

OnPoint Release 5.6

May 2015 Release Notes - Web

E! = Key Enhancement

E=Enhancement

B=Bug Fix

Yellow highlight indicates a Feature Guide is being written and will be available by 6/10/15.

| Portal (OPPortal)/Custom UI | | | | |
|-----------------------------|---------------------|--|---|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| OPPortal - My Profile | Bug | Email address incorrectly indicating that it is invalid | Valid email address incorrectly indicating that it is invalid when profile prompt is turned on in OPPortal on first login; corrected. | LMS-5218 |
| OPPortal - My Profile | Bug | Profile prompt on first login had issue when user hit Save | Correction made to the Profile prompt on first login to prevent white screen from appearing upon save. | LMS-5173 |
| OPPortal - Logout | Bug | Logout redirect not properly redirecting | Redirect on Logout not properly redirecting to set URL; corrected. | LMS-5235 |
| OPPortal - Announcements | E | New Announcements scurl | Add in new CustomUI call for Custom Portal to request announcements in order to display in portal. | LMS-5150 |
| OPPortal - Notifications | E | New Notifications scurl | Add in new CustomUI call for Custom Portal to request notifications in order to display in portal. | LMS-5151 |
| OPPortal - Search | Bug | Search showing items from Inactive Group Catalog | Returning items From inactive Group Catalog in Search (Standard & CustomUI), corrected. | LMS-4682 |
| OPPortal - Custom UI Lists | Issue | Events in Hierarchical lists not properly restricting by Catalog | Events in CustomUiGetHierarchy call not being restricted by catalog availability; corrected. | LMS-5120 |
| OPPortal - Custom UI Lists | Issue | Unassigned Activities appearing in the Custom UI lists | Unassigned activities are appearing in the CustomUiGetHierarchy call; corrected. | LMS-5119 |
| OPPortal - Custom UI Lists | Bug | Publishing without a mobile version caused content to drop off lists | Publishing courses and test sets without a mobile version removes them from the CustomUiGetHierarchy call. Corrected to ensure that the publish process is not removing items from the hierarchy call incorrectly. | LMS-5100 |
| OPPortal - Custom UI Lists | Issue | Display Hierarchy incorrectly assigning content twice | If a User is assigned to two Groups, both assigned to a hierarchy node, the CustomUiGetHierarchy call sends the same content assigned twice. Corrected. | LMS-5153 |
| OPPortal - Custom UI Lists | Bug | Custom Uis showing inactive items | Custom UI call returns inactive items. Portal updated to improve filtering by Status. | LMS-4950 |
| OPPortal - Hierarchy | New Feature! | New Hierarchy feature for Custom UI Portals | Introduce new Hierarchy call for Custom UI Portals in the same fashion as OPMGW (Mobile Gateway). This feature enables OnPoint and its customers to more easily manipulate heirarchical or "nested" lists within a custom portal -- without the need for hard-coding interface pages. | LMS-4550 |
| OPPortal - Assignments | Bug | Self-assigned content marked as required versus optional | CustomUiLauncher: Content self-assigned through this method sets the content as required (instead of optional), corrected. | LMS-4339 |

Course Manager (OPCM)

| Location/Functional Area | Type | Summary | Details | |
|---|-------|--|---|--------------------------|
| OPCM - Home - Pending | Bug | Transcoded Files pop-up has layout issues | Transcoded Files pop-up has layout issues; corrected. | LMS-4863 |
| OPCM - Home - Pending | E | Update "Actions" with radio buttons instead of checkboxes | Update 'Actions' to use radio buttons instead of checkboxes in Pending Request pages for 'Approve/Deny' type selections. | LMS-4805 |
| OPCM - Home - Notifications | E | Remove Transcoded file notifications | Transcoded file system notifications need to auto remove after 30 days. | LMS-4775 |
| OPCM - Home - Notifications | E | WebEx session creation issues need to indicate what event the session was being created for | WebEx session creation failure issues need to indicate what event the session was being created for. Updated. | LMS-4453 |
| OPCM - Home page or Users & Groups - Users & Managers - Assignments | E | Add back button for Activity View/Download File page | Need a back button for Activity's "View/Download File" page; back button added. When viewing a file that was uploaded as part of an Activity request, it was hard to get back to the User Record you were launching the view from. | LMS-4873 |
| OPCM - Users & Groups - Announcements | Bug | Cancelling "Add Announcement" creates "UNDEFINED" announcement | Cancelling out of "Add Announcement" still creates an "UNDEFINED" announcement; corrected. | LMS-5126 |
| OPCM - Users & Groups - Users & Managers - Assignments | Bug | Updating an assignment status for a user changes the access_ends time | Updating a course/nugget/assessment set status for a user changes the access_ends time to midnight; corrected. | LMS-4843 |
| OPCM - Users & Groups - Users & Managers - Management | Issue | Mentored Users filters inconsistent | Mentored Users filter page inconsistent with the other filter pages; corrected. | LMS-4768 |
| OPCM - Users & Groups - Users & Managers - Management | Issue | Deleting an RM/GM mentor should delete the mentee / mentor group | Deletion of an Reporting Manager/Group Manager mentor does not delete the mentee / mentor group; corrected. | LMS-4752 |
| OPCM - Users & Groups - Users & Managers - Management | Bug | Filter on user Management tab resets versus applies | When in the filter field on the user Management tab, pressing enter resets the filter instead of applying it appropriately; corrected. | LMS-4749 |
| OPCM - Users & Groups - Users & Managers - Management | Bug | Apply Button & Broom icon for Job Codes Filter not working | The Apply Button and the Broom icon for Job Codes Filter are non-functional in Management tab; corrected. | LMS-4741 |
| OPCM - Users & Groups | Issue | When assigning a skill profile to a user or group, completion status of already assigned / completed content needs to be checked | Assigning a skill profile to a user or group of users needs to check completion status of already assigned / completed content to provide appropriate status of the skill profile. This is a high performance activity and therefore had to be managed in the background. | LMS-5036 |
| OPCM - Users & Groups - Users & Managers | Bug | Duplicate Clear-Date icon | Duplicate Clear-Date icon shown in Assignment Status Change; corrected. | LMS-4808 |
| OPCM - Users & Groups - Organization Chart | E | Assign Manager displays Users and Managers | Orgchart Assign Manager function displays both Users and Managers; corrected to only show managers as possible options. | LMS-4364 |
| OPCM - Users & Groups - Users & Managers - Competency Matrix | Bug | Incorrect headers for skills in competency matrix | Incorrect headers for skills in users' competency matrix; corrected. | LMS-4886 |
| OPCM - Users & Groups - Organization Chart | Bug | Return to List does not return admin to expanded list | In Organization Chart, the 'List' button does not return the admin to the expanded list; corrected. | LMS-4867 |
| OPCM - Users & Groups - Users - Notes | Issue | Added ability for root and site admins to edit / modify user Notes | Only the author of the Notes in a user's record could edit the note; RAs can't modify/censor. Added the ability for RA and SA to edit / modify notes in the user's Notes tab. | LMS-4927 |

Course Manager (OPCM) - Cont.

| Location/Functional Area | Type | Summary | Details | |
|--|-------|--|---|--------------------------|
| OPCM - Users & Groups - Users & Managers - Management | Bug | Not restricting Job Code lists appropriately | Not restricting the Job Code lists when a Site Admin has managed job codes; corrected. Lists should be filtered to just include those job codes that the admin has managed job code permissions to see. | LMS-4854 |
| OPCM - Users & Groups - Users & Managers - Assignments | E | Added access ends field on the status view page of nuggets and assessment sets | Added the access ends field and availability dates on the status view page of nuggets and assessment sets for managers view to be consistent with Courses. | LMS-4602 |
| OPCM - Users & Groups - Users & Managers - Management | E! | Control the management of Job Codes | New feature that allows managers and admins to be restricted to seeing just those job codes they have management permissions to see. | LMS-4504 |
| OPCM - Users & Groups - Users & Managers | E | User Filters should allow view and rights to all roles below logged in administrator | User Filters should allow view and rights to all roles below them when viewing/editing user records; updated. | LMS-4539 |
| OPCM - Users & Groups - Users & Managers | Bug | Problem adding new Performance Managers if the administrator license pool was full | Correction in early v5.6 release prevented adding new Performance Managers if the administrator license pool was full. These two sets of admin accounts were incorrectly linked; corrected. | LMS-5189 |
| OPCM - Users & Groups - Users & Managers - Assignments | Bug | Duplicate "Clear the Date" icons in Skill Profile Status window | Duplicate "Clear the Date" icons in Skill Profile Status window; corrected. | LMS-4971 |
| OPCM - Users & Groups - Users & Managers - Assignments | Issue | xAPI Statements within user's assignment status updated | xAPI Statements found within user's assignment status are updated to show only the XAPI statements for that course for that specific user. | LMS-4998 |
| OPCM - Users & Groups - Users & Managers | Bug | Prevent manual creation of user through OPCM with a duplicate login | Correction was made to prevent creation of user through OPCM with a duplicate login. An error message was being shown, but dismissing the error allowed the administrator to move forward with creating the duplicate account. This has been corrected. | LMS-5103 |
| OPCM - Content - Courses, Nuggets | Bug! | Repair the Update Status button for non-scorm courses and nuggets | The Update Status button for non-scorm courses and nuggets changes Incompletes to Not Attempted; corrected. | LMS-5091 |
| OPCM - Content - Triggers & Notifications | Bug | Allowed writing a 160 Character SMS message | System allowed writing a 160 Character SMS message but only 140 Characters are sent. SMS fields are now correctly limiting input to 140 characters. | LMS-4958 |
| OPCM - Content - Wizards | Issue | Remove Impatica 4 from asset creation and wizards | Remove reference to Impatica 4 process from asset creation and wizards. Impatica 4 is no longer being supported with current browsers. | LMS-5140 |
| OPCM - Content - Wizards - Assessment Wizard | Bug | Problems with sequencing if question is created via the wizard | Sequencing doesn't work for end users if a sequencing question is created via the assessment wizard; corrected. | LMS-4949 |
| OPCM - Content - Wizards - Assessment Wizard | Issue | In the test wizard, the Cancel button deletes the question | In the test wizard, the Cancel button in Question Creation/Edit deletes the question you were trying to edit; corrected. | LMS-4947 |
| OPCM - Content - Wizards - Assessment Wizard | Bug | In the test wizard, creating a question with no defined answers cant be edited | In the test wizard, creating a question with no defined answers prevents the admin from going back and adding answers; corrected. | LMS-4946 |
| OPCM - Content - Wizards - Assessment Wizard | Issue | In the test wizard, answer display options ignore question type | When adding questions in the test wizard, answer display options ignore question type; corrected. | LMS-4941 |

Course Manager (OPCM) - Cont.

