

OnPoint Release 8.8							
Release Notes - Web Version			Enhancement = improvement to an existing system feature New Feature = new capability in the system Update = Improved Functionality				
Course Manager (OPCM)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9629	-	OPCM > Home	Yes	Update	Grammar updates on OPCM Home page	Minor grammatical updates have been made to the Pending and Licenses sections on the Home page, such as adding plurals and capitalization where needed.	8.8
CORE-9760	-	OPCM > Home	No	Update	Additional information added to queue error notifications	If the email or notification processing errors are stopped due to an error, the messages which appear on the OPCM Home page have been updated to include more information.	8.8
CORE-9676, CORE-9779	-	OPCM > Home > LRS Viewer	No	Update	Optimizations added to LRS Viewer	Optimizations have been added to the LRS Viewer in OPCM to reduce delays when navigating between pages of statements.	8.8
CORE-9595	-	OPCM > Home > Delete Requests Pending	Yes	Update	Additional information added to Deletion List view in OPCM	An Action/Information column has been added to the Deletion List view in OPCM to inform administrators when a user or object has been added to the task queue for final deletion. This is to prevent the same user or object from being added to the queue multiple times.	8.8
CORE-9477	-	OPCM > Home > Tasks	Yes	Update	Filters added to Task Monitor	The OPCM Task Monitor has been updated to include filters for task name, parameters, and status.	8.8
CORE-9737, CORE-9743, CORE-9744, CORE-9747	-	OPCM > Home > Tasks	No	Update	Optimizations added to External LRS integration	Optimizations have been added to the process to send xAPI statements to an External LRS, including ensuring that it can only run once in a 24 hour period.	8.8
CORE-9633, CORE-9729	-	OPCM > System Configurations	No	Update	Separate config and queue added for registration emails	A new system configuration and queue have been added to control the Registration Email Processing Interval separate from the Message Processing Interval. This allows the email and registration queues to be processed at different intervals, which is helpful if registration emails need to go out more quickly than other system emails.	8.8
CORE-9572, CORE-9596	-	OPCM > Various Objects > Select Object > Assignments > User Selector	Yes	Enhancement	User Selector support has been extended to objects	Administrators can now use the User Selector feature set to assign or unassign users to objects using available user information, custom fields, parameters, or memberships. The existing assignment options remain available and unchanged. Please see the User Selector feature guide for more information on how to utilize selectors.	8.8
CORE-8653, CORE-9641	-	OPCM > Various > Reports	Yes	Enhancement	Optimization of report generation process	The report generation process has been optimized to reduce memory usage and reduce report processing times. All standard (non-custom) reports have been updated to utilize this optimization.	8.8
CORE-9565	-	OPCM / OPPM > Various User Assignments > Test Results	Yes	Update	OPCM/OPPM test results view now displays links in place of assets	The test results view in OPCM/OPPM has been updated to no longer display text/html assets as these could sometimes be quite large. The assets have been replaced with links which the administrator or manager can click to view the asset if needed.	8.8
CORE-9505	-	OPCM > Various Objects > Triggers	Yes	Update	Trigger templates now entirely independent of original triggered notification	Originally a trigger template remained associated with the originating triggered notification, meaning if the notification was deleted the template would be as well. Templates have now been entirely decoupled, meaning the template is not affected by deleting the original notification.	8.8
CORE-9664	-	OPCM > Various Objects > Select Object > Assignments	Yes	Update	Sharing info added to "Assigned to" sections	The "Assigned To" sections on object Assignment tabs now includes a Sharing column, indicating the sharing status of each object to which the current object is assigned.	8.8
CORE-9593	-	OPCM > Various Objects > Select Object > Information	Yes	Update	Creating a copy of an object now copies over parameters	Creating a new object using the "Copy As" function now also copies over any defined object-level parameters.	8.8
CORE-9758	-	OPCM > Users & Groups > Users & Managers > Select a User	No	Update	New OP-only slice configuration for setting whether admins can make/view notes about users	A new OP-only slice configuration has been added for whether administrators are able to add, edit, or delete OPCM user notes (not user-created notes about content). This option sets whether the Notes tab appears within user profiles in OPCM and defaults to No, meaning the tab is hidden by default.	8.8
CORE-9819	-	OPCM > Users & Groups > Users & Managers > Select a User > User Extra	Yes	Update	Evaluate Dynamic Memberships option added back to User Extra menu	The "Evaluate Dynamic Membership" option has been re-added to the User Extra menu in OPCM. It was removed in 8.7 builds during the transition to User Selectors.	8.8
CORE-9630	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments > Select Skill Profile or Curriculum > Change Status	Yes	Update	Renamed Skill Profile Termination page	When in a user's profile in OPCM, the "Skill Profile Termination" page has been renamed to "Skill Profile Status Change" to better reflect the function of the page and match the same pages for other object types.	8.8
CORE-9567	-	OPCM > Users & Groups > Users & Managers > Select a User > Memberships	Yes	Update	Indication of user/manager added to org unit display on user Memberships tab	The "Organization Chart Assignment" section on a user "Memberships" tab now indicates whether the user is a member or manager of the indicated org unit. Previously admins needed to click into the org unit to view this information.	8.8
CORE-9757	-	OPCM > Users & Groups > Users & Managers > Select an Administrator > User Extra	Yes	Update	Updated Access Options text for admins	To better reflect the available options, the "Cross Slice Access" button under User Extra for administrators in OPCM has been renamed to "Access Options". Similarly the "Administrator is allowed access to OPDoc" setting within Access Options has been renamed to "Administrator is allowed access to OPDoc on their home slice".	8.8
CORE-10101	-	OPCM > Users & Groups > Users & Managers > Select a Group > Dynamic Groups > User Selectors	Yes	Update	User Selectors can now be set to include Records	User Selectors have been updated to allow Record accounts to be included in the results. By default they continue to be excluded, but admins can now choose to include them by selecting "All (Including Records)" at the start of the selector if needed.	8.8.1
CORE-9667, CORE-9668, CORE-9669, CORE-9670	-	OPCM > Users & Groups > Groups > Select a Group > Information > Edit	Yes	Update	Option added to use Legacy functionality for Dynamic Groups	For those customers who do not wish to use User Selectors, a new "Membership Rule Version" option has been added to the group information page for choosing whether a specific group will use the Selector or Legacy functionality for Dynamic Membership.	8.8
CORE-9647	-	OPCM > Users & Groups > Groups > Select a Group > Dynamic Membership	Yes	Update	Support for automatically converting Legacy Dynamic Membership rules to User Selectors	In the 8.7 release, Dynamic Membership Groups were updated to use the new User Selector functionality in place of the legacy rules, with greatly expanded capability and ease of use. The release update now includes a process to automatically convert Legacy Dynamic Membership rules to the equivalent User Selector rules to maintain group continuity.	8.8
