E! = Key Enhancement

E=Enhancement

B=Bug Fix

Portal (OPPortal)/Custom UI				
Location/Functional Area	Type	Summary	Details	
OPPortal - Login	B	Password Reset via OPPM was not requiring user to reset their password upon subsequent login	Corrected an issue where the password reset function was not requiring the user to reset their password although the configuration flag was set to prompt the user to update their password on next login.	7895
OPPortal - Login	E	OPPortal 'forgot your password?' function now trims any trailing or leading spaces / carriage returns from user email automatically	When a user attempts to use the Forgot Password function, the process will now automatically trim any leading/trailing carriage returns and/or spaces that exist in the user's email address field in OPCM to ensure the email can be sent by the system.	8210
OPPortal - Login	B	Failed Login to OPPortal was displaying expired login phrase	Corrected an issue where failed login to OPPortal was displaying incorrect phrase key.	7719
OPPortal - Search	E!	Add Search function for Forum titles and descriptions	The OP-Portal Search function has been updated to include forums if found within the title or description and if the user has access to that forum. The user could then launch the forum from the search results	6990
OPPortal - Contacts Directory	E	OPDirectory to include Avatar images based on design	Enhanced view of OPDirectory gives a better view of the User's info in the Directory and can now include the User's avatar.	7864
OPPortal - Forums	E	Add Launch Forums tab from OP-Portal	Add ability to launch OPCV directly to the Forums tab, from an OP-Portal link.	7524
OPPortal - My Profile	B	Users could not remove existing avatar image from My Profile	Corrected an issue where users could not remove or replace an existing avatar / image in the My Profile area.	7616
OPPortal - My Profile	E	Display instructor bio and WebEx host information in My Profile for Event Instructors to edit	The My Profile section in OPPortal has been updated to provide Event Instructors access to edit their own Instructor BIO as well as change their WebEx password if necessary.	6554
OPPortal - Notifications	B	Manage Notifications configuration set in OPCM was not functioning as expected	Corrected an issue where the Manage Notifications configuration was not controlling the users' managed notifications settings in the My Profile area.	8175
OPPortal - Custom UI	E	Add support for user rating submission from a custom UI	Custom UI: Add a method for accepting user rating submissions from a custom UI page.	6946
OPPortal - Custom UI	E	Add "game_score" and "game_score_type" properties to content returned in the Custom UI filtered assignments call	Custom UI: Add "game_score" and "game_score_type" properties to content returned in the Custom UI filtered assignments call.	6944
OPPortal - Custom UI	E	Include nugget type in /CustomUiFilteredAssignments call	Custom UI: Include nugget type in /CustomUiFilteredAssignments call.	6527
OPPortal - Games	E	Add Launch Game to CustomUiLauncher	Added an OPPortal Custom call to allow the user to go directly from OPPortal to a specific game detail page in OPCV.	7917

Course Manager (OPCM)