| Location/Functional Area | Type | Summary | Details | |
|--|---------------------|---|---|--------------------------|
| OPCM - Content | E | Object Recertification now retains historical user answer data | Recertification of course, nugget, testset should retain historical user_answer data for viewing/reporting purposes. Previously, when an object recertified, only the title, data and test score were retained. | LMS-5223 |
| OPCM - Content - Courses - Glossary | Issue | Global glossary terms not being saved | Global glossary terms created course-side are not being saved in the global glossary; corrected. | LMS-4929 |
| OPCM - Content - Wizards - Content Wizard | Bug | Selecting no file types in the Content Wizard causing error | Selecting no file types for upload in the Content Wizard was causing error on save; corrected. | LMS-4920 |
| OPCM - Content - Wizards | Bug | Nugget Wizard does not set page type to Epub | Nugget Wizard does not set page type to Epub when creating an Epub Nugget; corrected. | LMS-4983 |
| OPCM - Content | Bug | Default Start and Finish Notification configs not populating on new content | Default Start Notification and Default Finish Notification configurations not properly being picked up on newly created content; corrected. | LMS-5134 |
| OPCM - Content - Courses - Advanced | Bug | User Comments and User Rating placement inconsistent | The User Comments field and User Ratings fields were not consistent in their placement between the Settings screen and the Edit screen for Courses; corrected. | LMS-4834 |
| OPCM - Content - Wizards - Content Wizard | Bug | Unable to select a thumbnail in Wizard | Unable to select existing thumbnails in Nugget/Course Wizard; corrected. | LMS-4710 |
| OPCM - Content - Nuggets | Bug | Epub nuggets not properly updating when replaced | Epub nuggets are not properly showing updates in OPCV when replaced in OPCM; corrected. | LMS-4815 |
| OPCM - Content - Nuggets | Bug | User list on Nugget Assign Users page is not alphabetical | Available Users list on Content: Nugget Assign Users page is not sorted alphabetically; corrected. | LMS-4801 |
| OPCM - Content - Nuggets | E | Move Auto Archive function | Move Auto Archive function to Advanced tab for Nuggets. | LMS-4266 |
| OPCM - Content - Courses | Bug | Deep links for SCORM courses not properly being created | Deep links for SCORM courses were not properly being created to work successfully when using a deep link to launch a SCORM course; corrected. | LMS-5132 |
| OPCM - Content - Courses - Information | Bug | Changes to course Availability dates are not saved | Changes to course Availability dates are not saved; corrected. | LMS-4884 |
| OPCM - Content - Advanced | Bug | Content Thumbnail Image Library does not scroll properly when many meta-tags are assigned | Content Thumbnail Image Library does not scroll properly when many meta-tags are assigned. The Meta Tags and Thumbnails have now been changed to separate tabs to correct for this. | LMS-4882 |
| OPCM - Content - Nuggets and Events | Issue | Reorder subtabs for Nuggets and Events | Switch the order of the Triggers and Advanced subtabs on Nugget and Event View pages to be consistent. | LMS-4647 |
| OPCM - Content - Courses | E | Support SCORM course creation with filenames with apostrophes | Update to allow for SCORM course creation with included filenames with apostrophes. | LMS-4513 |
| OPCM - Content - Courses - Assignments | Issue | Assigning topic to course returns admin to course screen | Assigning a topic to a course returns Admin to course screen; corrected. | LMS-4643 |
| OPCM - Content - Courses, Nuggets - Advanced | New Feature! | New flag to set when an assignment must have Wi-Fi signal to download | New flag at object level to set when an assignment should be restricted to mobile download to Wi-Fi only. [Default setting is to allow outside of Wi-Fi, or No restriction.] Author typically determines this based on file size. If flag is set to Y, the user will be prompted that WiFi is required in order to download the file. | LMS-4868 |

Course Manager (OPCM) - Cont.

| Location/Functional Area | Type | Summary | Details | |
|--|---------------------|--|---|--------------------------|
| OPCM - Content - Wizards - Assessment Wizard | Bug | Changing the Question Type in the test wizard can cause answer type to not match question type | Changing the Question Type in the test wizard can cause answer type to not match question type. Disabled the ability to change the question type once selected. | LMS-5000 |
| OPCM - Content - Various - Triggers | Issue | Recertify Trigger Notification created/sent for inactive assignments | Recertify Trigger Notification was still created and sent for inactive assignments; corrected. Recertification should not take place for Inactive assignments. | LMS-4699 |
| OPCM - Content - Assets | Bug | When creating an empty HTML asset file, specified filename is changed to blank | When creating an empty HTML asset file for editing on the server later, the specified filename gets changed to blank; corrected. | LMS-5163 |
| OPCM - Content - Nuggets | Bug | IE Compatibility is not set to default value when using the Add Nugget button | IE Compatibility is not set to default value when using the Add Nugget button to create a nugget; corrected. | LMS-5017 |
| OPCM - Content - Nuggets | E | Nugget status view date/time format inconsistent | Nugget status view date and time formatting is inconsistent with course view; corrected. | LMS-4600 |
| OPCM - Assessments | Bug | Repair User filters when assigning users to an assessment set | User filters not working properly when assigning users to an assessment set; corrected. | LMS-5204 |
| OPCM - Assessments | Bug | Estimated Duration for testset showing minutes as seconds | Estimated Duration for testset is showing minutes as seconds; corrected. | LMS-5035 |
| OPCM - Assessments - Tests | Bug | New test questions have default category | When inside a test and adding new questions, the new questions were added with the default Category setting instead of assuming the specific category of the test being created; corrected to honor the category of the test you are adding the questions to. | LMS-4620 |
| OPCM - Assessments - Tests | Bug | Tests with a sequencing question display an error | If a test has a sequencing question, the Preview w/Answers screen will display an error; corrected. | LMS-4951 |
| OPCM - Assessments - Tests | New Feature! | New survey-style tests allow users to provide survey feedback from the new Ratings tab | Added support to allow survey style "optional" tests that can be associated with any course, nugget, event, or activity, to allow users to provide additional survey feedback from the new Ratings tab in OPCV. For example, a course may have a normal test or knowledge check, but you may want to also ask the user to rate whether they thought the course was useful to them or helpful to others. The exercise would typically go along with the user's rating of the course, so it can be accessed from a new Ratings tab in Content Viewer, allowing the user to come back to perform this course rating and survey at a later date if desired. | LMS-5217 |
| OPCM - Assessments - Tests | Bug | Preview shows wrong question number | Question preview showing incorrect question number; corrected. | LMS-5001 |
| OPCM - Assessment Sets - Assign link | Bug | Entering / exiting filter screen adds user to assessment set | Entering and exiting the filter screen without clicking the Assign/Unassign button adds selected user to an assessment set; corrected, so Admin must click that button first. | LMS-4630 |
| OPCM - Assessments - Assessment Sets | Bug | Assessment sets can be set as their own prerequisites | Assessment sets can be set as their own prerequisites; corrected. | LMS-4962 |
| OPCM - Assessments - Tests | Bug | Cancelling from "Copy As" page in a test returns Error | Cancelling out of "Copy As" page in a test returns an HTTP 400 Error; corrected. | LMS-4739 |
| OPCM - Assessments - Tests | Issue | Typo on test information page | Typo on test information page; corrected. | LMS-5116 |
| OPCM - Assessments - Review Feedback | Bug | Essay responses missing in feedback detail | Essay responses missing in feedback detail; corrected in Review Feedback. | LMS-4940 |

Course Manager (OPCM) - Cont.

| Location/Functional Area | Type | Summary | Details | |
|---|---------------------|---|---|--------------------------|
| OPCM - Assessments - Questions | Bug | Unable to remove assets from question | Unable to remove assets from a question; corrected. | LMS-4521 |
| OPCM - Assessments - Questions | Bug | Several question list filter combinations cause an error/blank page | Several question list filter combinations cause an error/blank page; corrected. | LMS-4948 |
| OPCM - Assessments - Questions | Bug | Improve how we handle special characters in answers | Correction to earlier 5.6 release: security update to better deal with special characters in answers. Process created to update answers in database to standard format as part of the 5.6 updates. | LMS-5192 |
| OPCM - Assessments - Tests - Assignments | Bug | Test question assign filter not working | When assigning a question to a test, the filter doesn't filter available questions; corrected. | LMS-4664 |
| OPCM - Assessments | Bug | System was setting the number of questions in question sets to 0 vs 99 | Update to early v5.6 release caused system to incorrectly set the number of questions in each question set to 0 on newly created tests. Default number of questions in new sets is now properly set to 99. | LMS-5186 |
| OPCM - Various - Courses, Nuggets & Assessment Sets | New Feature! | New Due Date fields | Support for Due Date functionality at the individual course, nugget, assessment level. | LMS-4898 |
| OPCM - Various | Bug | Update Date/time not correctly reflecting when an object is updated | Date/time of object update not reflected correctly on information pages of some object types; corrected. | LMS-4889 |
| OPCM - Various | Bug | Page numbering displayed in List pages needed mending | Filtered lists now show appropriate number of items in the pages. | LMS-4861 |
| OPCM - Various lists | Bug | Duplicating the users when Admin has managed job codes | Administrators granted group management rights see replicated users when assigning content; corrected. | LMS-4853 |
| OPCM - Various lists | Bug | Showing no Job Codes when an Admin has no managed job codes; should have been all | Showing no Job Codes when a Site Admin has no managed job codes. Corrected so that Site and Root Admins see all Job Codes if none are set up as managed. | LMS-4852 |
| OPCM - Various lists | Bug | Filtering lists by category & status = All causes error | Filtering lists by category & status = all causes a 404 error. Corrected on the following affected lists: test list, skill profile list, event list, activity list. | LMS-5097 |
| OPCM - Various | E | Add 'clear' functionality to date input fields | Add 'clear' functionality to date input fields across all objects. | LMS-4606 |
| OPCM - Various | Bug | Catalog Default not applied when creating new object | Catalog Default parameter is not enforced when creating a new event, assessment set and skill profile. If Catalog Default was set to No to not show in the catalog, all new objects were being set to Yes; corrected. | LMS-4545 |
| OPCM - Skills & Games - Skill Profiles | Bug | Not properly creating deep link for Skill Profiles | Not properly creating a deep link for Skill Profiles; corrected. | LMS-5056 |
| OPCM - Skill & Games - Skill Profiles - Assignments | E | Add "Assigned to" information to skill profiles | Add "Assigned to" information to the Assignments tab of skill profiles, to be consistent with other object types. | LMS-4776 |
| OPCM - Skills & Games - Games | Issue | Widen scroll window in game achievement area | Scroll window in game achievement window is too small; corrected. | LMS-5206 |
| OPCM - Skills & Games - Game Profiles - Assignments | Bug | Update the Game Assign pop up filters to handle apostrophes | Updated the Filters in the Game Object Assign pop ups to handle apostrophes. | LMS-4698 |
| OPCM - Skills & Games - Games | E | Filters added to Game Associated Objects page | Additional filters added to Game Associated Objects page. | LMS-4468 |
| OPCM - Skills & Games - Skills | E | Marking an item as delete request or inactive updates Skill status as well | Marking a Course / Nugget / Etc as delete request or inactive should also reflect that status at the Skill Level. Updated. | LMS-4420 |

Course Manager (OPCM) - Cont.

