been added for displaying a user statuses following the Competency Matrix model. The Transcript is designed to be a customizable, portable, printable view, and as such can be set with a banner header and can be configured to display an object parameter to include customer-specific information. Additional customization options will be available as part of the upcoming 8.7 release.	8.6
CORE-1807	OPCM > Administration > Configuration > Dashboards	Various > OPAnalytics	Yes	Enhancement	New disaggregation for Event - Completion Status widget	The "Event - Completion Status" analytics widget has been updated with a new "Complete, Incomplete" disaggregation, allowing disaggregation for users who are Complete or Incomplete for the event.	8.6
CORE-3719, CORE-3742	OPCM > Administration > Configuration > Dashboards	Various > Analytics	Yes	Enhancement	New primary diagggregations added to nugget widgets	A new "Source" primary disaggregation has been added to the "Nugget - Complete" and "Nugget - Duration" analytics widgets. This disaggregation allows for the calculation and display of completion data for each defined Foreign Source.	8.6
CORE-1639	OPCM > Administration > Configuration > Dashboards	Various > Analytics	Yes	Enhancement	New Assessment Set Complete widget	A new "Assessment Set Complete" widget is now available for inclusion in analytics dashboards. This widget displays the number of assigned assessment sets which have been completed in the configured time period, with options to drill down to see specific user statuses for the assessment sets.	8.6
CORE-8421, CORE-8422, CORE-8423, CORE-8424, CORE-8425	OPCM > Administration > Configuration > Classifications > Skill Profile/Curriculum Classifications	OPCM > Skills & Games > Skill Profiles or Curriculums > Select a Skill Profile or Curriculum	Yes	Enhancement	Support for defining and utilizing Skill Profile & Curriculum Classifications	Support has been added for defining available Classifications for Skill Profiles & Curriculums and assigning them to new or existing Skill Profiles & Curriculums. These may be used to filter for certain classifications in OPCM and OPPM, and for displaying each classification uniquely in custom interfaces. Custom Interfaces will need to be updated to utilize the UI portion of this functionality.	8.6

Performance Manager (OPPM)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8539, CORE-8542, CORE-8547, CORE-8548, CORE-8584	-	OPPM > Reports > Scheduled Reports	Yes	Enhancement	Scheduled reports can now be set to go out to groups of managers	Support has been added for scheduled reports to be set to go out to managers of selected groups. Previously scheduled reports could only be set to go out to specific individual managers, which required the report schedule to be updated if managers were added or removed.	8.6
User Experience (OPUX)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9139	-	Custom Assessments	No	Enhancement	Support for custom testing scenarios	To facilitate specialized testing scenarios, support has been added for running multiple assessments for a single user simultaneously and submitting all of them at once. This functionality is only available through specific custom assessment templates.	8.6.11
CORE-9181, CORE-9182	-	Various > Assessments	No	Enhancement	Support for user attestation within assessment templates	Support has been added for requiring user attestation within an assessment template. Please speak to your OnPoint Engagement Manager for additional information.	8.6.11
CORE-8835	-	User Interfaces > User Transcript	No	Enhancement	Support for users accessing their User Transcript from UIs	Support has been added for users to access their "User Transcript" from their interfaces. Custom UIs will need to be updated to provide access to this feature.	8.6.18
CORE-9494	-	User Interfaces > Various	Yes	Enhancement	Improved performance of UI elements related to Search and Hierarchy nodes	Updates have been made to the Search and Hierarchy endpoints called by the UI to provide better performance for large available data sets.	8.6.21
API Integrations (OPAPI)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8431, CORE-8434, CORE-8484	-	OPAPI	No	Enhancement	Updated API methods for cross-slice usage	Additional API support has been added for SA+ accounts to access data from multiple slices. Developers can access the API documentation for more information.	8.6
CORE-8446, CORE-8474	-	OPAPI	No	Enhancement	Creation of an API endpoint to send a Welcome Email	An OPAPI method has been added for developers to call to send out a Reset Password or Activation Email to a user. This is intended to be used alongside the existing OPAPI methods for creating users to send Welcome Emails to the new users.	8.6
CORE-8434	-	OPAPI	No	Enhancement	Added detail to API methods for additional slice and global UUID information	Additional slice and global UUID information is now included in API calls for slice data. Developers can access the API documentation for more information.	8.6
CORE-8480, CORE-8481, CORE-8482, CORE-8483	-	OPAPI	No	Enhancement	Updated OPAPI methods to support SA+ admins	OPAPI methods for retrieving/updating User, Object, Assignments, and User Assignment Statuses have been updated to allow SA+ admins to retrieve/update information for their slice and all slices within the same cluster. Developers can access the API documentation for more information.	8.6
CORE-8570, CORE-8571	-	OPAPI	No	Enhancement	Updated OPAPI methods to include additional assignment fields	OPAPI methods for retrieving/updating user assignments have been updated to include Due Dates, Access Begins dates, and Access Ends dates. Developers can access the API documentation for more information.	8.6
OPLSCron							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9534	-	Email processing	Yes	Enhancement	Adjusted email processing lock period	An additional table lock has been added to the batch email processing to ensure that long running email batches would not potentially overrun and attempt to send notifications in the process of being sent out.	8.6.21
OPZOOM (Zoom Support)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9527	-	OPCM > Events & Activities > Webinars	Yes	Enhancement	Updated Zoom authentication to OAuth	Updates have been made to support/ switch the Zoom authentication method from the previously supported JWT token to an OAuth token. The OAuth token must be generated by the Customer Zoom admin and then can be configured without losing connectivity to existing Zoom meetings.	8.6.21