Location/Functional Area	Type	Summary	Details	
OPCM - User & Groups - Locations	B	Location-related action buttons updated	Action buttons within Location pages were non-responsive, corrected.	8422
OPCM - User & Groups - Users	E	Add access history status of "exited"	Within a user's Assignment Status, the access history status has been updated to correctly reflect "exited" versus "completed" for instances where a user correctly exited the course, but due to other settings may not have completed the course. e.g. Failed test or did not meet time requirements	6948
OPCM - Users & Groups - Groups - Mobile Registration Codes	B	Group registration code generation does not send group password to oregister	The correct group password was not being updated and passed to the Registration server as part of the shared Device Group registration code creation process; corrected.	8509
OPCM - Users & Groups - Job Codes	B	Job Code Assignments Select All / Clear All links do not work	Within the assignments sub-tab, the Select All / Clear All links did not work; corrected.	8347
OPCM - Users & Groups - Locations	B	Improve 'copy as' function for location or organization	Pop-up does not close automatically when copying a location or organization; corrected.	7892
OPCM - Users & Groups - Users	E	Clear Failed Login Attempt on User being made Active	When making a user active after x number of failed logins, the failed login attempts are now cleared so that user can start afresh.	6936
OPCM - Users & Groups - Users - User Bio	E!	New 'User Bio' feature	New feature allows customers to create a form with a series of custom questions and definable fields in OPCM that can be presented to users through the My Profile area of the online portal. An example use case is a personal user 'bio' that can be edited by the user and printed by a Performance Manager or Administrator. Includes ability to search across the custom fields from within OPCM. For example, if you requested users provide information about their education level and language proficiencies, an Admin can then search through the fields to find a list of all users with a degree in engineering that also speak French.	8345
OPCM - Users & Groups - Users - User Bio	E	Bio function support for drop down question type	Bio area now provides ability to define a drop down option as one of the question types.	8540
OPCM - Users & Groups - Users - User List	E	Manager check box now auto-generates search	Selecting the Manager check box on the User List page automatically generates search for Managers automatically to save time (supported by all browsers except IE).	8500
OPCM - Users & Groups - Users - My Media	E	My Media uploads should open in new window	Updated functionality to open My Media previews in a new popup window instead of taking over the main window.	8377
OPCM - Content - Assets	E	Display SCORM 1.2 or SCORM 2004 designation at asset level	Additional SCORM information is now displayed at the asset level to indicate to Admins whether the course is SCORM 1.2 or SCORM 2004.	6725
OPCM - Content - Courses	E!	New course indicator to show SCORM, non-SCORM, or Tin Can type	Added an indication at the course level as to the type of course. Options include SCORM, Non-SCORM, and Tin Can, and the type is automatically set by the course creation process.	7942

OnPoint Release 5.3

December 2013 Release Notes - Web Version

E! = Key Enhancement

E=Enhancement

B=Bug Fix

Location/Functional Area	Type	Summary	Details	
OPCM - Content - Courses	B	Auto Generate skills not working for course copies	Updated functionality to automatically create a skill for a course when it is copied if the customer level configuration is set to automatically create skills for all new objects.	7391
OPCM - Content - Courses	B	Mobile Sync typo	Corrected spelling error in opcm (Mobile Sync was Mobile Sysc).	7475
OPCM - Content - Courses & Nuggets	E	Add option at Course Level to set http header type for IE compatibility	Each course and nugget now have a new function allowing the Admin to change the http header information for content that required compatibility mode for some versions of IE	8514
OPCM - Content - Courses/Nuggets	E	New language filter for Courses and Nuggets	Added additional language filter in the advanced filter function for Courses and Nuggets to allow an admin to sort based on the languages assigned to customer/slice.	7165
OPCM - Content - Courses/Nuggets	E	New function at the Object level (Course / Nugget) to remove object from sync folder X days after completion	This new function allows for setting the period after completion of a Nugget or Course that the content file will remain on the user's device. The values can be set to (1) not automatically put the item in the user's Sync folder, (2) remove the item from the user's sync folder x days after completion, or (3) leave the item in the user's sync folder permanently. Settings can be made globally under Administration – Configuration and overridden at the object level when publishing the content.	5594
OPCM - Content - Courses/Nuggets	E	Remove header information for Courses published for Mobile with only one page	Update to the Course Publish function to better minimize unneeded header space in courses published to mobile with only one page and asset.	7014
OPCM - Content - Courses/Nuggets	E!	Minimum completion time % setting at Course and Nugget Level	Added the completion percentage value at the individual object level. Now completion based on the percentage of estimated duration can be determined based on a different (override) percentage set at the individual object level. Previously, only a global setting could be made.	6176
OPCM - Content - Nuggets	E	Add support for HTML5 nugget type	The HTML5 nugget type has been added as a standard available nugget type for Mobile, and the Nugget Wizard now includes this option in the PPT/Slides section.	7509
OPCM - Content - Wizards - Content Wizard	B	Web Version now set when using Nugget Wizard	When creating a Nugget through the Nugget Wizard, the process has been updated to always set a web version. This must be set to ensure that the appropriate asset is displayed in OPCV online. A default will be made and the admin can adjust it if necessary.	8492
OPCM - Content - Wizards - Content Wizard	B	Custom field detail entered during course creation via wizard was not saving	Data entered for custom fields during course creation via wizard was not saved in the course record; corrected.	8433
OPCM - Content - Wizards - Content Wizard	B	Nugget / Course Wizard content Duration entry now required	Nugget / Course Wizard erroneously allowed a content duration field entry of 0. A positive duration is required, so this field in the wizard now requires a positive entry to proceed.	7959
OPCM - Content - Wizards - Content Wizard	E	Set PDF as the default file type web version in the Content Wizard	Change the file type order within the ePUB/PDF Content Wizard and make PDF the default web version because of better online support for PDF.	7685