| Location/Functional Area | Type | Summary | Details | |
|---|-----------------------------|--|---|--------------------------|
| OPCM - Events & Activities - Events - Classes | E | Cancelled event sessions need a collapse / expand option | Cancelled event sessions need a collapse / expand option and should default to collapsed; enhanced. | LMS-5084 |
| OPCM - Events & Activities - Events | Issue | Event recertification process is not resetting "complete date" | Event recertification process is not resetting "complete date" upon event recertification; corrected. | LMS-5147 |
| OPCM - Events & Activities - Events | New Optional Module! | Support for Adobe Connect webinars | Added support for Adobe Connect webinars through the LMS. This new (optional) module will be similar to OnPoint's existing WebEx module where administrators can create webinars inside Adobe Connect from the OnPoint LMS, Users can join an Adobe Connect webinar from inside or outside of the LMS, and Adobe Connect will send information back to OnPoint after the webinar is over as to who attended and for how long. Module price: \$1,500 | |
| OPCM - Events & Activities - Event Session Wizard | Bug | Registration start / end period not created correctly by wizard | Registration start / end period was not being created correctly by event session wizard; corrected. | LMS-5069 |
| OPCM - Events & Activities - Events | Bug | Event session date is reset if the event location is selected after the date | Correction to the Event Session creation process to prevent the event session date from being reset if the event location is selected after setting the date. | LMS-5137 |
| OPCM - Events & Activities - Instructor-Led - Assignments | Bug | Groups in Events - Assignments area not listed in alpha order | Available Groups in Events User Assignment are not listed in alphabetical order; corrected. | LMS-4911 |
| OPCM - Events & Activities - Events | Bug | Ical attachment was not correctly attached to Event Session Triggers | Ical attachment was not correctly attached to Event Session Triggers in the initial v5.6 release due to changes to the email / notification cron processes; corrected. | LMS-5199 |
| OPCM - Events & Activities - Events | Bug | Deep link urls for Events not being correctly created | Deep link urls for Events were not being correctly created. Corrected. | LMS-5060 |
| OPCM - Events & Activities - Master Event Calendar | Bug | Event session tooltip on the calendar showing an incorrect number of registrations | Event session tooltip on the calendar showing an incorrect number of registrations; corrected. | LMS-4895 |
| OPCM - Events & Activities - Activities | E | Add basic HTML support for activities | Add basic HTML support for Activity Descriptions. [No editor, but allows html to be entered.] | LMS-4772 |
| OPCM - Events & Activities - Master Event Calendar | Issue | Event Location filter updated | Event Location filter now includes child locations of the parent location when filtering. | LMS-4765 |
| OPCM - Events & Activities - Activities | Bug | Deep links for Activities not correctly being created | Deep links for Activities were not correctly being created; corrected. | LMS-5059 |
| OPCM - Events & Activities - Master Event Calendar | E | Location dropdown in Filter updated to better display | Location dropdown in Master Event Calendar Filter should display the location hierarchy in a better way. Improved. | LMS-4688 |
| OPCM - Events & Activities - ILT and Webinars | Issue | New event Description and Synopsis fields updated | When creating a new event, both the Description and Synopsis fields have 'tabs' already in them and shouldn't have; corrected. | LMS-4680 |
| OPCM - Events & Activities - Master Event Calendar | E | Master Calendar printout should include Filter data | Print Master Calendar now includes Filter data on printout. | LMS-4678 |
| OPCM - Events & Activities - ILT and Webinars | Bug | Timezone format displayed incorrectly for ILT Events | Timezone format displayed incorrectly for ILT Events; corrected. | LMS-4701 |
| OPCM - Events - Wizards | Bug | Time Zone and WebEx Host not shown in the WebEx Session list | Time Zone and WebEx Host not shown in the WebEx Session list when creating a WebEx session through the Event Session Wizard; corrected. | LMS-4976 |

Course Manager (OPCM) - Cont.

| Location/Functional Area | Type | Summary | Details | |
|---|-------|--|--|--------------------------|
| OPCM - Events & Activities - Events - Classes | E | Class Session lists can be configured to show in ascending or descending order | Session list under each class can now be configured to show ascending or descending order to Admins. | LMS-5058 |
| OPCM - Events & Activities - Activities - Information | Bug | Unable to update activity thumbnail | Unable to update activity thumbnail; corrected. | LMS-4795 |
| OPCM - Events - Events Locations, Event Sessions | Issue | Custom field validation issues | Custom field validation doesn't work for locations and event sessions; corrected. | LMS-4848 |
| OPCM - Events - Wizards | Bug | Not showing Instructor name when creating an ILT session in the Wizard | Not showing the Instructor name in event view when creating an ILT session in the Wizard; corrected. | LMS-4993 |
| OPCM - Events - Wizards | Issue | WebEx Host Dropdown in Event Session Wizard contains all instructors | WebEx Host Dropdown in Event Session Wizard contains all instructors. Corrected to only show WebEx instructors. | LMS-4989 |
| OPCM - Events | E | Update recertify_event table to include session location and session date and time | Update recertify_event table to include session location along with session date and time; now captured. | LMS-5083 |
| OPCM - Events & Activities - Activities | Issue | Activity due date timestamps preventing users from accessing activities | Activity due date timestamps are preventing users from accessing activities on the actual date due; corrected. | LMS-5005 |
| OPCM - Notifications | Bug | Applying a filter to a notifications list deletes selected notifications | Applying a filter to a notifications list deletes selected notifications when notifications are selected and then the filter function is opened. Corrected. | LMS-5081 |
| OPCM - Notifications - Notification Queue | Bug | Notification queue list totals are incorrect | Notification queue list totals are incorrect; corrected. | LMS-5074 |
| OPCM - Notifications - Forums | Bug | Displaying incorrect user names for forum post replies | Course Manager was not displaying the right user names for users' reply posts in forums; corrected. | LMS-4878 |
| OPCM - Notifications - Forums | Bug | Forum replies on OPCM show the original post's timestamp | Forum replies on OPCM show the original post's timestamp instead of their own timestamp; corrected. | LMS-4822 |
| OPCM - Notifications - Notification Queue | Bug | Item Type not properly appearing | Item Type was not properly appearing in the notification queue; corrected. | LMS-4871 |
| OPCM - Notifications - Send Notifications | Bug | Not restricting Group list appropriately in "Notification: Send to Group" | Not restricting the Group list in "Notification: Send to Group" when logged in as a Site Admin; corrected. List should be filtered to just include those groups that the admin has managed group permissions to see. | LMS-4855 |
| OPCM - Notifications | E | Email Queue should have a 'Select All' for deleting | Email Queue, under Notifications, needed a 'Select All' option for selecting all emails to Delete; added. | LMS-5162 |
| OPCM - Notifications - Send Notifications - Various | Bug | Sending Standard Notification when "Send as" check box unchecked | Still Sending Standard Notification when the "Send as" check box is unchecked; corrected. | LMS-4662 |
| OPCM - Notifications - Notification Queue | Bug | Error when Setting User filter to "by User ID =" | Returning HTTP 404 Error when Setting User filter to "by User ID =" in Notification Queue; corrected. | LMS-4890 |
| OPCM - Notifications - Notification Queue | Bug | When a user is unassigned from an object - reminder emails are removed | When a user is unassigned from a specific object - all reminder emails associated with that object are now immediately removed when the user is unassigned from the object. | LMS-4258 |

Course Manager (OPCM) - Cont.

| Location/Functional Area | Type | Summary | Details | |
|---|---------------------|--|---|--------------------------|
| OPCM - Notifications - Notification Queue | Bug | Slooce response not saved correctly | Slooce response on successful sms message is not being saved to the system correctly; corrected. | LMS-4959 |
| OPCM - Notifications - Send Notifications | E | Add Location filter option | Add Location filter option in Send Notifications for Event Assignees. | LMS-4689 |
| OPCM - Notifications - Email Queue | Bug | Clicking the "Next" button in Email Queue resets the filter | Clicking the "Next" button in Email Queue resets the filter, preventing the admin from viewing the next page; corrected. | LMS-5200 |
| OPCM - Notifications | New Feature! | Mobile Push Notification support | Mobile Push Notification support has been added as a selection option (like email and SMS) for all triggered and one-off notifications. Push Notifications allow messaging to go to the user's mobile device, to be received by the device but outside of the CellCast app. | LMS-5065 |
| OPCM - Notifications | Bug | Notifications ignoring completion status filters | When sending a notification to nuggets or skill profile assignees, completion status filters were ignored. Corrected. | LMS-5070 |
| OPCM - Administration - Display Hierarchy | Bug | Moving objects within display nodes changes sequence number | Moving objects within display nodes changes sequence number by 15 each time; corrected. | LMS-5055 |
| OPCM - Administration - Deletion Tasks | Issue | Skill Profile deletion process needs to remove stray skills links | When deleting a Skill Profile, the process left stray links to skills; corrected. | LMS-5042 |
| OPCM - Administration - Configuration | E | Add config value to turn on / off Recertification options | Add in configuration value for Customer to turn on / off Recertification options. | LMS-5016 |
| OPCM - Administration - Publish | Bug | Problem with advanced filter on the batch course publish page | Applying an advanced filter on the batch course publish page publishes instead; corrected. | LMS-5002 |
| OPCM - Administration - Display Hierarchy | New Feature! | Add new skill profile node type for Hierarchy | Add in a new node type for Hierarchy for Skill Profile Nodes. This allows an entire skill profile, including its sequencing, to be included as a node in a custom UI hierarchical (or nested) list. | LMS-5115 |
| OPCM - Administration - Configuration - Customer - CellCast | New Feature! | Add in new Sync_delay config value for CellCast | Add in new Sync_delay config value for CellCast and send down to apps in environment. The Sync Delay value provides the time out period for which to perform a sync when a user goes in and out of the app. | LMS-5141 |
| OPCM - Administration - Display Hierarchy | Bug | Display node arrow buttons for object reordering are stacking | Display node arrow buttons for object reordering are stacking when there's a long name in the list; corrected. | LMS-4999 |
| OPCM - Administration - Publish | Bug | Error when publishing nuggets through bulk publish administration pages | Error when trying to publish nuggets through bulk publish administration pages; corrected. | LMS-4972 |
| OPCM - Administration - Categories | Issue | If a category is changed to inactive, it doesn't appear yellow in the list | If a category is set to inactive, it doesn't appear as yellow in the list; corrected. | LMS-4954 |
| OPCM - Administration - Categories | Bug | Category Delete issue | Categories set to Delete are not being moved to pending delete request; corrected. | LMS-4934 |
| OPCM - Administration - Categories | Bug | Choosing a default category doesn't set default for all object types | Choosing a category as a default doesn't set the default for all object types; corrected. | LMS-4840 |

| Course Manager (OPCM) - Cont. | | | | |
|--|-------------|--|--|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| OPCM - Administration - Configuration - Course Manager | Issue | Center not showing value represented in the database | Unable to save customer WebEx settings to "type" of WebEx Center; corrected. | LMS-4792 |
| OPCM - Administration - Content Authors | Issue | Possible to create Author with no name, impossible to select/delete | It is possible to create an Author with no name, impossible to select/delete; corrected. | LMS-4712 |
| OPCM - Administration - Content Authors | Issue | Accented characters not handled well in the Author name field | Accented characters not handled well in the Author name field; corrected. | LMS-4711 |
| OPCM - Administration - Deletion Tasks | E | More filters in Course/Nugget deletion area | Add full / more robust filtering to Course / Nugget deletion process to assist Admins in narrowing down the specific items they want to delete, and not inadvertently deleting things they don't. | LMS-4636 |
| OPCM - Administration - Configuration - Portal | Issue | Configuration item "Failed login Attempts" should have "Zero=unlimited" removed | The instructions within the configuration item "Failed login Attempts" should have the phrase "Zero=unlimited" removed; corrected phrasing to make it more clear. | LMS-4622 |
| OPCM - Administration - Configuration - Customer - OPCM - Gamification | E! | Add configuration parameters for default aggregator points | Add configuration parameters for default aggregator points for all object types. | LMS-4593 |
| OPCM - Home page or Users & Groups - Users & Managers - Assignments | E | Add back button for Activity View/Download File page | Need a back button for Activity's "View/Download File" page; back button added. When viewing a file that was uploaded as part of an Activity request, it was hard to get back to the User Record you were launching the view from. | LMS-4873 |
| OPCM - Administration - Configuration - Customer - OPCM - Gamification | E! | Add configuration parameters for default aggregator points | Add configuration parameters for default aggregator points for all object types. | LMS-4539 |
| OPCM - Content - Courses - Glossary | Issue | Global glossary terms not being saved | Global glossary terms created course-side are not being saved in the global glossary; corrected. | LMS-4929 |
| Content Viewer (OPCV) | | | | |
| Location/Functional Area | Type | Summary | Details | |
| OPCV - Messages - Notifications | Bug | Assessment Notifications not going out when triggered | Assessment Notifications not going out when triggered; corrected. | LMS-5062 |
| OPCV - Custom UI assignments | Bug | Self-assigned nuggets and assessment sets created with approved=No | Self-assigned nuggets and assessment sets are being created with approved=No; corrected. | LMS-5046 |
| OPCV - SCORM content | Issue | Update to deal with special characters when tracked in lesson location and suspend data | Update to deal with specific special characters when tracked in lesson location and suspend data. Lesson location had not previously had this type of character and caused the bookmarking within a SCORM course to not properly be recorded; corrected. | LMS-5203 |
| OPCV - Assignments list and My Status | Bug | Correct issues when exiting assignments and completion status not being properly recorded for the user | Correction to issues when exiting assignments and completion status not being properly recorded for the user. Present in early 5.6 releases and may have also been popping up intermittently in 5.4. | LMS-5195 |
| OPCV - Catalog Search | Bug | Problem with single quotes in search strings | Single quotes in search strings in OPCV create MySQLSyntaxErrors; corrected. | LMS-4598 |