CORE-9712	-	OPCM > Users & Groups > Groups > Select a Group > Dynamic Membership	Yes	Update	Updated help text for manual execution of Dynamic Membership rules	The help text that appears when manually executing Dynamic Membership Rules has been updated with additional information to better assist administrators with understanding the effects and purpose of the manual execution.	8.8
CORE-9707, CORE-9751	-	OPCM > Users & Groups > Groups > Select a Group > Dynamic Membership	Yes	Enhancement	"Empty" & "Is Not Empty" options added to User Selector filters	Within User Selectors, admins can now add comparators of "Empty" or "Is Not Empty" to most rules to allow for checking if certain fields do or do not have values for users.	8.8
CORE-9776, CORE-9777	-	OPCM > Users & Groups > Groups > Select a Group > Dynamic Membership	Yes	Update	Record accounts now excluded from User Selectors	To avoid including record accounts in mass assignments or unassignments, user selectors have been updated to always exclude records in all rule processing.	8.8
CORE-9734	-	OPCM > Users & Groups > Groups > Select a Group > Dynamic Membership	Yes	Update	Updated User Selector Help text	The help text within User Selectors has been updated to provide additional information and improved guidance for administrators.	8.8
CORE-9675	-	OPCM > Users & Groups > Groups > Select a Group > Dynamic Membership	Yes	Update	User Selectors no longer include All Users by default	Previously newly created User Selectors defaulted to include All Users as an initial rule, which resulted in a group with all users if the admin did not make any other changes. This has been updated, and the groups now default to include no users.	8.8
CORE-9652	-	OPCM > Users & Groups > Groups > Select a Group > Dynamic Membership > User Selectors	Yes	Update	Updates to User Selector editor	User Selectors have received several updates, specifically updates to tab names, splitting manager rules from those for administrators, ensuring consistency of button widths, and resequencing the available rules under each tab. Collectively these changes make the interface more intuitive and similar to other views in OPCM.	8.8
CORE-9632, CORE-9691	-	OPCM > Users & Groups > Groups > Select a Group > Dynamic Membership > User Selectors	Yes	Update	Validation check and messaging added to Dynamic Membership User Selectors	User Selectors have been updated so that if a Dynamic Membership group is set with invalid User Selector rules (such as missing values in rules), the rules are not processed and a message is displayed to inform admins that one or more of the rules are invalid. A similar message is also displayed on the OPCM Home page, including the ID of the offending group(s).	8.8
CORE-9438	-	OPCM > Users & Groups > Groups > Select a Group > Dynamic Membership	Yes	Update	Validation checks added to User Selectors	When building and saving User Selector rules for Dynamic Membership Groups, administrators are now notified if their rules are likely to have large numbers of users assigned, such as if a User Selector is created with a single rule for "Active" users.	8.8
CORE-9599	OPCM > Users & Groups > Organization Chart	OPCM > Users & Groups > Users & Managers > Select a User > Memberships	Yes	Update	User Membership tab updated to support multiple Org Unit assignments	The user Memberships tab has been updated to support and display multiple org chart assignments for a user. Previously only a single org chart assignment was supported and thus displayed on this tab.	8.8
CORE-9628, CORE-9677	-	OPCM > Users & Groups > Organization Chart > Select a Node	Yes	Update	User Filters added to org chart Managed Users tab	To help with managing org chart nodes, the Managed Users tab for an org node has been updated to include ID, Name, Role, and Status filters for the assigned users. Additionally User Role and Status has been added as columns in the view.	8.8
CORE-9773	-	OPCM > Users & Groups/Skills & Games > Reports	No	Update	User bio info can now be included in reports #1432 and #1507	Reports #1432 "User Course Status Credit" and #1507 "Skill Profile Status Report by Group" have been updated to support including bio questions/answers as display options. These options only appear if a specific configuration setting is added by the OnPoint Support team.	8.8
CORE-10065	-	OPCM > Users & Groups/Skills & Games > Reports	Yes	Update	Reports #1432 and #1507 now show bio questions in defined sequence	The bio questions included in the Display Options of reports #1432 and #1507 are now included in the defined bio questions sequence, rather than alphabetical order.	8.8.1
CORE-9803	-	OPCM > Users & Groups > Reports > Report #1324	Yes	Update	User Foreign ID added to report #1324	User Foreign ID has been added as a display option to report #1324 "User Access by Group".	8.8
CORE-9922	-	OPCM > Users & Groups > Reports > Report #1521	Yes	Update	New report created for "Plus Admin Accounts" #1521	A new "Plus Admin Accounts" report #1521 has been created to display a list of administrators who have been designated as "plus" admins across all slices. This will allow admins to keep track of which admins have rights to navigate between slices. This report will only be available for customers who are using the "plus" admin functionality.	8.8
CORE-9771	OPCM > Content > Assets	OPCM > Various > Sharing	Yes	Update	Updating sharing with an updated asset now republishes the replica object(s)	When an asset is updated for a shared object, updating the sharing now automatically overwrites the replica asset and republishes the replica object(s).	8.8

EPICS-229	OPCM > Content > Courses	Various	Yes	Enhancement	cm5 support added to OPLS	The OPLS has been updated to include cm5 as a supported content type. cm5 courses can be created via the Content Wizard, after which they can be utilized in a similar manner to other course content types. The Wizard now allows you to select cm5 as a content type for any cm5 content you produce. cm5 playback requires OnPoint's new playback engine, Content Presenter.	8.8
CORE-9759	-	OPCM > Content > Courses / Nuggets-Notes	Yes	Update	Comments tab replaced by Notes tab for Courses and Nuggets	The Comments tab for courses and Nuggets in OPCM has been replaced with a Notes tab, allowing administrators to view, create, edit, and delete admin-only notes about each object. An html editor is available for specific formatting of these notes.	8.8
CORE-9985	OPCM > Content > Courses > Select a Course > Assignments > Assessments	Mobile CellCast App > xAPI Course	No	Update	Removed intermediate status step when a user fails a test associated with an xAPI course	Previously if a mobile CellCast user failed a test associated with an xAPI course via the OPLS (i.e. not a test within the course itself), their status for the course was updated twice, once to Completed and then again to Failed. The intermediate step has been removed and the user status for the course is now set to Failed directly.	8.8
CORE-9563	-	OPCM > Content > Assets	Yes	Update	External foreign source assets can no longer be edited	Updates have been made in Course Manager to prevent the edit of external foreign source assets with a type of Video, Text/HTML, or Link. These assets are associated with nuggets imported into the system via a content integration, and editing them can cause issues in management or playback of the assets.	8.8
CORE-9626	-	OPCM > Content > Reports > Report #1522	Yes	Update	New report #1522 created for "Foreign Source Access History"	A new report #1522 "Foreign Source Access History" has been created to display the most and least accessed foreign source objects, aggregated by Foreign Source. Admins can select one or all Foreign Sources and a date range, then the report results will display the counts of accessed vs unaccessed objects, with options to drill down to view the access counts for each object from the Foreign Source.	8.8.1