OnPoint Release 5.3

December 2013 Release Notes - Web Version

E! = Key Enhancement

E=Enhancement

B=Bug Fix

Location/Functional Area	Type	Summary	Details	
OPCM - Content - Wizards - Content Wizard	E	Impatica conversion step removed from Nugget Wizard	We no longer support a Impatica 4 conversion process, so this has been removed from the Nugget Wizard.	7512
OPCM - Content - Wizards - Content Wizard	B	Creating Nugget with Wizard - category is pre-populated but is requiring me to create a new one	When creating Nugget via the Wizard, the Category was entering a default category but not maintaining that when saved; corrected.	7482
OPCM - Content - Wizards - Content Wizard	B	Updates to nugget wizard file sizing	The Nugget wizard has been updated to better size all nugget asset files, specifically video and PDFs, to be browser sized instead of sized for mobile.	7229
OPCM - Content - Wizards - Transcode Media Files	E	Remove FLV from NOT SUPPORTED in Transcode upload	Removed FLV from NOT SUPPORTED and add to SUPPORTED on transcode instruction screen as this file format is now supported as a source file for transcoding.	7451
OPCM - Assessments - Tests	E	New Add Test Attempt trigger	A new trigger has been established at the test level to allow for sending an email when a new test attempt has been established for a user by a performance or course manager once the user has exceeded the initial test attempts allowed. Previously, the Add Test Attempt could be added but there was no automated way to notify the user they could try again.	6387
OPCM - Assignment Lists	B	Ensure assignment lists wrap correctly	Added formatting to ensure that assignment / available 'side by side' lists do not wrap due to lengthy names or titles.	7623
OPCM - Events & Activities - Activities	E	Add Auto Archive function to Activities as it currently exists for nuggets and courses	Add option to set an Auto Archive period for Activities where you can set a specific Activity to automatically archive x days after completion. Upon Archiving, the item will be moved to the user's History tab and can no longer be accessed by the user.	7195
OPCM - Events & Activities - Activities	B	Current date was saved in the Due Date field when selecting Activity Save	Current date was inadvertently saved in the due date field when editing an Activity; corrected.	8358
OPCM - Events & Activities - Event Filters	E	Event Filter should default to "includes" for the Event name	The Event filter should default to "includes" for the Event name, in the same way as do filters for other content object types.	8418
OPCM - Events & Activities - Events	B	WebEx Createsession method should set email to False by default	This new value is a flag that can be passed to WebEx in order to turn off specific WebEx email notifications for WebEx sessions created through OPCM and sent over to WebEx. The flag is now defaulted to false	7949
OPCM - Events & Activities - Events	B	Event List page Name filter - Clicking 'Enter' brings up new event page	Update to the Event List page to ensure that clicking the "Enter" key will apply the filter as opposed to launching the Add Event Function.	7991
OPCM - Events & Activities - Events	B	Add scroll bar to Event_Webinar_Class Scheduling page	The Event_Webinar_Class Scheduling page needed a scroll bar, as important items can be hidden; added.	7979
OPCM - Events & Activities - Events - Triggers & Notifications	E!	The Cancelled Event Session trigger should remove queued emails for that session	The trigger process now ensures that all "queued" notifications specific to a Cancelled Event session are deleted from the system so as to prevent already queued reminder emails being sent out for a canceled session of the event	8458
OPCM - Events & Activities - Events - Triggers & Notifications	E!	The Change Event Session trigger should remove queued emails for that session	An update has been made to the trigger process to ensure that all "queued" notifications specific to a Changed Event session are deleted from the system so as to prevent already queued reminder emails for a cancelled session of the event from going out. New notifications for the Changed Event Session trigger will be sent out to replace the deleted "queued" emails as long as the Changed Event Session Trigger and Notifications have been defined.	8435