Content Viewer (OPCV) - Con't

| Location/Functional Area | Type | Summary | Details | |
|---------------------------------------|-------|---|--|--------------------------|
| OPCV - Catalog - Search | Issue | Problem with '%' character in search | Entering a '%' character into the search bar generates a 404 error; corrected. | LMS-4793 |
| OPCV - Content player | E | Update course Page drop down to accommodate longer course names | Update to Course Page drop down (navigation) view to accommodate for longer course names. | LMS-5094 |
| OPCV - Content player | Bug | Cannot scroll to the "Finish Test" Button | Cannot scroll to the "Finish Test" Button on tests with more than 7 questions; corrected. | LMS-4573 |
| OPCV - Content player | Bug | Page navigation box opening behind content | Page navigation/selection drop-down in the content player is opening the drop-down behind the content instead of in front of it, due to Flash content; corrected. | LMS-4787 |
| OPCV - Tests | Bug | Repair horizontal likert question layout | The first question in horizontal likert questions is not lining up; corrected. | LMS-4482 |
| OPCV - Various | Bug | Showing items from Inactive group catalogs | Showing items from Inactive group catalogs in Catalog pages; corrected. | LMS-4683 |
| OPCV - Various | Bug | Update 'keep alive' function to ensure pagetime and access history are tracked and closed | Updates to the 'keep alive' function to ensure that pagetime and access history are being accurately tracked and closed. Previous access history was sometimes being closed incorrectly before the user had exited the assignment. | LMS-5242 |
| OPCV - Various - all assignment lists | E! | New Due Date functionality | New Due Date functionality adds dates on OPCV assignment lists that show users when an assignment is due. | LMS-4905 |
| OPCV - Events | E | Center location selection button on Event Catalog | Move the location selection button on Event Catalog to appear directly above the calendar more prominently and clear. | LMS-5250 |
| OPCV - Events | Bug | User prompt to set a default location not occurring | No prompt to the user to set their default location was occurring when the configuration was set to require a default event location be set by each user. Corrected. | LMS-5187 |
| OPCV - Events - Register for Event | Issue | Remove radio button to choose session on event register page when User Select Sessions = No | Event register page should not have radio button to choose session when User Select Sessions = No; corrected. | LMS-5073 |
| OPCV - Events - Webinar join link | Issue | Time window for event joining not displayed properly | Time window for online event joining not being displayed properly; corrected. Message had been hardcoded to 15 minutes, and should have reflected the actual time set at the object level. | LMS-4896 |
| OPCV - Events - Registered Events | E | Registered event Calendar updates | Update to Registered Event calendar to display (Event_name + Class Name) for assigned event sessions. | LMS-4697 |
| OPCV - Events - Event Catalog | E | Add Default value "Show past sessions" button | Add Configuration Default value for OPCV "Show past sessions" button on Event Catalog. Options are to show, or not to show. | LMS-4526 |
| OPCV - Events - Event Catalog | E | Open Event Catalog to user's default location? | Added ability to launch the Event Catalog and pass in location filter values. | LMS-4372 |

Content Viewer (OPCV) - Con't

| Location/Functional Area | Type | Summary | Details | |
|--|---------------------|--|---|--------------------------|
| OPCV - Events - Event Catalog | E | New multi-select options on default location page | Added multi-select options to the default Location filter on Event Catalog. | LMS-4317 |
| OPCV - Events - Event Catalog | E! | New Event Prerequisites at session level | New Event Prerequisites added to prevent users from being signed up for event sessions if prerequisites have not been met. | LMS-3196 |
| OPCV - Forums | Bug | Forum Posts not abiding by set up | Not requiring manager's approval for forum post entries when forum is set up to be moderated; corrected. | LMS-4791 |
| OPCV - Forums | Bug | Forum posts inadvertently forcing approval | System was requiring approval for edited forum posts when forums were set up as 'not moderated'; corrected. | LMS-4879 |
| OPCV - Forums | Bug | Forum replies show the original post's timestamp | Forum replies show the original post's timestamp instead of the timestamp of the reply; corrected. | LMS-4821 |
| OPCV - Games | Bug | Assessment Sets are still accessible in expired games when accessed through the game | Assessment Sets are still accessible in expired games when accessed through the game; corrected. You should be able to open a Finished game, but not click on anything. | LMS-4831 |
| OPCV - Games - Leaderboards | Bug | Correction to game leaderboard calculations with acceleration points | Correction to game leaderboard calculations when acceleration points were involved. | LMS-5006 |
| OPCV - Games - Leaderboards - Challenge List | Bug | Challenge List displays all peers | Challenge List displays all peers, not just the ones challenged/challenged by; corrected. | LMS-5209 |
| OPCV - Games - Leaderboards | Bug | IE 8, 9, & 10 browsers won't load when adding users to Challenge List | IE 8, 9, & 10 browsers unable to add users into Challenge List in Game Leaderboards; corrected. | LMS-4992 |
| OPCV - Games - Leaderboards | E! | Can now specify which leaderboards to show in a game | OPCV game leaderboards can now show just those selected leaderboards for each game. | LMS-4653 |
| OPCV - Ratings (new) | New Feature! | New Ratings tab for assignment rating and optional surveys | Added new Ratings tab for rating assignments and completing optional surveys for completed items within the configured time period. | LMS-5216 |
| OPCV - Ratings (new) | New Feature! | Can now rate events and activities | Added support for rating events and activities. Rating action must occur on the new ratings tab. | LMS-5230 |

Document Manager (OPDOC)

| Location/Functional Area | Type | Summary | Details | |
|--------------------------|------|---|---|--------------------------|
| OPDOC | Bug | OPDOC Cache is getting stuck | OPDOC Cache is getting stuck and must be cleared for new documents to show in Mobile OPDOC; corrected. | LMS-5139 |
| OPDOC | Bug | Search returning different results between online and mobile OPDOC | Search returning different results between online and mobile OPDOC due to inherited manager permissions. Corrections to the search results when documents are found within the Performance Manager inherited nodes. | LMS-5114 |
| OPDOC | Bug | Support for Inherited Manager Permissions in Mobile OPDOC | Update to provide support for Inherited Manager Permissions in Mobile OPDOC | LMS-5108 |
| OPDOC | Bug | Unable to Create/Upload document if a document has restricted permissions | Unable to Create/Upload document in a node if there is a document with restricted permissions. Corrected. | LMS-5093 |

| Document Manager (OPDOC) Cont. | | | | |
|--------------------------------|--------------|--|--|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| OPDOC | Bug | Inherited nodes should only show documents created by managed users | Inherited nodes should only show documents created by managed users. Corrections to documents shown in inherited nodes. | LMS-5061 |
| OPDOC | Issue | Updates to OPDOC nodes are not always refreshing | Updates to OPDOC nodes are not always reflected without individual browser cache clearing; corrected. | LMS-4974 |
| OPDOC | E | Update to allow Search by Video File Type | Updated Advanced Search to allow users to search for the Video File Type. | LMS-4728 |
| eCommerce (OPEC) | | | | |
| Location/Functional Area | Type | Summary | Details | |
| None | | | | |
| Contacts Directory (OP-Dir) | | | | |
| Location/Functional Area | Type | Summary | Details | |
| OPDIRECTORY | E | Add Contacts Directory configuration for Show Active or All | Add Contacts Directory configuration for Show Active or All. | LMS-4549 |
| Registration (OPREG) | | | | |
| Location/Functional Area | Type | Summary | Details | |
| OPREG | E | Pass field values from mini site into Reg form | Provide method to pass field values from a mini-site into an OP-Reg self registration form on url to launch self registration page. | LMS-5157 |
| OPREG | New Feature! | Create a new Shared Device Reg Code package | Update to OPREG to create a new shared Device Registration Code Package. | LMS-4471 |
| Performance Manager (OPPM) | | | | |
| Location/Functional Area | Type | Summary | Details | |
| OPPM | E | Remove unused tabs from Dashboard | Remove unused tabs from Dashboard when using only Org Unit - Dynamically based on management type. | LMS-5233 |
| OPPM | Bug | Dashboard not handling a large number of users in Display by User | Issue in OPPM where the Dashboard is not handling a large number of users in Display by User when logged in as an Org Manager; corrected. | LMS-5227 |
| OPPM | E! | Restrict dashboard and User Details view options to managed options only | Restrict dashboard and User Details view options to managed options only. If a PM only manages group or org chart, then do not show the other options. | LMS-5214 |
| OPPM | E | Add Location filter to top of page wherever event sessions are displayed | Add Location filter to top of page wherever event sessions are displayed for assignment purposes. | LMS-5136 |
| OPPM | New Feature! | Allow GMs to define Due Date | Update Group Assignment to allow GMs to define Due Date as assignment is made. | LMS-5130 |
| OPPM | E | Allow PM to view prior completions | Create Clickable links in user's assignments to access previous recertified completions. | LMS-5125 |
| OPPM | E! | Allow PM to edit the due date of an assignment for a user they manage | Create clickable links in user's assignments tab to edit the due date of an assignment for that user. | LMS-5098 |
| OPPM | New Feature | Honor config value for Recertification options | Adhere to config value for Customer to turn on / off Recertification options. | LMS-5052 |
| OPPM | E | Don't allow PMs to assign Catalogs | Remove Assign link from Groups - Assignments - Group Catalogs | LMS-5051 |

| Performance Manager (OPPM) - Con't | | | | |
|------------------------------------|--------------|--|---|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| OPPM | E! | Restrict available assignable content by OPPM flag and assigned Group catalogs per user | Restrict available assignable content by OPPM flag and assigned Group catalogs per user. | LMS-5049 |
| OPPM | Issue | Improve user game points "waterfall" | User game points "waterfall" in OPPM appearing incorrectly, corrected. | LMS-4995 |
| OPPM | E | User filter enhancements | OPPM advanced user filter enhancements: adding email filter field and button images. | LMS-4981 |
| OPPM | Issue | Using Last Name filter opens Add User/User Edit page | Firefox and IE: typing into Last Name filter and pressing enter opens Add User/User Edit page; corrected. | LMS-4980 |
| OPPM | E | Add Organization and Login ID search filters | Add Organization and Login ID search filters to the in-line filters. | LMS-4979 |
| OPPM | Issue | Added the ability for RA / SA roles to edit / modify notes in the user's Notes tab | Only the author of the notes in a user's record can edit the note, RAs can't modify/censor. Added the ability for RA and SA to edit / modify notes in the user's Notes tab. | LMS-4977 |
| OPPM | Bug | Last Completion column shows wrong completion date | Last Completion column on OPPM User Assignment Details page shows the wrong completion date; corrected. | LMS-4973 |
| OPPM | Bug | Answers missing in graphs under the test results tab | If a manager/admin has managed groups, no answers appear in the graphs under the test results tab; corrected. | LMS-4945 |
| OPPM | Bug | User update history only shows OPCM-side changes | User update history only shows OPCM-side changes, OPPM not appearing; corrected. | LMS-4936 |
| OPPM | Bug | Displaying incorrect timestamp and User names for reply posts | Not displaying the correct timestamp and User names for reply posts in Forums; corrected. | LMS-4916 |
| OPPM | Bug | "Approve" button not functional in Group Forums | "Approve" button not functional in Group Forums; corrected. | LMS-4915 |
| OPPM | Bug | Duplicating dashboard record for events | Duplicating the dashboard record for events when events have multiple classes; corrected. | LMS-4913 |
| OPPM | Bug | Unable to Open Group Forums | Unable to Open Group Forums; corrected. | LMS-4910 |
| OPPM | Bug | Error when searching User by ID in Groups tab | Returning HTTP 500 Error when Searching User by ID in Groups tab; corrected. | LMS-4909 |
| OPPM | E! | Support for Due Date functionality in OPPM | Support for Due Date functionality in OPPM | LMS-4906 |
| OPPM | New Feature! | Allow PMs to see Shared Device assignments and GMs to assign and unassign a user to/from a Shared Device | Allow Performance Managers to see managed users Shared Device assignments and Group Managers are allowed to assign and unassign a user to or from a Shared Device. | LMS-4902 |
| OPPM | Bug | Showing wrong users in user's Membership page | Showing manager's mentored users in user's Membership page instead of user's mentors; corrected. | LMS-4887 |
| OPPM | Bug | "Assign" links not lined up properly | "Assign" links not lined up properly; display corrected. | LMS-4875 |
| OPPM | Bug | Pending event requests only appear for the first group | Pending event requests only appear for the first group in the list of managed groups; corrected. | LMS-4858 |