EPICS-250	OPCM > Assessments > Questions	Various	Yes	Enhancement	New Upload Media and Display Media question types	Support has been added for two new question types, Upload Media and Display Media. The Upload Media type is limited to Interactive Assessments, and requires users to upload a video, audio, or image file for review by their managers. The Display Media type can be used in any assessment, and is used to insert a video, audio, or image file into an assessment without requiring a response, useful for when multiple questions are related to a single media item. A feature guide is being written to assist administrators with utilizing these new question types.	8.8
CORE-9663	-	OPCM > Assessments > Tests / Questions	Yes	Update	Sharing column added to Tests and Questions lists	The Tests and Questions lists in OPCM have been updated to include a Sharing column, indicating which Tests and Questions are associated with a shared object. This column only appears if the slice is configured for sharing.	8.8
CORE-9621, CORE-9655, CORE-9661	OPCM > Assessments > Tests > Select a Test > Assignments	OPCM > Various Object > Publish	Yes	Update	Update to publish processes for Media-type questions	The Course, Nugget, and Assessment Set publish processes have been updated to allow publishing objects with tests containing Media Display-type questions to be published, while preventing publish if they contain any Media Upload-type questions. This is because Media Upload-type questions are currently only supported in Interactive Assessments.	8.8
CORE-9649	-	OPCM > Assessments > Assessment Sets > Advanced	Yes	Update	Changed wording of Assessment Set "Visibility" config	The "- OPCM" label has been removed from the Assessment Set "Visibility" option to reflect that users can have access to Assessment Sets through other applications, such as Content Presenter or CellCast mobile apps.	8.8
CORE-9620	-	OPCM > Assessments > Questions > Select a Question > Preview	Yes	Update	Previewing questions no longer auto plays the assigned asset	When in OPCM, previewing a question with a video or audio asset no longer auto-plays the asset. Administrators can play the asset if they wish.	8.8
CORE-9571	-	OPCM > Assessments > Questions > Assignments > Assets	Yes	Update	Pagination added to question asset assignment view	The page for assigning assets to a question in OPCM has been paginated to better support a large number of assets on a slice.	8.8
CORE-9569	-	OPCM > Assessments > Reports > Report #1518	Yes	Update	Report #1518 updated to include Assessment Set ID	Custom report #1518 "IRR Progress by Group" has been updated to include a new column for Assessment Set ID.	8.8
CORE-9578	-	OPCM > Assessments > Reports > Report #1519	Yes	Update	New custom report #1519	A new custom report #1519 "Test Answer Analysis - All Questions" has been created. This report is based on report 1407 with the same name, and is limited to displaying the assessments sets with a specific parameter.	8.8
CORE-9706	-	OPCM > Events & Activities > Instructor-Led/Webinars > Classes > Sessions > Notes	Yes	Update	Visual indication added when saving Additional Session Information	When saving an edit to the Additional Session Information on the Notes tab of a session, an "Information Saved" message now appears to indicate to the administrator that their changes have been saved. Previously their changes were saved without such indication.	8.8
CORE-9348	-	OPCM > Events & Activities > Webinars > Select a WebEx Webinar > Classes > Select a Session > Instructors	Yes	Update	WebEx Meeting co-hosts now automatically added/removed when updating Alternate Instructors	The WebEx integration has been updated so that Meeting co-hosts are updated immediately when Alternate Instructors are added or removed. Previously adding or removing Alternate Instructors didn't automatically update Meeting co-hosts.	8.8
CORE-9908	-	OPCM > Events & Activities > Webinars > Event > Classes > Session > Instructors	Yes	Update	Additional session instructors can now only be added to webinars after first save	To prevent the generation of orphaned data, additional session instructors can now only be added to supported webinar integrations once the session has been saved for the first time.	8.8
CORE-8992	OPCM > Events & Activities > Instructor-Led/Webinars > Select an Event	OPPM > Events > Select a Session	Yes	Enhancement	Managers can now set users to audit sessions	The session assignment page for users in OPDM has been updated to support auditing. Specifically if the event supports auditing, when selecting one or more users for assignment who have already attended a session, managers are given the additional option to assign the users as auditors instead of reconfirming them or removing their previous session enrollment. In the 8.7 release users could only be set to audit sessions by administrators in OPCM.	8.8
CORE-10018	OPCM > Events & Activities > Instructor-Led/Webinars > Select an Event > Sharing	OPCM > Events & Activities > Instructor-Led/Webinars > Select a Replica Event > Advanced	Yes	Update	Edit button added to Advanced tab for replica Events	The options on the Advanced tabs of replica events can now be edited by administrators. Previously the Advanced tab of replica events did not allow any edits.	8.8
CORE-9243	OPCM > Events & Activities > Webinars > Select an Integration Webinar Event > Classes > Select a Session	Webinar Integrations	No	Update	Failed external webinar updates no longer automatically deletes OPLS session	Updates have been made in OPCM so that when an external webinar session update fails the OPLS session is no longer automatically deleted. Previously failed updates caused situations where a session could exist in the external webinar system but not in the OPLS.	8.8
CORE-9997	OPCM > Events & Activities > Webinars > Teams Webinar	OPTeams	No	Update	Updated OPTeams to remove time offsets	The Teams integration has been updated to remove the time offset in times sent over to Teams. This is to accommodate for an issue in Teams where these offsets could cause incorrect session start times.	8.8
CORE-9577	-	OPCM > Events & Activities > Reports > Report #1114	Yes	Update	Foreign ID added as display option for report #1114	Report #1114 "Event Attendance for Multiple Groups" now includes a column for user Foreign ID as an available display option.	8.8
CORE-9970	-	OPCM > Events & Activities > Reports > Report #1498	Yes	Update	Updated report #1498 to include Event and Session status fields	Report #1498 "Event Summary by Date" has been updated to include fields for Event Status and Session Status. These columns display the statuses of the event and session, and appear after the Event and Session ID columns respectively.	8.8
CORE-9754	-	OPCM > Skills & Games > Reports > Various Reports	Yes	Update	Skill Profile/Curriculum version number added as a display option for listed reports	The version number of skill profiles and curriculums has been added as an available display option for the top 6 most run skill profile/curriculum reports. These reports are: - #1367 Skill Profile Progress Status by Group - #1381 Skill Profile Status - #1447 Curriculum Detail Report by Org/Group - #1469 Skill Profile Percentage Completion by Group - #1470 Curriculum Progress Detail Report - #1510 Curr/Skill Profile Status Report by Group	8.8
CORE-9592, CORE-9598	-	OPCM > Skills & Games > Skill Profiles	No	Update	Optimizations added to Skill Profile evaluation	Optimizations have been added to the Skill Profile evaluation check, improving system performance especially in situations where users have large numbers of Skill Profiles assigned.	8.8
CORE-9564	-	OPCM > Messaging > Ad Hoc Notifications > Various	Yes	Update	Updated styling of Ad Hoc Notification Pages	The Ad Hoc notification pages have been updated to match recent style changes in other areas of OPCM. The options and functions available are unchanged.	8.8