OnPoint Release 5.3

December 2013 Release Notes - Web Version

E! = Key Enhancement

E=Enhancement

B=Bug Fix

Location/Functional Area	Type	Summary	Details	
OPCM - Events & Games - Events	E	WebEx session creation needs to provide failure information to the admin	Updated alerts in OPCM now indicate to an admin that the WebEx session creation failed for whatever reason.	6586
OPCM - Triggers & Notifications	E!	Show user custom fields in substitution field area for all standard notifications	All Triggered Notification creation pages have been updated to allow for the inclusion of user custom field data within the notification message using the user fill in values.	7010
OPCM - Triggers & Notifications	E	New Assignment Date database value for Triggered Notifications	When creating a triggered notification, the Assignment Date is now an additional database substitution value that can be utilized within a notification message.	5477
OPCM - Notifications - Forums	B	Fixed Forum Action buttons	Forum pop-up window Close and Refresh buttons non-responsive; corrected.	8455
OPCM - Notifications - Forums - Filters	E	Forum List page Name filter - Clicking 'Enter' brings up new Forum page	Selecting Enter when the Forum Filter Name text box was active launched the Forum Edit window instead of the filtered list results; corrected.	7897
OPCM - Notifications - Forums - Triggers & Notifications	E!	Add Send to "Other Email" from Forum triggers	A new 'Send to' option has been added to the forum trigger functions to allow for triggered "digest" emails (period-specific compilation of Forum posts) to be sent to a specific "Other" email address indicated in the Other Email field in the Forum trigger.	8550
OPCM - Notifications - Notifications Queue	E!	New descriptor columns in Notification Queue	Several new Columns (object title and object type) and filters have been added to the notification queue to display the item type that the notification was created from and also to allow for filtering of the notification queue by item type and specific item ID.	7960
OPCM - Notifications - Notifications Queue	E	Provide option in email and notification queue to "Resend email"	Admins can select the sent status link on previously sent emails and re-queue an email / notification to be resent to the user. Emails must be individually selected.	6900
OPCM - Search	B	Selecting Default within Search filter should reset all values including drop-down boxes	Selecting Default within the Search filter was not resetting all values including drop-down boxes; corrected.	8420
OPCM - Skills & Games - Games	E!	New function to allow a game to be created and assigned, but to NOT show up in OPCV	All Games now have a new configuration value that can be set at each individual game that indicates whether the game should appear in the OPCV games list or not. This is largely for those "Master" games that include many items that are tracking points, but should not be displayed to the user	7928
OPCM - Skills & Games - Games	E!	Support for skill profiles in a game, with zero points value	Skill Profiles with a point value of zero can now be added to a game as long as the items within the skill profile have points. This works in the reverse as well where the skill profile in the game has a point value, but the items in the skill profile can have zero points associated with them.	8332
OPCM - Skills & Games - Games	B	Improved game edit messaging	Added functionality that when game edits are made that require a republish to take effect, an admin is reminded to republish the game. Edits that can cause the game to be unpublished include adding an object assignment to the game.	6608
OPCM - Skills & Games - Games	B	Ability to unpublish a game	Added new function to unpublish a Game.	7530