| Performance Manager (OPPM) - Con't | | | | |
|------------------------------------|--------------|--|---|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| OPPM | New Feature! | Restrict SA's to only see groups, categories of content, and Job Codes they have rights to | Update OPPM to restrict SA's to only see groups, categories of content, and Job Codes that they have rights to view. | LMS-4850 |
| OPPM | Bug | Display by Job Code Dashboard subtab showing incorrect Job Code in filter | Display by Job Code Dashboard subtab was not showing the correct Job Code in the filter when selected; corrected. | LMS-4847 |
| OPPM | Issue | Formatting causing incorrect wrapping | Formatting incorrect on Pending Event Registration Requests page causing incorrect wrapping; corrected. | LMS-4819 |
| OPPM | Bug | Managers cannot approve/deny event registration requests | Managers cannot approve/deny event registration requests in OPPM; corrected. | LMS-4818 |
| OPPM | Issue | Default activity status should be 'Pending' | Default activity status should be 'Pending' on pending approval page; corrected. | LMS-4816 |
| OPPM | Bug | Status missing in User Details pop-up | Status is not shown in User Details pop-up in Pending event requests view; corrected. | LMS-4802 |
| OPPM | E! | New management restriction of selected Job Codes | Added support for management restriction of selected Job Codes through OPCM - Users & Managers - Management tab, which now take effect in OPPM. | LMS-4748 |
| OPPM | Bug | Not displaying Game Thumbnails | Not displaying Game Thumbnails in Game Profiles in OPPM; corrected. | LMS-4702 |
| OPPM | Bug | Completed assessments via View Button opens blank popup | Evaluations Tab - Viewing Completed Assessments via View Button opens Blank Popup; corrected. | LMS-4693 |
| OPPM | New Feature! | Provide GM access to archive and unarchive assignments | Update OPPM to provide GM access to archive and unarchive assignments. | LMS-4685 |
| OPPM | Issue | Possible to simultaneously approve and deny nugget requests | Possible to simultaneously approve and deny nugget requests; corrected. | LMS-4672 |
| OPPM | Issue | Job codes showing up as groups | Job codes showing up as groups in OPPM; corrected. | LMS-4660 |
| OPPM | Bug | Update filter to properly handle apostrophes | Update the filter to properly handle apostrophes in the Group page. | LMS-4633 |
| OPPM | Bug | Updated Course - Page information | Updated Course - Page information to properly show created / updated information. | LMS-4565 |
| OPPM | Bug | Showing "null" for the user name | Showing "null" for the user name in "Deleted Requested by" Corrected. | LMS-4564 |
| OPPM | Bug | User Name and Email not displayed | User Name and Email not displayed in Job Code Assignments page; corrected. | LMS-4563 |
| OPPM | Issue | Inactive/deleted tests appearing in test list | Inactive/deleted tests still appearing in the OPPM test list; corrected. | LMS-4881 |

| OPLS-Cron | | | | |
|---------------------------------|-------------|--|--|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| OPLSCRON | E | Update Auto Recertification to include session location and date/time | Update Auto Recertification to include session location and session date/time in recertified event data. | LMS-5111 |
| OPLSCRON | Bug | Correction to prevent removal of authorization token for users that have not accessed the system in x number of days | Correction to prevent removal of authorization token for users that have not accessed the system in x number of days. Deletion of authorization token caused users to have to reauthenticate even when the customer was not set to require authentication. | LMS-5106 |
| OPLSCRON | Bug | Automatic Recertification process for events was faulty | Automatic Recertification process for events was not properly running and recertifying events. Corrected. | LMS-5101 |
| OPLSCRON | E | Enhancements to the WebEx get participants call | Enhancements to the WebEx get participants call to prevent connection issues with WebEx; corrected. | LMS-4932 |
| OP-Common | | | | |
| Location/Functional Area | Type | Summary | Details | |
| OPCOMMON | E! | Update Skill Profile assignment process to skip the completion check for users that had no new assignments | Update Skill Profile assignment process to skip the completion check for users that had no new assignments as part of skill profile assignment. This provides faster processes for the skill profile assignment process while still ensuring that previous completions are checked when appropriate. | LMS-5236 |
| OPCOMMON | Bug | MCMA phrase in Test Result View not displayed properly | MCMA phrase in Test Result View not being displayed properly in IE; corrected. | LMS-4562 |
| Mobile Apps | | | | |
| Location/Functional Area | Type | Summary | Details | |
| CellCast - Mobile SCORM | E | Updated SCORM 2004 interactions support in the gateway | Updated the SCORM 2004 interactions support in the gateway, so the mobile Apps could better handle and record the SCORM 2004 interactions. | |
| Android | Bug | Provide Activity information to the Custom UI | Activities are not supplied to the UI in SyncChange; corrected. | MOB-3974 |
| Android | Bug | If content is already complete and then revisited the provisionally complete icon remains | Correction to the Android app to ensure that reaccessing content correctly leaves the completed status icon. | MOB-3865 |
| Android | Bug | Library2 call is being made after libraryhash call is made and returning same hash | Update to prevent unnecessary library call in the Android App. | MOB-3851 |
| Android | Bug | CellCast for Android not able to launch Event calendar when selecting 'Events' button | Additional support added for launching into the Event Catalog from the Custom UI using the standard event catalog SCURL. | MOB-3835 |
| Android | Bug | Change Interface button not working in CellCast with multi-UI User | Corrected support for the SCURL method to log out of one UI in order to switch to a different one in a Multi UI situation. | MOB-3826 |
| Android | Bug | A file request is still made for a branding file with id=0 | Correction to the Android application to prevent unnecessary image file requests if specified image file has zero filesize. | MOB-3741 |

| Mobile Apps- Con't | | | | |
|--------------------------|-------------|---|--|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| Android | Bug | Users game points not appearing properly in the Master Leaderboard | The users' game points are not appearing in the Master Leaderboard when displaying vertically on an android phone. If you flip the phone to horizontal and refresh, the points appear (but not consistently), but if you flip the phone back to vertical and refresh, it hides the points. Width and padding in Master Leaderboard were updated in Android app to correct. | MOB-3722 |
| Android | Bug | Android app is ordering questions by question ID rather than order displayed in gateway | Correction to question order in tests in Android app. App was previously ordering questions by the question id instead of the sequence passed to the app from the gateway. | MOB-3687 |
| Android | Enhancement | Support mailto: and tel: links in Custom UI | Update to the Android app to support mailto and tel links within various places within the app along with proper error messaging when these functions are not allowed. | MOB-3845 |
| Android | Enhancement | QR app download should direct to Play store | If the Android device does not have a QR reader installed, the app is directing the user to download the app from the Amazon store. Instead the App should direct the user to download an appropriate QR reader from the Play store. Update to Android app to properly take users to the Google Play store when needing to install a QR reader. | MOB-3796 |
| Android | Enhancement | Finalize xAPI downloading and playing on Android | Updated support for xAPI download of content and playback in the Android app. | MOB-3701 |
| Android | Enhancement | Support for Due Date functionality in Mobile Apps - Android | Added support for the new Due Date functionality in the native UI with this value available to the Custom UI. (See 3670 above for detail.) | MOB-3664 |
| Android | Enhancement | Implement new Hierarchy opmgw call with supporting UI scurl support | Support to retrieve the Hierarchy data and provide to the Custom UI for organizing the content in the UI. (See 3660 above for detail.) | MOB-3658 |
| Android | Enhancement | Support for content marked wifi only in Mobile Devices - Android | Added support for "Wi-Fi only" assignments. This flag alerts the user if they attempt to download content over their data connection instead of Wi-Fi. Assignment must be marked as Wi-Fi only in OPCM. (See 3628 above for detail.) | MOB-3626 |
| Android | Enhancement | Avatar upload process should NOT prompt user to create title and description for avatar | Update to the Avatar upload process to streamline the steps and remove the prompt for a title and description when creating / uploading the avatar image. (See 3622 above for detail.) | MOB-3621 |
| Android | Enhancement | Add support for new SCURL: Opening external URLs in the device's default browser | Add additional scurl support to launch an external url in the device's browser instead of the browser in the app. The new scurl would be a way for the UI to pass an external URL to the native app with the intent for the URL to be opened on mobile Safari proper. | MOB-3545 |
| Android | Enhancement | Thumbnail files should only be downloaded once | Update to Andriod app to only download thumbnail files once when reused in content. (See 3367 above for detail.) | MOB-3367 |

| Mobile Apps- Con't | | | | |
|--------------------------|--------------------|--|---|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| Android | Issue | Nexus 7 (2013) not classified as a tablet | Correction to properly recognize specific larger format Android devices as Android Tablets instead of Android smartphones. | MOB-3685 |
| Android | Issue | Notes and other additions to PDFs are saved, but later overridden by redownload of content | When viewing a PDF, the user can draw and make notes on the PDF itself. When they exist, these changes are saved. Trying to re-access the PDF will cause it to redownload and overwrite the stored copy. Corrected an issue where saved notes were being overwritten if the content was redownloaded. | MOB-3639 |
| Android | New Feature | Implement new Syncchange method for syncing | Application updated to provide support for the new Syncchange functionality that provides a delta sync and faster communication to the servers. | MOB-3770 |
| Android | New Feature | Utilize new date format language entry for all date / time displays | Update the native app to display all dates in the specified language specific date format. (See 3763 above for detail.) | MOB-3760 |
| Android | New Feature | Update To using Assessment information from the sync2 section for object | App updated to utilize new test section in data to allow for reuse of a given test across multiple objects while still retaining unique responses and attempts per assignment. (See 3683 above for detail.) | MOB-3678 |
| Android | New Feature | Offline xAPI support - Android | Implement offline xAPI support. PUT requests should be stored individually and be able to be retrieved by the course storing them. PUTs with the same UUID should overwrite one another. They should be relayed to the xAPI Endpoint when syncing. GET requests should retrieve any values stored by PUT requests or retrieve the current from the xAPI endpoint when online (and when there are no pending offline values). POST requests should be relayed to the xAPI Endpoint when syncing. Summary: Introduced Offline xAPI course support where the statements are stored locally until the user reconnects to a network and the results can then be passed to the server or LRS. | MOB-3516 |
| BB 10 | Bug | Video does not auto play when NOT resuming | If you access a video on the BB10 app and then exit and then attempt to launch again, but say NO to the prompt to start where you left off, the video does not auto play. Correction to the resume function in BB10 for Video content. If the user starts the video over from the beginning, the video should auto play. | MOB-3442 |
| BB 10 | E | Not updating status correctly when completing SCORM course and exiting before taking attached test | When taking a scorm course with an attached test, if you complete the scorm course and exit before taking the test, the status of the course remains as "Not Attempted" even though it is recording the access history and scorm course scores. Update to BB10 app to properly update the status of a SCORM course with an attached OPLS test. | MOB-3363 |
| BB 10 | Enhancement | Avatar upload process should NOT prompt user to create title and description for avatar | When the create / record avatar function is utilized, the process should not prompt the user to add a title and description to the avatar image. Simply allow the user to take their picture and upload it. When the user has uploaded their avatar then show the current message that the file is being uploaded or has been uploaded to the server. Update to the Avatar upload process to streamline the steps and remove the prompt for a title and description when creating / uploading the avatar image. | MOB-3622 |