CORE-9731	-	OPCM > Messaging > Ad Hoc Notifications	Yes	Update	Raised character cap for ad hoc push notifications	When sending ad hoc notifications to users via OPCM, the character count for push notifications has been raised from 140 to 250.	8.8
CORE-9727	OPCM > Messaging > Standard Notifications	OPCM > Home > LRS Viewer	Yes	Update	xAPI statements in standard triggers now always recorded	The trigger system has been updated so that if a standard trigger is set to send xAPI statements to the LRS, that trigger will always fire even if individual objects are set to override standard triggers. This is to ensure the appropriate statements are always recorded and not accidentally removed for an object by an administrator. xAPI statements are not required and can be removed from standard triggers if statements do not need to be recorded.	8.8
CORE-9748	-	OPCM > Messaging > Monitor Queues > All	Yes	Update	Links to other queues added to messaging queues	The Notification, Email, and Mobile Push Queue pages in OPCM now include quick links at the top of the page for navigating between the queues. This is helpful for when an administrator opens the wrong queue and needs to move to one of the others.	8.8
CORE-9789	-	OPCM > Messaging > Monitor Queues > Notifications Queue		Enhancement	Updated Notification Queue to display Item Type for ad hoc notifications	Previously the Notification Queue did not display an Item Type for ad hoc notifications to group or interactive assessment assignees. This has been updated, and notifications of this type now appear with the appropriate Item Type in the queue.	8.8
CORE-9998	OPCM > Administration > Configuration > Slice	OPCM > Content > Wizards	Yes	Update	Notification configurations now utilized by content wizards	The content wizards now utilize the following slice-level messaging configurations and apply them to newly created content: Notify Interval, Notification Start, Notification End, and Default Minimum Time.	8.8
CORE-10000	OPCM > Administration > Configuration > Slice > Course Manager	OPCM > Administration > Parameter Search	Yes	Update	Parameter Search now utilizes the "Object Landing Page" config	The Parameter Search page in OPCM now utilizes the "Object Landing Page" slice config to determine whether administrators are taken to the Summary or Information tabs when selecting an object from the results. Previously admins were always taken to the Summary tab.	8.8
CORE-9823	-	OPCM > Administration > Configuration > Slice > Login Access Options	Yes	Update	Updated informational text in Login Access views	To better inform admins as to the effect of their actions, the "Click to Assign" and "Click to Unassign" info text in slice Login Access views has been updated to "Click to Select" and "Click to Unselect" respectively.	8.8
CORE-9876	OPCM > Administration > Configuration > Slice > Login Access Options > Assignment Launch	OLogin > Login	Yes	Update	Assignment Launch feature now uses launch method specified in configuration	The Assignment Launch Login Access Option has been updated to utilize the configured customer playback method, either OPCV or OPCP. Previously the Assignment Launch always utilized OPCV.	8.8
CORE-9646, CORE-9981	OPCM > Administration > Configuration > Slice > Welcome/Finish Messages	User Interfaces > Launch a Course	Yes	Update	Default Course Welcome/Finish Messages now utilized in OPCP	If a slice is set to use Object Messages, has a default Course Welcome or Finish message, and a Course does not have specific messages defined, then the default Course messages will be displayed in the Content Presenter application. Previously OPCP only displayed course-specific messages and did not utilize the defaults. This relates to Content Presenter only.	8.8
CORE-9828	OPCM > Administration > Configuration > Slice > User Transcript Configuration	Various > User Transcript	Yes	Update	Object fields can now be hidden/rearranged for User Transcript	Object fields can now be rearranged and enabled/disabled for the User Transcript view. Previously the Object Name, Assigned/Completed Dates, and Status fields were always enabled and in fixed positions.	8.8

CORE-9666, CORE-9703	OPCM > Administration > Configuration > Custom Fields > Skill Profile/Curriculum	OPCM > Skills & Games > Skill Profiles / Curriculums > Information	Yes	Update	Additional custom fields added for Skill Profiles & Curriculums	Five additional custom fields have been added to Skill Profiles and Curriculums, bringing the total to ten.	8.8
CORE-8679	OPCM > Administration > Configuration > Dashboards > Builder	Various > Analytics Viewer	Yes	Update	Foreign Source now supported as Nugget Duration disaggregation	The Nugget Duration analytics widget now supports disaggregating by nugget Foreign Source.	8.8
EPICS-225	OPCM > Administration > Configurations > Classifications	OPCM > Various	Yes	Enhancement	All object types now support Classifications	Classification support has been extended to all object types, allowing for defining the available Classifications, setting and filtering for Classifications for each object, and utilizing the Classifications to control display behavior in UIs. Previously Classifications were available only for Groups and Events.	8.8
CORE-9643	-	OPCM > Administration > Import / Export > Import Data > Import Users	Yes	Update	User Import once again allows users to be imported without activation emails being sent	On the spreadsheet User Import view in OPCM, admins are once again able to leave the Login Type as None, rather than requiring the selection of either Login/Password or SSO. This will import the users without sending them an access-appropriate activation email.	8.8
Content Presenter (OPCP)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9941	-	User Interfaces > Launch a Course/Nugget to OPCP	Yes	Update	Updated OPCP information view	The information view in OPCP has been updated with new formatting and layout of the object information and associations.	8.8
Content Viewer (OPCV)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9607, CORE-9613	-	Content Viewer > SCORM Courses	No	Update	New configuration to reduce evaluations of Skill Profiles statuses	A new OPRA-only configuration has been added for disabling the automatic evaluation of Skill Profile statuses while a user is progressing through a SCORM Course. This is to prevent particularly chatty SCORM Courses from prompting the repeated evaluation of large Skill Profiles which can create a significant system load. This configuration is currently defaulted to No, and will be utilized only in coordination with customers.	8.8
Performance Manager (OPPM)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9570	-	OPPM > Home	Yes	Update	Replaced HTML editor on OPMP Home page	The HTML editor for the Company Message available to administrators on the OPMP Home page has been replaced with an updated editor with improved styling and additional options.	8.8
User Portal (OPPortal)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-10079	OPCM > Assessments > Assessment Sets > Advanced > Deep Links	Assessment Set Deep Link > OPPortal	No	Update	Assessment Set deep links now utilize Content Playback configuration	OPPortal has been updated to utilize the OPRA-only "Content Playback" configuration for determining whether to launch Assessment Set deep links to OPCV or OPCP. Previously Assessment Sets were always launched into OPCV.	8.8.1
User Experience (OPLUX)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9597	-	User Interfaces > Progress/Game Boards	Yes	Update	Activities now included on user boards	Previously assigned/available Activities were not appearing on Progress Boards and Gameboards in user interfaces. This has been corrected, and Activities are now included on Progress/Gameboards.	8.8