OnPoint Release 5.3

December 2013 Release Notes - Web Version

E! = Key Enhancement

E=Enhancement

B=Bug Fix

Location/Functional Area	Type	Summary	Details	
OPCM - Skills & Games - Games	B	Viewing documents from a game not granting game points	Games that include direct document links as well as document node links now appropriately give points in the associated game to the user that has accessed the document or document node.	8231
OPCM - Skills & Games - Games - Achievements	B	Achievements based solely on Forums do not award points correctly	Update to Game scoring to ensure that Forum entries entered for associated Forums during the Game period properly apply points to the appropriate user for that game.	8183
OPCM - Skills & Games - Games - Achievements	E	Game Completion badges causing errors for games with no end date	Games with no end date no longer show 'end date-specific' achievement and trophy options, since a game with no end date would not have the ability to be completed.	7006
OPCM - Skills & Games - Games - Games List	E	Updated Games Search field	Selecting Enter/Return when focus is in the Games List ID search field does not generate search; corrected.	8498
OPCM - Skills & Games - Games - Leader Boards	E	Ability added at individual game level to select which leader boards are available for users	Added functionality at the individual game level to define which of the three possible leader board options appear for each specific game (master, group, and/or challenge). Defaults to all three on.	7189
OPCM - Skills & Games - Skill Sets	B	Skill set filter not working when searching by creation date	Skill set filter not working when searching by creation date; corrected.	8426
OPCM - Skills & Games - Skills	E	Update skill assignment page	The Skill Assignment page has been updated to display what other skill sets the skill is assigned to.	7099
OPCM - Administration - Configuration	E!	New global setting to govern whether content should be allowed to open outside of the CellCast app	A new configuration setting can be made to govern whether content with links to open content in the full browser, outside of the standard 'in app' browser, will be allowed. Security conscious customers can set this value to "No" to only allow content to be opened within the app itself if desired (in most CellCast app platforms).	7676
OPCM - Administration - Configuration	E	Define multi user timeout / session timeout value	A new timeout value can be established and sent to the mobile apps to indicate how long a user on a shared device can remain logged into the app after it has been closed or put in the background before the user is returned to the User list, where they would need to login again.	7505
OPCM - Administration - Configuration - CellCast	E!	Add option to "Force Full Sync" for all users on a slice	Added a configuration function under CellCast that allows an admin to set all user's mobile states to direct that the next sync will be a full sync.	7536
OPCM - Administration - Import/Export	B	Export function does not properly export UTF-8 characters	The export of user data from the import / export function was not properly UTF-8 encoding the export; corrected.	7856
OPCM - Administration - Import/Export - Import Users	B	Enable Course assignment as part of the User import process	Course assignment was not working when importing users; corrected.	7566

OnPoint Release 5.3

December 2013 Release Notes - Web Version

E! = Key Enhancement

E=Enhancement

B=Bug Fix

Location/Functional Area	Type	Summary	Details	
OPCM - Administration - Manage Reports	E	Update Reports display to indicate which are custom	A new column has been added to the Manage Reports section under Administration that will display which reports are "Standard" versus "custom" to your organization.	8566
OPCM - Administration - Manage Reports	E	Add new set of filters for Manage Reports area	Add new set of filters in the Administration – Manage Reports area to allow Admins to more easily locate reports.	6931
OPCM - Administration - Meta Tags	E!	New administration area for meta tag creation	A new menu selection has been added under Administration for defining and viewing the defined meta tags for the various objects in the system. Adding a meta tag here will make it available when creating new content so that it can be selected if desired.	7564
OPCM - Administration - Mobile Shortcuts	B	Deletion of Mobile UI needs to also remove connection to associated group	Updated cleanup process to delete 'left behind' database artifacts when a Mobile UI is deleted without unassigning the groups from the shortcut first. This ensures that the users will get the new UI versus the deleted UI.	7799
OPCM - Administration - Mobile Shortcuts - Custom UI	E!	Create and store UI thumbnails for multi-UI implementations	To support the multi-UI display page, the custom UI has the ability to have a unique icon image and title for each separate UI being offered to the user.	7513
OPCM - Administration - Mobile Shortcuts - Custom UI	E	Ability to set Mobile UI as default for slice (all groups)	Functionality introduced to allow for setting a Default Mobile UI for all users regardless of Primary Group for a specific customer slice.	6984
OPCM - Administration - Publish - Publish Multiple Courses	B	The 'Select All' function not working on Publish Multiple Courses page	The 'Select All' function was not working on Publish Multiple Courses page; corrected.	7780
OPCM - Administration - Publish - Publish Multiple Courses	B	Publish Multiple Courses link not underlined as usual	Publish Multiple Courses link not underlined, corrected.	8430
OPCM - Administration - System Administration - Mobile Devices	E!	Add support for .ibook as mobile nugget type	.ibooks are now a supported mobile nugget extension type in the mobile devices mapping table (though support in iOS apps is still pending).	7785
OPCM - Administration - System Configuration - Administrative Matrix	E!	Introduction of an Administrative matrix for defining and managing admin rights and view	The Administrative Matrix is a new function that allows a Root Admin to select which menus will be viewable and define certain functionality that will be accessible for a particular admin role.	7478