| Mobile Apps- Con't | | | | |
|--------------------------|-------------|--|--|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| BB 10 | Enhancement | Thumbnail files should only be downloaded once | When a thumbnail file is reused by multiple assignments, it should only be downloaded once. As the apps simply request the thumb for each assignment by assignment id, the apps need to review for any duplicate filenames prior to requesting the thumbnails. Summary: Correction to BB10 app to only download thumbnail files once when reused in content. | MOB-3368 |
| BB 10 | Enhancement | SCORM access must always load the most recent saved data | Update to BB10 to ensure that the most recently recorded SCORM data is always provided to the app when launched to accommodate for offline SCORM access. | MOB-3290 |
| BB 10 | Enhancement | Mobile Support for SCORM 1.2 Interactions | SCORM interactions allows for a next level of tracking for SCORM 1.2 courses that implement features known as Objectives and Interactions. These interactions allow for SCORM 1.2 courses to track not only bookmarking and test scores, but also to record the questions and answers provided by an individual user when taking a test within the SCORM course. The interactions should be passed up along with the pagetime and scorm call to ensure that all relevant data is on the server and up to date when completion is checked. The SCORM call should be the last call made by the app. Summary: Added support for SCORM interactions in SCORM 1.2 in the BB10 app. | MOB-3189 |
| BB 10 | Enhancement | Mobile Support for SCORM 2004 Interactions | SCORM allows for a next level of tracking for SCORM 2004 courses that implement features known as Objectives and Interactions. These interactions allow for SCORM 2004 courses to track not only bookmarking and test scores, but also to record the questions and answers provided by an individual user when taking a test within the SCORM course. OnPoint currently only supports this in SCORM 2004, but will be introducing it into SCORM 1.2 in the future. The interactions should be passed up along with the pagetime and scorm call to ensure that all relevant data is on the server and up to date when completion is checked. The SCORM call should be the last call made by the app. Summary: Added mobile support for SCORM 2004 Interactions. | MOB-2812 |
| iPad | Bug | Crash occurring if the user attempts to access a bookmark too quickly | If user tries to access a bookmark too quickly, the app crashes and (if the user is using sync2) content is wiped. Too quickly being less than a second between opening the bookmarks menu and selecting a bookmark. When the app restarts, only that nugget will remain on the device, and a full sync is required to redownload the other content. Corrected. | MOB-3989 |
| iPad | Bug | Incorrect totaling of incomplete assignments | Incorrect totaling of incomplete assignments in native UI; corrected. | MOB-3868 |
| iPad | Bug | Language call is being made too often | Updates to the iPad app to remove extraneous language calls. | MOB-3854 |
| iPad | Bug | With multi-UI User, updated UIs are getting sent down to device in gateway, but re-syncing iPad within UI does not download updated UI | With multi-UI User, updated UIs are getting sent down to device in gateway, but re-syncing iPad within UI does not download updated UI; corrected. | MOB-3827 |

| Mobile Apps- Con't | | | | |
|--------------------------|------|---|---|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| iPad | Bug | Launching Storyline Courses back to back on iPad sometimes causing CellCast to freeze | Updates added to better deal with large SCORM courses and memory issues occurring when launching several large SCORM courses back to back. | MOB-3799 |
| iPad | Bug | iPad crashing with QR codes less than 8 characters instead of prompting that it's an invalid reg code | When attempting to register with a QR code number that is less than 8 characters, the iPad app crashes instead of prompting that it's an invalid reg code; corrected. | MOB-3793 |
| iPad | Bug | iPad app crashing when viewing Announcement in portrait mode | When trying to view an Announcement, only when holding the iPad in portrait mode, the app crashes. Corrected. | MOB-3789 |
| iPad | Bug | When the last question in a test set is type: "fillin," iPad sends up incorrect data for answer | Correction to iPad app to correct for an issue that occurred if the last question in a test was a fill-in question type. Issue caused the fill-in response not to be passed to the server or be recorded. | MOB-3766 |
| iPad | Bug | If shortcut_id equals 0, app still makes getfile call for the shortcutthumbnail (iPad) | Correction to the iPad app to prevent unnecessary request for thumbnail for UI if user has no UI. | MOB-3729 |
| iPad | Bug | If an answer to a true-false question is too long, it will appear incorrectly | If an answer to a true-false question is too long, it will appear incorrectly on the device. The bottom half of the text will be missing, and it won't automatically resize the text box. Correction to the display of specific answer text when provided answer is too long. | MOB-3692 |
| iPad | Bug | Adding print functionality for single-page pdfs broke it for multi-page pdfs | Updated support to ensure that the print function is actionable for a single page pdf file. Unfortunately this appears to have broken printing for multi-page pdfs, which does not have have the distinct print button. | MOB-3647 |
| iPad | Bug | "Accept Eula" Phrase is displayed as the phrase key after one user logs into a shared device | After one user accepts EULA and logs into a shared device, the "Accept Eula" phrase is displayed as the phrase key "eula_accept". Correction to show the correct phrase for subsequent user first logins on a shared device. | MOB-3592 |
| iPad | Bug | The sync list download prompt doesn't show up | When using Multiple UIs, the registration and sync process should prompt and show the message "do you want to download these files....." When in a multi UI situation, the prompt is not appearing and instead the files are just automatically downloading in the background. Correction to iPad when in multi UI / Multi User modes that was not properly showing the download prompt for all users when appropriate. | MOB-3577 |
| iPad | Bug | iOS 7 is cutting off UIs on the right side of UI | Correction to the display of the UI in IOS 7 devices that was causing the right hand side of the UI to get cut off in portrait orientation. | MOB-3564 |
| iPad | Bug | Custom UI access to Notifications and Announcements does not provide a back button | When the notifications or announcements are accessed full screen from a custom UI, the back button in the upper left corner disappears and the user is stuck in the announcements / notifications screen. This ONLY occurs when accessing these elements from a custom UI. Correction to iPad build to show the appropriate back button when exiting notifications or announcements pages from a custom UI. | MOB-3552 |

| Mobile Apps- Con't | | | | |
|--------------------------|-------------|---|--|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| iPad | Bug | Force quitting and restarting the App does not prompt user to enter password | When "Mobile Password Prompt" is set to "Y" in Configuration on OPCM, if you force quit the App and restart it, it does not prompt user to enter password. Correction to iPad app to properly prompt the user for their password when the app is restarted and configs are set to force password on restart. | MOB-3404 |
| iPad | E | App must display Back button within PDF viewer for all pages other than page 1 | Introduced added support for pdf pagination and properly displaying the back button when on appropriate secondary pages in the pdf. | MOB-3348 |
| iPad | Enhancement | Support for Due Date functionality in Mobile Apps - iPad | Added support for the new Due Date functionality in the native UI with this value available to the Custom UI. (See 3670 above for detail.) | MOB-3666 |
| iPad | Enhancement | Mobile Support for openbook assessments - iPad | Support for Open Book assessment style tests in mobile (see 3655 above for detail). | MOB-3651 |
| iPad | Enhancement | Support for content marked Wi-Fi only in Mobile Devices - iPad | Specific Courses or Nuggets can now be marked as downloadable over Wi-Fi - Yes or No. This flag alerts the user if they attempt to download content over their data connection instead of Wi-Fi. (See 3628 above for detail.) | MOB-3627 |
| iPad | Enhancement | Avatar upload process should NOT prompt user to create title and description for avatar | Update to the Avatar upload process to streamline the steps and remove the prompt for a title and description when creating / uploading the avatar image. (See 3622 above for detail.) | MOB-3619 |
| iPad | Enhancement | Support for LMS_finish exit of SCORM content - iPad | Updates to the apps to capture and action the exit function from a SCORM course to close the course window, record the SCORM data, and send the user back to the previous page. | MOB-3600 |
| iPad | Enhancement | Implement an animated loading icon while UIs are loading | When a UI is being loaded, the loading icon needs to appear to indicate to the user that the UI is loading. This is especially important when using multi UI as the switching between the UIs can take a little time. Update to the iPad interface to show a loading image while large UIs are loading in the app. | MOB-3553 |
| iPad | Enhancement | Add support for new SCURL: Opening external URLs in the device's default browser | Add additional scurl support to launch an external url in the device's browser instead of the browser in the app. The new scurl would be a way for the UI to pass an external URL to the native app with the intent for the URL to be opened on mobile Safari proper. | MOB-3543 |
| iPad | Issue | On iPad, when hitting the back button to get out of Scorm Courses, app sometimes stalls/crashes | When launching a Scorm Course on the latest build of CellCast for iPhone: the app frequently stalls out when hitting the back button. Updated Memory Management to prevent the iPad app from crashing when exiting larger SCORM courses. | MOB-3861 |
| iPad | Issue | Show changes to hierarchy properly | Update to iPad app to ensure that changes to the hierarchy are properly reflected in the app on the subsequent sync. | MOB-3780 |
| iPad | Issue | Users able to bypass PINs for shared devices | Corrected an issue where users on a shared device could bypass the pin prompt by cancelling out of the process at the right time. | MOB-3779 |

| Mobile Apps- Con't | | | | |
|--------------------------|--------------------|---|--|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| iPad | Issue | Pdf nuggets are not fitting the width of the screen on iPad iOS8 | Updates to the sizing of pdf nuggets to better fit the width of the available screen on all devices. Seems to be an issue with the initial zoom. | MOB-3686 |
| iPad | Issue | The incorrect number of messages is being displayed under message count | A recent change was made to only send down notifications in the gateway from the last 30 days. This is not reflected in the message total on the device however, which displays the total number of notifications, not just the number sent down to the device. Correction to the iPhone app to show the correct number of messages in the message total stored on the device in the native app. | MOB-3637 |
| iPad | Issue | iPad app crashing after going in and out of content quickly | Multi-ui iPad issue, where the app is crashing after going in and out of content quickly. The app gets "stuck" and the user has to hard close the app, reenter choosing a different UI, and then resync to be able to use the first UI again. Correction to iPad app to better handle movement in and out of multiple large pieces of content in quick succession. | MOB-3562 |
| iPad | Issue | Apostrophe within Test Title is not handled properly | When a test title includes an apostrophe, the characters are not rendered properly within the app. Update to iPad app to gracefully deal with apostrophes within a test title. | MOB-3529 |
| iPad | New Feature | Implement new Syncchange method for syncing | Application updated to provide support for the new Syncchange functionality that provides a delta sync and faster communication to the servers. | MOB-3771 |
| iPad | New Feature | Support for Push notifications and Syncitem | Support for new Push notifications functionality. [See 3749 above for detail.] | MOB-3746 |
| iPad | New Feature | Update To using Assessment information from the sync2 section for object | App updated to utilize new test section in data to allow for reuse of a given test across multiple objects while still retaining unique responses and attempts per assignment. (See 3683 above for detail.) | MOB-3680 |
| iPad | New Feature | Implement new SCURL to launch users into OPDoc mobile | Introduction of a new method to launch a user from a custom UI into OPDoc Mobile. | MOB-3412 |
| iPhone | Bug | Selecting 'Challenge Peer' under Challenge Leaderboard crashes CellCast | Update to iPhone app to prevent a crash that occurred when attempting to select a peer to challenge in the Challenge Leaderboard. | MOB-3964 |
| iPhone | Bug | If a user registers to a native UI, adding a UI will retain the native header | Updates to iPhone app to better handle the process when the registered user is supplied a new Custom UI when there was none previously. | MOB-3963 |
| iPhone | Bug | Acceleration points get cropped out of view under Master Leaderboard | Update to iPhone game leaderboard view to better accommodate for Acceleration points when the earned game points was at least 3 digits. The points were being cut off of the view. | MOB-3960 |
| iPhone | Bug | When app is put in the background and comes back, UI is lost after sync intermittently | Corrections to prevent an issue that occurred when the app was put into the background and then brought to the foreground with a custom UI. Specific circumstances caused the UI to not load; corrected. | MOB-3912 |
| iPhone | Bug | iPhone crashing with QR codes less than 8 characters instead of prompting that it's an invalid reg code | When attempting to register with a QR code number that is less than 8 characters, the iPhone app crashes instead of prompting that it's an invalid reg code; corrected. | MOB-3794 |