CORE-9500	-	User Interfaces > All	No	Update	Optimization of UI data calls	Optimizations have been added to UI data calls, reducing the number of open DB connections and loading times.	8.8
CORE-9644	-	User Interfaces > Various > Content Detail	No	Update	Mobile Publish flag now provided to User Interfaces	An additional field for whether the object has been published for mobile is now provided to user interfaces, indicating to the user if they have an assigned item that they can only complete in a browser. This will be standard in the base package.	8.8
CORE-9556	-	User Interfaces > Submit Assessment	Yes	Update	Corrected test submission error	Corrected for a rare error which previously occurred when a user submitted multiple tests simultaneously.	8.8
CORE-9767	-	User Interfaces > Various > Forums	No	Update	Optimizations added to forums	Optimizations have been added to forums, particularly in the process of liking and unliking forum posts.	8.8
CORE-9756, CORE-9807	-	User Interfaces > My Profile	Yes	Update	Updated My Profile launch method	The user My Profile view now loads in an iframe modal to better support the setting to require users to edit their My Profile view on first/next login.	8.8
CORE-9444	-	User Interfaces > Various	No	Update	Equivalency optimizations added to OPLUX	Optimizations have been added to OPLUX equivalency checks, reducing loading times for assignments in user interfaces.	8.8
CORE-9445	-	User Interfaces	No	Update	Optimizations added to loading assignments in UIs	Optimizations have been added to the process of retrieving the list of user assignments, reducing UI loading times.	8.8
CORE-9989	-	User Interfaces	No	Update	Associated survey information now included in assignment data	Survey information on assigned objects is now included in the data sent to UIs, allowing further updates in the future to support user's launching object surveys from UIs.	8.8
CORE-10019	-	OPLUX > Event Methods	No	Update	UIs can now display event ratings	Event ratings data can now be included in User Interface views. Previously events were the only object type for which users could not view ratings in UIs.	8.8
LRS (OPLRS)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9753	-	OPLRS	No	Update	External LRS integration now automatically resumes following a rejection	The External LRS servlet for statement processing has been updated to automatically resume sending batches of statements if a batch is rejected by the external LRS. Previously a rejection would halt the process with a notification, requiring manual restart of the process.	8.8
CORE-9769	-	OPLRS	No	Update	Additional recording of xAPI answered statements	Additional logic has been put in place to additionally record appropriate xAPI answer statements coming from Rise xAPI published content.	8.8
CORE-9967	-	OPLRS	No	Update	Added data check and cleanup to OPLRS	The OPLRS has been updated to check for and correct xAPI statements which have values in the wrong fields. Specifically the OPLRS now checks and corrects for statements with the context extension userId value in the login value field.	8.8
CORE-10091	-	xAPI Courses > xAPI Statements in arrays	No	Update	Updated OPLRS to accommodate for statements sent in an array	The OPLRS has been updated to accommodate for xAPI statements sent in an array, as opposed to individually. This includes status updates as well as ensuring duplicate test attempts and answers are not recorded.	8.8.1
Data Warehouse (DWL)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9617, CORE-9618, CORE-9619	-	Data Warehouse	No	Update	Added source-related data for courses and nuggets to DWL	Added "source" and "source_id" fields to the courses and nuggets tables in the DWL to store information about the source of the content (e.g., OnPoint, Franklin Covey, LinkedIn Learning) and its identifier, respectively. Updated the ETL and stream components to populate the fields.	8.8
CORE-9716, CORE-9719	-	Data Warehouse	No	Update	Updated DWL character set	The character set used in the Data Warehouse has been updated to use utf8mb4 to match the build used in the OPLS database.	8.8
CORE-9720	-	Data Warehouse	No	Update	Increased field size for group names	The size of the field for recording group names in the DWL has been increased from 128 to 256 characters to match the same change in the OPLS database.	8.8.0
CORE-9766	-	Data Warehouse	No	Update	Updates to handle "orphaned" organizational unit assignments	Additional cleanup processes now ensure that org chart assignments are properly removed when org units are deleted by a custom import.	8.8.0
CORE-9614, CORE-9615, CORE-9616	-	Data Warehouse	No	Update	Added global UUID for events, classes, and sessions to DWL	Added "global_uuid" fields to the events, classes, and sessions tables to store the OPLS global UUID.	8.8.0
Analytics (OPAnalytics)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9558	-	Various > Analytics	Yes	Update	Dashboards now include your own data if you are a member of your managed group	OPAnalytics dashboards have been updated so that they now include data for the manager/administrator viewing the dashboard if they are a member of their own managed group. This data was previously excluded.	8.8
CORE-9151, CORE-9761	-	Various > Analytics > Earned Certificates Widget	Yes	Update	Managers can now view certificates from Earned Certificates analytics widget	The Earned Certificates Analytics widget now supports launching to each certificate by clicking on the provided "View" button.	8.8
Mobile Gateway (OPMGW)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9656, CORE-9665	-	Mobile CellCast Apps > Self-Assign Item	No	Update	Optimizations added to SyncItem call	Optimizations have been added to the SyncItem call in the Mobile Gateway. This reduces the loading time when self-assigning an item, particularly in situations where customers have a large catalog of available items.	8.8
OnPoint Release 8.8 Bug Fixes							
Release Notes - Web Version				Bug = feature not working as expected			
Course Manager (OPCM)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9806	-	OPCM > Home	Yes	Bug	Corrected Resource Intensive Reports link on OPCM Home page	Corrected an issue which prevented the "Resource Intensive Report Results" page from loading.	8.8
CORE-9879	-	OPCM > Home > Change Slice > Various > Reports	Yes	Bug	Corrected report data for "plus" admins on other slices	Corrected an issue where if a "plus" admin ran a report on another slice, they were previously provided data for their origin slice rather than the current slice.	8.8
CORE-9612	-	OPCM > Home > LRS Viewer	Yes	Bug	Corrected caching issue in LRS Viewer	Corrected a caching issue in the LRS Viewer which caused the user filter to not show any users.	8.8
CORE-9765	-	OPCM > Various Objects > Assignments	Yes	Bug	Advanced filter now applies to correct side on Object User Assignment page	Corrected an issue on the Object User Assignment view where the Available filters were being applied to the Assigned user list instead.	8.8
CORE-10029	OPCM > Various > Sharing	OPCM > Assessments > Questions > Select a Question > Answers	Yes	Bug	Corrected duplicate Question Answers following circular sharing	Previously if a test was associated with a shared object, then assigned to a different object and shared back to the original slice, duplicate Question Answers would be created on the original slice. This has been addressed, and the duplicates are no longer created.	8.8

CORE-9606	-	OPCM > Various > Assign a Course to a Group	No	Bug	Corrected error in group assignment	Corrected a rare timing error which previously occurred when assigning a course to a user group which could cause a duplicate course assignment.	8.8
CORE-9559	OPCM > Various > Parameters	OPCM > Various Objects > Information > Deletion	No	Bug	Object parameters now deleted with object	Previously object-level parameters were not deleted when the associated object was deleted via OPCM; this has been addressed.	8.8