OnPoint Release 5.3

December 2013 Release Notes - Web Version

E! = Key Enhancement

E=Enhancement

B=Bug Fix

Content Viewer (OPCV)

Location/Functional Area	Type	Summary	Details	
OPCV - Skill Profile Catalog	B	Next button not performing as expected	Update to the Skill Profile Catalog to better handle loading and improved pagination of large lists.	8174
OPCV - Courses	B	Maximum test timer not displaying in test	Maximum test timer was not displaying timer in upper left of test; corrected.	8037
OPCV - Courses	B	Course topic does not translate correctly in French-Canadian	The display of language specific topic titles in OPCV were not being localized correctly; corrected.	7732
OPCV - Courses/Tests	B	Numeric question grading wasn't working	In tests, Numeric questions were not properly being scored and needed to be corrected.	8551
OPCV - Courses/Tests	B	Test displays answers from prior attempt	Updated functionality to prevent answers from a previous attempt at a test assigned to multiple objects from appearing in the other assigned objects. Tests should be able to be reused across multiple objects without showing previous responses.	7993
OPCV - Courses/Tests	E	Test completion status is now determined after rounding	Update to the test scoring to ensure that rounding is performed before determining the pass / fail completion status of a test. Previously, if the passing score is 80 and the user scored a 79.5, the system was showing a score of 80, but a status of Failed. Now the rounding will occur first, making the score an 80, and passing the user. Essentially, test grading will now interpret a passing score as -.5 of the actual score.	7735
OPCV - Content Ratings	B	Content ratings could be "zero" stars	When rating a Course or Nugget, the user was allowed to set a rating of 'zero' stars. This has been corrected to require a minimum of a one star rating.	7666
OPCV - Content Ratings	E	Add ratings column to assignment lists	Update to OPCV Course or Nugget List view to include column to far right for Rating.	7028
OPCV - Content Ratings	E	Now showing star rating selections instead of numbered boxes	Updated rating functions to display stars instead of numbers.	7013
OPCV - Catalogs	E	Create new option in OPCV Catalog views to filter for unassigned items	There is a new check box in OPCV Catalog lists (Courses, Nuggets, Assessment Sets) to allow a user to filter for only those objects in the catalog view that are not assigned already. This will be the default setting	6621
OPCV - Search	E	Enter/Return in the search term text box now generates search	When a search term is entered and then the Enter / Return key is pressed in the catalog search, a search did not occur. This function has been added.	8503
OPCV - Activities	B	Added a refresh function to Complete Activity List	A background refresh function has been added to the Activity List to ensure that completion of an Activity by a user causes the page to refresh and properly displays the "Participation" or "Completion" status of the Activity in the Activity List.	8039
OPCV - Activities	E	Updates to Activity completion process	The Activity Completion process has been updated to better deal with older browsers such as IE8 – Changing modal windows to a full page Activity completion display.	8586

OnPoint Release 5.3

December 2013 Release Notes - Web Version

E! = Key Enhancement

E=Enhancement

B=Bug Fix

Location/Functional Area	Type	Summary	Details	
OPCV - Forums	E	Add scroll bar on Forums page	Added a scroll bar to left side of forum page to accommodate long lists of forum titles for better display to users who are members of lots of forums	8169
OPCV - Forums	E!	Improved Forums Search	The Forums search in OPCV has been updated to properly search using the value "includes" instead of "begins with" to allow for wider searches of Forum Titles and Descriptions. This search is limited to forums the user has access to.	7847
OPCV - Forums	E	Remove/Hide Attach File link on forum posts	The Attach File function has been hidden in the Forums in OPCV for the time being until more stable support is introduced.	8606
OPCV - Forums	E!	Add Forum description that will stay resident	When accessing Forums in OPCV through the Forums tab, the Forum Description is now displayed below the Forum Title and will stay resident there; the description can also support html.	6895
OPCV - Games	B	Improved control of access to Forums in Games	If a Forum is associated with a game, but a user is not associated with the Forum (by way of a content or group assignment), then the user will see the Forum but cannot access it until they have properly been allowed	7824
OPCV - My Status	E	My Status now includes re-certified assignment completions	My Status has been updated to include re-certified Courses / Nuggets in the Assignment Status and Competency Matrix views. The entry falls just below the previously certified Course or Nugget in the list	6622