| Mobile Apps- Con't | | | |
|--------------------------|-------------|---|--|
| Location/Functional Area | Type | Summary | Details |
| iPhone | Bug | If shortcut_id equals 0, app still makes getfile call for the shortcutthumbnail | Correction to the iPhone app to prevent unnecessary request for thumbnail for UI if user has no UI. MOB-3728 |
| iPhone | Bug | User must press sync on device two times before a hierarchy call is invoked | When environment flags are dirty, user must press sync on device two separate times before a hierarchy call is invoked. Update to app to correct timing of hierarchy call. MOB-3695 |
| iPhone | Bug | If an answer to a true-false question is too long, it will appear incorrectly on the device | If an answer to a true-false question is too long, it will appear incorrectly on the device. The bottom half of the text will be missing, and it won't automatically resize the text box. Correction to the display of specific answer text when provided answer is too long. MOB-3691 |
| iPhone | Bug | Apostrophes don't appear correctly in question answers | Apostrophes appear as & apos ; (without spaces) in question answers. This applies to all question types with selectable answers. The apostrophes are appearing correctly in the gateway, so this is an app-side issue. Update to properly handle apostrophes in question answers when taking a test and within the test results. MOB-3689 |
| iPhone | Bug | Non-token to token transfer after opening an app from closed causes bad validate | Update to correct an issue that occurred when the authentication method changes while the iPhone app was asleep; corrected. MOB-3649 |
| iPhone | Bug | Changing the Push value in the settings must pass the appropriate value to the server for that user | If the user manually changes the push notification value then the appropriate value must be passed to the server. Corrections to the iPad app when turning Push notifications on or off from the app settings page. MOB-3580 |
| iPhone | Enhancement | Support for Due Date functionality in Mobile Apps - iPhone | Added support for the new Due Date functionality in the native UI with this value available to the Custom UI. (See 3670 above for detail.) MOB-3667 |
| iPhone | Enhancement | Implement new Hierarchy opmgw call with supporting UI scurl support | Support to retrieve the Hierarchy data and provide to the Custom UI for organizing the content in the UI. (See 3660 above for detail.) MOB-3656 |
| iPhone | Enhancement | Mobile Support for openbook assessments - iPhone | Support for Open Book assessment style tests in mobile (see 3655 above for detail). MOB-3652 |
| iPhone | Enhancement | Support for content marked Wi-Fi only in Mobile Devices - iPhone | Specific Courses or Nuggets can now be marked as downloadable over Wi-Fi - Yes or No. This flag alerts the user if they attempt to download content over their data connection instead of Wi-Fi. If Wi-Fi is set to Yes at the content object level (to restrict a download to Wi-Fi only), when the user attempts to access the course or nugget that has not yet been downloaded, the app should recognize if the user is on Wi-Fi or not and show the appropriate message if they are not on Wi-Fi: wifi_download_only. User will be presented with an OK button to close the message. MOB-3628 |
| iPhone | Enhancement | Avatar upload process should NOT prompt user to create title and description for avatar | Update to the Avatar upload process to streamline the steps and remove the prompt for a title and description when creating / uploading the avatar image. (See 3622 above for detail.) MOB-3620 |

| Mobile Apps- Con't | | | | |
|--------------------------|-------------|--|--|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| iPhone | Enhancement | Support for LMS_finish exit of SCORM content - iPhone | Updates to the apps to capture and action the exit function from a SCORM course to close the course window, record the SCORM data, and send the user back to the previous page. | MOB-3615 |
| iPhone | Enhancement | Add support for new SCURL: Opening external URLs in the device's default browser | Add additional scurl support to launch an external url in the device's browser instead of the browser in the app. The new scurl would be a way for the UI to pass an external URL to the native app with the intent for the URL to be opened on mobile Safari proper. | MOB-3544 |
| iPhone | Issue | No 'Connection Error' message when user tries to sync offline | iPhone app updated to show proper offline action message when user attempts to sync while offline. | MOB-3976 |
| iPhone | Issue | Activities launched from Custom UI crash app | Correction to the iPhone app to prevent a crash when trying to launch Activities from a custom UI. | MOB-3949 |
| iPhone | Issue | Pressing 'Erase Data and Resynchronize' should prompt for confirmation | App updated to prompt for confirmation of "Erase and Resync" function. | MOB-3902 |
| iPhone | Issue | Remove info button from messages and announcements | Remove info button from messages and announcements; they were not functional. | MOB-3684 |
| iPhone | Issue | Content player controls are not accessible by user (partially off-screen) | When course (Impatica) is launched, the player controls are not accessible by the user and are positioned partially off-screen. Correction to accommodate for content playback with buttons at the bottom of the screen on older iPhones. | MOB-3663 |
| iPhone | Issue | The incorrect number of messages is being displayed under message count | A recent change was made to only send down notifications in the gateway from the last 30 days. This is not reflected in the message total on the device however, which displays the total number of notifications, not just the number sent down to the device. Correction to the iPhone app to show the correct number of messages in the message total stored on the device in the native app. | MOB-3638 |
| iPhone | Issue | Apostrophe within Test Title is not handled properly | When a test title includes an apostrophe, the characters are not rendered properly within the app. Update to iPhone app to gracefully deal with apostrophes within a test title. | MOB-3526 |
| iPhone | Issue | Answer text overlays checkbox on multiple-answer question display | The space allowed for each line of answer text needs to be reduced enough so that the answer text does not overlay with the answer checkbox on multiple-answer questions. Correction to the iPhone display of Multi Choice / Multi Answer questions to prevent the answer text from overlapping the check box. | MOB-3524 |

| Mobile Apps- Con't | | | | |
|--------------------------|-------------|---|--|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| iPhone | New Feature | Implement new Syncchange method for syncing | Application updated to provide support for the new Syncchange functionality that provides a delta sync and faster communication to the servers. | MOB-3772 |
| iPhone | New Feature | Support for Push notifications and Syncitem | Push notifications are used in conjunction with the new Syncitem sync method for syncing the information for a single assignment. When a scurl is used to launch a specific piece of content, the apps should all respond in the same method by launching the app and then performing a syncitem for that single assignment ONLY. Once this syncitem is completed, then the assignment should be launched. Support for new Push notifications functionality. | MOB-3749 |
| iPhone | New Feature | Update To using Assessment information from the sync2 section for object | App updated to utilize new test section in data to allow for reuse of a given test across multiple objects while still retaining unique responses and attempts per assignment. (See 3683 above for detail.) | MOB-3681 |
| iPhone | New Feature | Implement new SCURL to launch users into OPDoc mobile | We have introduced a new SCURL that is used to launch and log a user into OPDoc mobile. Summary: Introduction of a new method to launch a user from a custom UI into OPDoc Mobile. | MOB-3417 |
| iPhone | New Feature | Updated support for Inactive Wipe value from Sync2 environment | Updated support for inactive wipe function for Windows Tablet when the app has not been used for longer than the specified / configured inactive wipe period. (See 3354 above for detail.) | MOB-3351 |
| OPAir | Bug | With multi-UI User, updated UIs are getting sent down to device in gateway, but re-syncing OPAir within UI does not download updated UI | With multi-UI User, updated UIs are getting sent down to device in gateway, but re-syncing OPAir within UI does not download updated UI; corrected. | MOB-3843 |
| OPAir | Bug | Application failing to download Updated UI | When the application has a UI provided by a non- primary group and only has one group membership - if that UI is updated, the getfile call for the shortcut leaves the ID blank and receives no ui update. This is the way that other applications handle non- primary group. (If this happens on iPad it will sync and display the new UI properly.) Update to OPAir app to properly download changed UIs when in a Multi UI setup and an update has been made to one of the UIs. | MOB-3688 |
| OPAir | Issue | SSO users cannot log into OPAir after 30+ days away from the app | Users who have not accessed the app in over 30 days cannot log in again. The SSO login page appears, but the user cannot log in again. Correction to OPAir app to correct for an issue that was preventing users from using the app without reregistering if not used for more than 30 days. | MOB-3744 |
| OPAir | New Feature | Support for background_sync environment variable | Added support to utilize a server side config value to indicate the time period delay between syncs when opening and closing the app. This allows for setting the time to allow a user to go in and out of the app without an automatic sync occurring on reentry. | MOB-3576 |

| Mobile Apps- Con't | | | | |
|--------------------------|-------------|--|--|------------------------|
| Location/Functional Area | Type | Summary | Details | |
| opmgw | Bug | If a User is Assigned to two Groups, both Assigned to a hierarchy node, the Hierarchy call sends the same content Assigned to it twice | If a User is Assigned to two Groups, and both Groups are Assigned to a hierarchy node, the hierarchy call in the gateway is sending down all content Assigned to the hierarchy node twice. Corrected. | GW-769 |
| opmgw | Bug | Inactive items are not being removed from the hierarchy call | Objects are supposed to be removed from the opmgw hierarchy call if they become unavailable to the user. If something happens to change the availability of courses, nuggets, or test sets, those objects are appropriately removed from the next instance of the call. For activities, events, categories, and games, making the objects unavailable to the user (such as through setting them inactive) has no effect; the objects continue to be included in the hierarchy call. Inactive objects should be removed from the hierarchy call. Corrected. | GW-736 |
| opmgw | Bug | Activity Completion through gateway does not fire activity completion trigger | When the activity completion comes through the gateway, the completion is being marked in the user's assignments as complete, but the process is not properly firing any Activity completion triggers. Corrected. | GW-527 |
| opmgw | Enhancement | Send suspend_data and lesson_location as base64 encoded strings | Updates to the Mobile Gateway to accommodate for encoded characters in all SCORM fields. Allows for support for most all SCORM data that works online to also be allowed on mobile, in most situations. | GW-793 |
| opmgw | Enhancement | Option at SCORM course advanced tab to indicate if mobile apps should allow SCORM exit | To go along with a mobile enhancement to allow the closing of a scorm course when lms_finish is called by the course, we need a value at the SCORM course level to indicate whether a SCORM course should support this function. Add a new flag at the SCORM course Advanced tab to set a SCORM course to NOT show the exit "X" in IOS devices. Setting this value to Close on exit = Yes will remove the X from SCORM course on IOS devices. If this is used, the SCORM course must have an appropriate method of exiting on its own, ie an exit or close button that calls lms_finish in the SCORM data. | GW-702 |
| opmgw | Enhancement | Support for Due Date functionality in gateway | New due date functionality has been introduced for Courses, Nuggets, and Assessment Sets that allows an Admin to define the due date as a fixed date or a dynamic date based on assignment date. Support for providing the Due Date value to the mobile apps for display purposes. | GW-684 |
| opmgw | Enhancement | Support for content marked Wi-Fi only in gateway | Specific Courses or Nuggets can now be marked as downloadable over Wi-Fi Yes or No. The new value set at the course and nugget level denotes whether this assignment can be downloaded over cellular or must be downloaded over Wi-Fi. | GW-673 |
| opmgw | Enhancement | Support for distinct test ids for each object to allow for an assessment to be used by multiple assignments | The Mobile apps need to accommodate a single test can be assigned to multiple nuggets / courses and accessed on the mobile apps and that attempt and score tracked independently to that assignment. Support for distinct test ids for each object to allow for an assessment to be used by multiple assignments | GW-530 |