CORE-9451	-	OPCM > Various Objects > Assignments > Recommendations	Yes	Bug	Enter key now applies rather than resets Recommendations filter	When on the Recommendations view of an object, the enter key now applies the entered filters. Previously the Enter key reset the filters back to the default instead.	8.8
CORE-9792	-	OPCM > Various Objects > Achievements Tabs > Certificate	Yes	Bug	Corrected issue when bulk printing certificates	Previously when on the Achievements tab for an object and selecting multiple users for whom to print certificates, only the first certificate would be generated with the defined background and the others would have a blank background. This has been addressed.	8.8
CORE-9550	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments > Select an Activity	Yes	Bug	Corrected view of uploaded activity files for nugget creation	Corrected a URL error which prevented administrators from viewing uploaded files on the Nugget Creation tab of the Activity Status view for users in OPCM. This option only appears if the slice is set to allow the creation of learning nuggets from uploaded activity files.	8.8
CORE-9718	-	OPCM > Users & Groups > Users & Managers > Filter	Yes	Bug	Corrected user count when filtering by Bio questions	When filtering the user list via User Bio answers, the user total at the bottom of the screen previously always displayed 0 users. This has been corrected, and the user count displays as expected.	8.8
CORE-10117	-	OPCM > Users & Groups > Users & Managers	Yes	Bug	Updated OPCM to prevent duplicate user workarounds	Previously it was possible to create a user in OPCM with the same login ID as an inactive or Request Delete user. This has been corrected.	8.8.1
CORE-10125	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments > Select an Event	Yes	Bug	Corrected user Event History view as a non-SA admin	Previously when viewing the Event History for a user in OPCM, if the viewing admin had an admin role other than Site Admin (i.e. CC, CA, or EM) then the modal popup would display the OPCM Home page instead of the Event History. This has been corrected.	8.8.1
CORE-9745	-	OPCM > Users & Groups > Organization Chart > Select a Node > Managed Users > Assign Users	Yes	Bug	Corrected issue in available users list for org chart assignment	When assigning users to an organization chart node, switching away from the Users sub tab and then back would previously not display any users for assignment. This has been corrected.	8.8
CORE-9746	-	OPCM > Users & Groups > Groups > Select a Group > Dynamic Membership	No	Bug	Corrected issue with User Selector rule processing	Corrected an issue which caused User Selector rules to not be processed for Dynamic Membership Groups in some situations on AWS server environments.	8.8
CORE-9657	-	OPCM > Content > Courses > Select a Course > Assignments	Yes	Bug	Corrected assigning an Intro Page to a Course	Corrected an error which occurred when assigning an Introduction Page to a Course in OPCM.	8.8
CORE-9953	-	OPCM > Content > Courses > Select a Course > Assignments > Topics	No	Bug	Added back missing Finished button on Topics Assignment page	If a customer is using legacy Topics, the Topics Assignment page in OPCM did not have a Finished button for returning to the Course Assignment tab. This has been corrected.	8.8
CORE-9919, CORE-10037	OPCM > Content > Courses > Select an xAPI Course > Assignments > Assessments	Various > Assigned xAPI Course	Yes	Bug	Corrected user status checks for xAPI courses with tests	Previously if an xAPI course had an OnPoint test assigned to it, users who finished the course would be marked as completed without requiring them to complete the test. This has been corrected, and users are now required to pass the test for course completion.	8.8
CORE-9553	-	OPCM > Assessments > Review Feedback > Select an Assessment Set Feedback	Yes	Bug	Corrected Assessment Set name display in Review Feedback	Corrected the display of the Assessment Set name on the OPCM Review Feedback view to ensure it appears as expected.	8.8
CORE-9501	-	OPCM > Assessments > Interactive Assessments	Yes	Bug	Corrected positioning of Creation/Edit info and History link for Interactive Assessments	The created date, last edit date, and History link was previously displaying above the Edit button for Interactive Assessments. This has been corrected.	8.8
CORE-9974	-	OPCM > Assessments > Reports > Report #1126	Yes	Bug	Corrected viewing user answer text in report #1126	Previously an error prevented managers/admins from viewing the text of user answers in report #1126 "Review Responses". This has been corrected.	8.8
CORE-9786	-	OPCM > Events & Activities > Event Session Wizard	Yes	Bug	Corrected applying filters with Enter key in Event Session Wizard	Previously for filters in the Event Session Wizard, clicking Enter did not apply the filter in all cases. The Wizard has been updated and Enter now applies the selected filter.	8.8
CORE-9810	-	OPCM > Events & Activities > Event Session Wizard	Yes	Bug	Corrected time blocking in event session wizard	Corrected an issue in the event session wizard where the duration of the next coaching slot was being used to determine the minimum time to schedule before that slot, rather than using the inputted duration.	8.8
CORE-9793, CORE-9796	OPCM > Events & Activities > Any Event > Advanced > Deep Links	Various > Event Deep Links	Yes	Bug	Removed duplicate character from event deep links	Corrected a duplicate ' ' character preventing event deep links from resolving.	8.8
CORE-9797	OPCM > Events & Activities > Coaching Event > Triggers	OPCM > Events & Activities > Coaching Event > Create a Coaching Slot	Yes	Bug	Corrected event triggers for Coaching slots	Corrected new event session triggers not firing when creating Coaching slots.	8.8
CORE-9818	-	OPCM > Events & Activities > Instructor-Led/Webinars > Select an Event > Classes	Yes	Bug	Corrected display of linked session attendance status	Previously if a user was assigned to a session with linked sessions, setting them as attended for the parent session would display them as attended for all linked sessions on the Classes view for an event. This was a display issue only and has been corrected.	8.8
CORE-10042	OPCM > Events & Activities > Instructor-Led/Webinar > Select Event > Triggers	OPCM > Various > Assignments	Yes	Bug	Corrected event session assignment with certain triggers defined	Corrected an error which occurred when assigning users to events which had a triggered push notification defined.	8.8
CORE-10108	-	OPCM > Events & Activities > Instructor-Led or Webinars > Classes > Assign	No	Bug	Correct Completed users appearing as Unassigned in Class Scheduling	Corrected an issue where users already Completed for an event could appear in the Unassigned list in the event's Class Scheduling page in some situations.	8.8.1
CORE-10109	-	OPCM > Events & Activities > Instructor-Led or Webinars > Classes > Linked Sessions	No	Bug	Updated data cleanup for deleting linked sessions	The linked session deletion process now ensures that all associated event registration records in the database are appropriately deleted. Previously these records were not deleted if only linked sessions were deleted, and these orphaned records could cause some unexpected behavior.	8.8.1
CORE-9817	-	OPCM > Events & Activities > Select an Event > Digital Classroom	Yes	Bug	Corrected invalid data if no Digital Classroom assignments are made	Corrected an issue where erroneous data was saved for the "Coursework 1" selection if an admin navigated to the Digital Classroom tab of an event and away without making an assignment.	8.8
CORE-9811	-	OPCM > Events & Activities > Webinars > Select a Teams Webinar > Classes	Yes	Bug	Corrected creation of Teams webinar sessions	Updates have been made to the Teams integration to ensure sessions are created as expected within the Teams system. Previously the sessions were not created in situations where the Microsoft ID was missing from the value array.	8.8