Document Manager (OPDOC)

Location/Functional Area	Type	Summary	Details	
OPDOC	E	New method to link to a document in OP-Doc by ID	Added a new linking capability from either OP-Portal or CellCast mobile that can be used to point to Documents in OP-Doc by ID. This link will check that the user has access to the linked document, and open the document in a new browser window (if applications exist to open it and permissions are adequate). All document tracking is supported as well, just as it is in the online system now. This method also works in mobile apps when linked to from a url link in a description or Activity.	7429

eCommerce (OPEC)

Location/Functional Area	Type	Summary	Details	
OPEC	E	New Preferred Language field in OPEC registration and new user form	OPEC registration and new user form now include an option for user to select their Preferred Language.	7040
OPEC	E	New option to deliver a reg code along with login credentials	New OPEC configuration supports delivery of a reg code with login credentials if desired, upon purchase completion.	6887

OnPoint Release 5.3

December 2013 Release Notes - Web Version

E! = Key Enhancement

E=Enhancement

B=Bug Fix

Registration (OPREG)

Location/Functional Area	Type	Summary	Details	
OPREG	B	Phrase keys in Get code pages were hard coded	OPReg get code pages were not fully supporting languages; corrected.	7913
OPREG	B	OPReg mistakenly validating on user email and not solely user login	OPReg mistakenly validating on user email and not solely user login; corrected.	7764
OPREG	B	Option to show username and password without Reg code	Provide option to show username and password with or without Reg code for self reg user. This allows self registration to the LMS without involving a mobile registration code which may not be appropriate.	7104
OPREG	E	OPReg registrations set user's preferred language to language of package selected	OPReg registrations will now set user's preferred language to language of package provided to the user.	7052

Performance Manager (OPPM)

Location/Functional Area	Type	Summary	Details	
OPPM - User Details	E	Add a "None" option when assigning shared devices	The 'Add User' Wizard now lets the PM elect to NOT assign the user to a Shared Device when proceeding through the wizard steps by selecting a 'None' option. Previously, this step was required.	7631
OPPM - User Details	E	Selecting Enter in the Group name text box now generates search	When a search term is entered and then the Enter / Return key is pressed in the Group name field a search did not occur; this function has been added.	8499
OPPM - User Details	B	Text within OPPM new user wizard updated	Text within OPPM new user wizard updated to differentiate between primary group and additional group assignments.	7675
OPPM - User Details	E	Add a "None" option for job codes in new user wizard	Add a "None" option to New User wizard when assigning job codes. Previously you were forced to select a job code.	7630
OPPM - User Details	B	Improved Add User wizard location tree	Add User wizard was displaying broken links for location hierarchy; corrected.	7602
OPPM - User Details - Assignments	B	Reset user's Activity Status now deletes previously uploaded files	Resetting user's Activity Status now deletes any previously uploaded activity files.	8362
OPPM - User Details - Reset Password	E	Reset Password function now automatically makes user active	Resetting a user's password in OPPM will automatically make the user active again.	8344
OPPM - Pending	E	Pending Activity tab has new Status filter and automatic filtering	The Pending Activity completions section has been properly updated to default to showing Activities with a status of "Participated" and allow the Performance Manager to filter for other statuses to view. Now shows all Statuses: Pending, Completed, Participated, and All. Defaults to Participated	8366
OPPM - Pending	E	Pending Tab now includes My Media uploads	A new function has been added to the Pending Items tab in Performance Manager for My Media uploads. A Performance Manager can access uploaded My Media files from their users and view or delete them. Previously this function was only available in Course Manager.	7961

OnPoint Release 5.3

December 2013 Release Notes - Web Version

E! = Key Enhancement

E=Enhancement

B=Bug Fix

Location/Functional Area	Type	Summary	Details	
OPPM - Pending	E	Updated group drop-down list on Pending tab	The group drop-down list on Pending tab should include an all groups option; added.	7708