CORE-9966	-	OPCM > Events & Activities > Webinars > Select an Event > Classes > Select a Shared Session	Yes	Bug	Corrected shared webinar update issue	Corrected an error which previously occurred when updating the start time of a shared webinar session in OPCM.	8.8
CORE-9979	-	OPCM > Events & Activities > Reports > Report #1117	Yes	Bug	Corrected export of report #1117	Previously in the export of report #1117 "Event List by Instructor" the data could appear in the wrong columns in some situations. This has been corrected.	8.8
CORE-9490	-	OPCM > Skills & Games > Curriculums > Select a Curriculum > Assignments > Assign	Yes	Bug	Corrected column headers on Curriculum object assignment view	Corrected the display of column headers when assigning content to Curriculums in OPCM which previously displayed the wrong object type for some objects.	8.8
CORE-9557	OPCM > Skills & Games > Skill Profiles or Curriculums > Assignments	Various > Progress Boards	Yes	Bug	Corrected waypoints being created on Progress Boards for non-assigned items	Previously Progress Boards displayed all items in a skill profile or curriculum as waypoints, even those not assigned or available to the user via assign before/after rules. This has been corrected, and waypoints are now only created for those items actively assigned to the user.	8.8
CORE-9784	-	OPCM > Skills & Games > Skill Profiles or Curriculums > Copy As	Yes	Bug	Corrected copying Assign Before dates for Skill Profiles and Curriculums	Corrected an issue where copying a Skill Profile or Curriculum would not copy over Assign Before dates for assigned items. This has been corrected.	8.8
CORE-10095	-	OPCM > Skills & Games > Game Profiles	Yes	Bug	Corrected game tab navigation	Previously when viewing a game in OPCM, navigating to the Associated Objects tab and then to a different tab would "lose" the game and display information for the non-existent game with ID 0 instead. This has been corrected.	8.8.1
CORE-10047	-	OPCM > Administration > Slice Administration	No	Bug	Corrected unintentional disabling of User Bio	Previously saving changes to the slice administration page, would disable the User Bio feature for that slice. This has been corrected.	8.8
CORE-9880	OPCM > Administration > Configuration > Slice > User Fields Configuration	OPCM > Users & Groups > Users & Managers	Yes	Bug	Corrected mandatory field check in OPCM user profile	OPCM now appropriately requires address fields if Address is set as mandatory when creating or editing users. Previously the fields were marked with an asterisk but the user profile could be saved with empty address fields (street, city, etc.).	8.8
CORE-9813	OPCM > Administration > Configuration > Dashboards	Various > Analytics	No	Bug	Corrected loading of Nugget Duration widget when lacking assignments	Previously the Nugget Duration analytics widget would not load if managed users did not have any nuggets assigned. This has been corrected and now the widget will load with a 0 value.	8.8
Content Viewer (OPCV)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9821	-	Content Viewer > SCORM Course	No	Bug	Prevented an error when saving SCORM interaction data	Corrected an error which occurred with specific SCORM courses when saving SCORM interaction records to the database. The error did not prevent data from being saved and does not require mediation.	8.8
CORE-9826	-	Content Viewer > Nugget with Assessment	Yes	Bug	Corrected Fail Nugget trigger for OPCV users	Corrected an issue which prevented the Fail Nugget trigger from firing if a user had exhausted their total attempts for the test associated with a nugget in OPCV.	8.8
CORE-9873, CORE-9949	-	Content Viewer > Storyline Course	No	Bug	Corrected missing test attempt data for some Storyline SCORM courses	Corrected an issue which caused some SCORM data for Storyline course test attempts to not be recorded if the courses were accessed through a web interface (vs mobile). This has been addressed.	8.8
CORE-9978	-	OPCV > SCORM Course	No	Bug	Corrected issue with SCORM interaction descriptions	Corrected an issue which caused SCORM interaction question descriptions to not be recorded due to special characters in the question text.	8.8
CORE-10031, CORE-10043	-	OPCV > SCORM Course	No	Bug	Corrected rejected learner responses for SCORM likert questions	Corrected an issue which caused learner responses for likert questions inside SCORM courses to be rejected if they contained a lone dash character "-" with no other excluded special characters.	8.8
Content Presenter (OPCP)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-10111	-	User Interface > Completed Course / Nugget	Yes	Bug	Re-added option to Browse Completed Courses/Nuggets	Previously a typo caused the Browse button to not be displayed in Content Presenter for Completed Courses/Nuggets. This has been corrected.	8.8.1
User Experience (OPUX)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9579	-	User Interfaces > Various > Assessment Template	No	Bug	Asset information included in template test result information	Corrected missing asset information required to include the Display Media and Upload Media question types in the test results for an assessment template.	8.8

CORE-9781	-	User Interfaces > Progress/Game Boards	Yes	Bug	Corrected object thumbnails on Progress Boards	Corrected an issue with object thumbnails not appearing on Progress Boards.	8.8
CORE-9785	-	User Interfaces > Progress/Game Boards	Yes	Bug	Corrected Progress Board loading issue	Corrected an issue where progress boards would not load if the Skill Profile/Curriculum contained items not assigned or available to the user.	8.8
CORE-9798	-	User Interfaces > Forums	Yes	Bug	Corrected forum loading issue	Corrected an issue which prevented forums from loading within certain custom interfaces.	8.8
CORE-9951	-	User Interfaces	No	Bug	Corrected UI xAPI statement timestamps	Corrected for a rare issue where xAPI statements generated from UIs (launched, searched, viewed) could have timestamps in the future.	8.8
CORE-9980	-	User Interfaces > Shared Events > Self-Enrollment	Yes	Bug	Updated seat registration logic for shared sessions	Corrected an issue where the max registrations value was not being appropriately enforced on shared event sessions, allowing users to self-enroll beyond the maximum seat limit.	8.8
CORE-10002	-	User Interfaces > Digital Classroom	Yes	Bug	Corrected missing Digital Classroom content	Previously if a skill profile or curriculum contained an activity and was associated to an event as Digital Classroom content, the skill profile or curriculum would not be displayed within Digital Classroom interfaces. This has been corrected.	8.8
Performance Manager (OPPM)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-10116	-	OPPM > User Details	Yes	Bug	Updated OPPM to prevent duplicate user workaround	Previously it was possible to create a user in OPPM with the same login ID as an inactive or Request Delete user. This has been corrected.	8.8.1
LRS (OPLRS)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9774	-	OPLRS	No	Bug	Corrected recording and display of External LRS servlet connection duration	The duration of the External LRS servlet connection is now recorded and displayed as expected. Previously the duration was always displayed as ~20 milliseconds.	8.8
Mobile Gateway (OPMGW)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9622	-	Mobile CellCast Apps > Survey	No	Bug	Corrected recording of survey completions on mobile	Corrected recording of survey results when the survey was completed on a mobile CellCast app. Previously the mobile gateway recorded survey results as a test instead.	8.8
CORE-9993, CORE-10017	-	Mobile CellCast App > Various	Yes	Bug	Updates to ensure CellCast user object statuses are not reset	The Mobile Gateway has been updated to accommodate for timing issues that could in certain situations cause a Mobile CellCast user's status for a Completed object to be reset to Incomplete until the user's next sync. This was specifically exhibited when closing the app while in the middle of a SCORM course.	8.8
OPMSSO							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9728	-	Deep Links > OPPortal	Yes	Bug	Corrected issue with UUID deep links	The OPMSSO process has been updated to pass UUID values for deep links, preventing an issue where the UUID values were stripped and prevented deep links from taking the user to the appropriate learning objects.	8.8
Data Warehouse (DWL)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9594	-	Data Warehouse	No	Bug	Support for recording progress dates for users missing time zones	Previously if a user was not set with a timezone, their records in item_progress would have a null progress date. The logic for recording user progress has been updated to record progress dates even for users without time zones being set.	8.8
CORE-9653	-	Data Warehouse	No	Bug	Corrected missing progress date	Corrected an issue where the DWL was recording an empty progress date in item_progress in some situations.	8.8
OnPoint Release 8.8 API Updates							
Release Notes - Web Version				Update = Improved Functionality			
API (OPAPI)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9601	-	OPAPI	No	Update	Additional validation added to OPAPI Update User method	Additional validation checks have been added to the Update User OPAPI methods to ensure only valid user IDs can be updated.	8.8
OnPoint Release 8.8 Plugin and Integration Updates							
Release Notes - Web Version				Update = Improved Functionality			
Teams Integration Support							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9574	-	Teams Integration	No	Update	Updated Teams integration to support non-standard response from Outlook	The OPTeams integration has been updated to accommodate for non-standard responses when creating a calendar event in Outlook that overlaps with an existing event.	8.8
CORE-9575	-	Teams Integration	No	Update	Additional logging and error messaging for invalid Teams instructors	Better logging and error messaging has been added to indicate when a Microsoft Teams webinar instructor does not have a valid Office 365 license, including preventing the creation of the session in the OPLS.	8.8
WebEx Integration Support							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9650	-	WebEx Integration	Yes	Update	WebEx attendee request now includes up to 500 users	Previously the request for data on attendees for WebEx sessions was only requesting the data for up to 50 users at a time. This limit has been increased to 500 to accommodate for larger WebEx sessions.	8.8
CORE-9680	-	WebEx Integration	No	Update	Increased maximum attendees for WebEx integration	The WebEx integration has been updated to increase the maximum number of participants/attendees in a single meeting from 100 to 1,000.	8.8
EPICS-261	-	WebEx Integration	Yes	Update	WebEx integration shifted to REST API	Due to the WebEx XML API being deprecated at the end of 2023, the WebEx integration has been updated to utilize the replacement REST API.	8.8
CORE-9909	-	WebEx Integration	No	Update	Updated WebEx attendance check	To prevent the generation of orphaned data, the WebEx integration now checks if a session still exists in the OPDB before attempting to check for attendance.	8.8
CORE-9911	-	WebEx Integration	No	Update	Updated WebEx integration to filter out failure messages for orphaned session data	The WebEx integration has been updated to prevent error notifications being generated in OPCM for failure notifications with session ID 0.	8.8
CORE-9878, CORE-9908	-	WebEx Integration	Yes	Bug	Corrected WebEx linked session creation with multiple instructors	Previously if a WebEx session had three or more instructors associated then creating linked sessions would throw an error. This has been corrected.	8.8
CORE-9900, CORE-9901	-	WebEx Integration	No	Update	Updated WebEx integration to accommodate for delayed attendance	Previously WebEx attendance reports could fail to return any data in situations where attendance was not captured in the first few days after the meeting. This has been addressed.	8.8
CORE-10035, CORE-10036	WebEx Integration	OPCM > Events & Activities > Instructor-Led/Webinars > Select an Event > Classes	Yes	Bug	Corrected missing attendance for shared sessions	Previously the automatic attendance in the WebEx integration did not update attendance for shared sessions for users on other slices. This has been corrected.	8.8
Magento Integration Support							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9651	-	Magento Integration	Yes	Update	Updated Magento user address mapping	The process of creating users from Magento in the OPLS now maps the address fields to the individual Street, City, etc... fields, rather than the single legacy Address field for improved reporting flexibility.	8.8
CORE-9535	-	Magento Integration	No	Update	Updated user creation check in Magento integration	The Magento integration has been updated to create the user account on successful purchase, rather than when an account is created in Magento.	8.8
CORE-9788	-	External Links > OPMagento	Yes	Update	Updated Magento integration to show messaging if no account is found	Updates have been made so that when users click on designated links provided in the Magento interface they are seamlessly directed to OPPortal or OPMagento based on whether they are currently logged in and if they have an OPD account. If the latter case then messaging is presented to inform the user that they do not have an account. This functionality is only used for customers with Magento integrations.	8.8
Plugins							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9772, CORE-9780	-	Plugins	No	Update	New plugin for exporting xAPI statements for a course	A new plugin has been created for exporting all "Answered" xAPI statements for a specified course. Please reach out to the OnPoint support team for assistance with using this plugin.	8.8
CORE-9825, CORE-10005	-	OPPlugin	No	Update	Updated LRS plugin support to copy LRS statements to Watershed	The LRS plugin has been updated to additionally support copying all LRS statements within a definable period and for specific slices from the OPLRS to the external Watershed LRS.	8.8
OnPoint Release 8.8 Maintenance Updates							
Release Notes - Web Version				Update = Improved Functionality			
OPLSCron							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9950	-	OPLSCron / OPTask	No	Update	Optimizations added to assignment and status checks	New logic has been added to ensure OPTask processes and Item Progress status updates will occur sequentially, rather than attempting to update the same tables at the same time. This will reduce processing times when assigning or updating a large number of items to users such as assigning a skill profile to a large group of users.	8.8
Database (OPDB)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-9875, CORE-9939	-	Database	No	Update	xAPI test attempts now recorded in OPDB tables for specific courses	Updates have been made to ensure that in addition to the LRS, "Answered" and Test Attempt xAPI statements are also recorded in the OPDB. This presented itself for specific xAPI statements from identified courses where the answers and test attempts were not grouped together as expected by the content. These updates utilize the user's session information to group the attempt and answers so that they are displayed in OPCM as part of the user's course attempt.	8.8
CORE-9999	-	Database	No	Update	Updated course cleanup on deletion	Additional cleanup has been added to the course deletion process. Previously some orphaned records remained when deleting xAPI courses.	8.8