| Mobile Apps- Con't | | | | |
|--------------------------|--------------------|--|--|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| opmgw | Issue | Page time recorded after an item has been completed must be recorded as browse time | Mobile currently is not recording browse time separate from time to completion. When a nugget or course is accessed after the item has been marked as complete, then the recorded course_page / nugget_page time should be recorded in the browse_time column and NOT in the page_time column. Correction to the process for recording pagetime of accessed content to ensure that page time recorded after an item has been completed is recorded as Browse time. | GW-791 |
| opmgw | Issue | Unassigned activities are appearing in the hierarchy call | Unavailable items should not be included in the hierarchy call. Since activities don't have a catalog, unassigned activities were never meant to appear in the call. Right now, unassigned activities are appearing in the call, causing issues in the UI. We have therefore corrected this by removing unassigned activities from the hierarchy call. | GW-743 |
| opmgw | Issue | After taking several scorm courses in offline mode, only the last one is marked complete upon sync | After taking several scorm courses in offline mode, only the last one is marked complete upon sync; corrected. | GW-726 |
| opmgw | Issue | Shortcut flag is not dirty after assigning or unassigning a nonprimary group with an assigned UI | Shortcut flag is not dirty after assigning or unassigning a nonprimary group with an assigned UI; corrected. | GW-718 |
| opmgw | New Feature | Update to Sync Functions to allow for Sync_Change and Sync_item | Updates to the Mobile Gateway to support new Sync methods for syncchange and syncitem to provide more granular delta communication and speed up the sync process as well as data communicated. | GW-636 |
| OPPush | New Feature | Introduction and Support of Mobile Push notifications | Introduction and Support of Mobile Push notifications | GW-637 |
| Win8.1 | Bug | "Save" & "Cancel" buttons overwrapped | Updates to button formatting in Windows tablet app for the Save / Cancel buttons when using the My Media functions. | MOB-3898 |
| Win8.1 | Bug | Not all texts are center aligned in some pages | Updates to Windows Tablet app to center align all text fields regardless of screen resolution. | MOB-3889 |
| Win8.1 | ER | Not Supporting Prerequisites for Assessment Sets | Correction to the Windows Tablet app to properly support assessment set prerequisites. | MOB-3801 |
| Win8.1 | Bug | When a mobile token is deleted, app does not go to SSO screen on sync | After deleting a mobile token record from mobile_token table in the database (case where user has not logged in for more than 30 days and token deletion job has run at 1st of the month), the user should be taken to an SSO login page on sync so that a new token can be issued. Instead, the device's user is not informed that authentication is invalid. Correct expired token behavior in Windows Tablet. | MOB-3792 |

| Mobile Apps- Con't | | | | |
|--------------------------|------|---|--|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| Win8.1 | Bug | WinRT is not checking for language updates | WinRT is currently not checking for if there are any changes to language. Windows tablet updated to provide better language support as well as updated language information as soon as provided by the server. | MOB-3674 |
| Win8.1 | Bug | Choosing a non-English language, accepting the EULA then closing and reopening the app loses the language | Correction to Windows Tablet app to properly handle the process of changing the selected language and closing and reopening the app in the process. | MOB-3645 |
| Win8.1 | Bug | Not showing "Device Offline" message when switching users while offline | When the device is offline, if you attempt to access games in game list it pops up a message "? ?Device Offline? ?", but if you logout & log back in as a different user, it does not display the message and you can open a blank game page. Update made to Windows Tablet to properly message the user when they are attempting to sync or perform online actions, but the app cannot communicate to the server. | MOB-3618 |
| Win8.1 | Bug | UI is not being updated for shared device users | Update to ensure that the UI is properly updated when device is setup for Shared Users and the UI for one user is updated. | MOB-3602 |
| Win8.1 | Bug | Post replies not appearing in forum view | Users can see stem posts, but any replies posted to the forum do not show on the app. Correction to show Forum Post replies in the forums view. | MOB-3601 |
| Win8.1 | Bug | Unable to take attached tests while the device is offline | When attempting to complete an item (nugget/course) with an attached test(s), the app kicked the user out after exiting from the item, when it shows "would you like to take the test now?." Correction to Windows Tablet to correct for a situation where the app would not allow a user to take a test if the user was offline. | MOB-3571 |
| Win8.1 | Bug | Multi User list must always be shown in Alphabetical order | Windows Tablet incorrectly displayed userlist in Shared Device registrations in the order provided by the server instead of alphabetical order. Corrected. | MOB-3561 |
| Win8.1 | Bug | Showing previous user's Game Profile when switching user on shared device while offline | Windows Tablet incorrectly showed the previous user's game points when switching between users on a Shared Device; corrected. | MOB-3551 |
| Win8.1 | Bug | Buttons on Active Downloads page are unresponsive | Pause, Resume, Cancel, and Cancel Pending Downloads buttons are non-responsive on the Active Downloads page. Correction to non-responsive buttons on Active Downloads page in Windows Tablet. | MOB-3503 |
| Win8.1 | Bug | When viewing an epub nugget, choosing to Clear Highlights erases the content from the screen | When viewing an epub nugget with text, choosing to Clear Highlights from the options bar on the bottom removes all of the content from the screen, replacing it with "undefined". Correction to issue when viewing an epub nugget in Windows tablet where the clear highlights also cleared the content from the page. | MOB-3501 |
| Win8.1 | Bug | Status of Assessment Sets with a test and Courses with a test are not updated automatically on the app | When completing a course with a test, the status of the course does not get update properly after a sync while in the launch page. It remains as a question mark. Updates in Windows tablet app to ensure that assessment set statuses and courses with test statuses are properly updated to reflect any updated status. | MOB-3339 |

|--------------------------|-------------|---|--|
| Location/Functional Area | Type | Summary | Details |
| Win8.1 | Enhancement | Add information phrase key above Pin entry box | We need to be able to provide a bit of instruction on the Pin entry box. Please update this box to include a phrase key above the pin entry that allows for a bit of exposition to explain what is expected here. Added additional messaging above the Pin entry field in Multi User login process on the Windows Tablet. MOB-3832 |
| Win8.1 | Enhancement | Update Windows Tablet to launch the outside browser for url type links within epubs | If an epub contains href links to launch a url with http:// or https:// then the app should launch those links in the browser that is outside of the Windows Tablet application. Windows Tablet app updated to support the launch of the device browser for url type links within epubs. MOB-3810 |
| Win8.1 | Enhancement | Finalize xAPI downloading and playing on WindowsRT | Updated support for xAPI content download and playback on Windows Tablet app. MOB-3698 |
| Win8.1 | Enhancement | Support for Due Date functionality in Mobile Apps - Win8.1 | Added support for the new Due Date functionality in the native UI with this value available to the Custom UI. (See 3670 above for detail.) MOB-3669 |
| Win8.1 | Enhancement | Implement new Hierarchy gateway call with supporting UI scurl support | There is a new item for display Hierarchy that indicates if a display hierarchy (s) is associated with the registered user. If this value is true, then the hierarchy needs to be downloaded and provided to the UI. Support to retrieve the Hierarchy data and provide to the Custom UI for organizing the content in the UI. MOB-3660 |
| Win8.1 | Enhancement | Mobile Support for openbook assessments - Win8.1 | The Question_presentation value at the assessment level has been updated to include "Mentored" to indicate to the mobile apps any assessment that has been set as "Open book assisted" in OPCM. The Open Book assessment should not allow the user to proceed to the next question until the correct response has been given. An open book assessment does not let the user go to the next question until the current question has been correctly answered. Each time an incorrect response is provided, a notification box should appear on top of the question and responses and show the incorrect remediation for that question with an OK button to return to the question and try again. The user cannot go to the next question until the correct response has been given. MOB-3655 |
| Win8.1 | Enhancement | Support for LMS_finish exit of SCORM content - Winrt | Updates to the apps to capture and action the exit function from a SCORM course to close the course window, record the SCORM data, and send the user back to the previous page. MOB-3613 |
| Win8.1 | Enhancement | Request to launch content directly from the list of skills, bypassing the content detail page | Added ability for Windows Tablet app to launch directly into content from Custom UI instead of launching to the detail page. MOB-3589 |
| Win8.1 | Enhancement | Update the MUD user list to include phrase key for further information for user. | Update the Multi User device user selection page to provide a text box with instructions as to what the user can do on this page in the Windows Tablet App. MOB-3541 |
| Win8.1 | Enhancement | Add fast-forward functionality for videos | Users cannot currently browse past parts of a video they've already seen -they must start from the beginning each time. Update to the Windows Tablet Video player to allow for fast forward and backward action functions. MOB-3520 |

Mobile Apps- Con't

| Location/Functional Area | Type | Summary | Details | |
|--------------------------|--------------------|--|--|--------------------------|
| Win8.1 | Enhancement | Multi User login should prompt each individual user to accept the EULA on first access | When the app is registered as a shared device, the EULA process should be performed for each individual user on their first login to the app through the multi user selection page. When a user selects their name for the first time, they should be presented with the EULA. The app must not allow the user to access the app if they do not accept the EULA. Failure to accept would return the user to the user list. Once accepted, the user is given access to the app. The user should NOT be prompted to accept the EULA again as long as the app is still registered to the group. Update the Multi User login process to force EULA acceptance before proceeding for each user. | MOB-3489 |
| Win8.1 | Enhancement | My Media recordings must be recorded in medium quality and compressed | Updated the Windows Tablet app to ensure that recorded My Media videos are recorded in appropriate quality (medium and compressed) settings and not HD video before being uploaded. | MOB-3150 |
| Win8.1 | Issue | Shared device PIN creation dialog is not centered on the screen. | Update to Windows Tablet Interface to center the Pin prompt in a Shared Device scenario. | MOB-3694 |
| Win8.1 | Issue | Missing phrase key at assessment set Launch button popup | If a user has already taken an assessment set, when they touch the launch button to retake it, a popup appears with the missing phrase key "testsets_finished". It's a bit confusing; it should redirect the user to touch the gray "Take" button. This is not an issue if the user has not already completed the assessment set, as the Launch button brings the user to the Launch Test page. Correction to Phrase key that was not properly being picked up in Windows Tablet for Assessment Sets. | MOB-3673 |
| Win8.1 | Issue | Epub nuggets are not updating in Win8.1 | Replacing a nugget epub asset and then republishing the nugget does not update the epub in WinRT. Instead, the original epub is always shown. Testing on Android shows that updating the nugget epub asset does replace the content as expected. Sync2 reflects the new filename of the asset. Windows Tablet was not properly updating epub nuggets when updated server side. Corrected. | MOB-3582 |
| Win8.1 | New Feature | Utilize new date format language entry for all date / time displays | Update the native app to display all dates in the specified language specific date format. (See 3763 above for detail.) | MOB-3761 |
| Win8.1 | New Feature | Update To using Assessment information from the sync2 section for object | The assessment information has been updated to include the details specific to the assessment and a user's attempt in sync2 at the individual object level. Detail information about test attempts are now passed in course, nugget testset sections so that more accurate test attempts can be recorded. This helps to accommodate for individual attempt limits on a per object basis instead of universal for that test everywhere. App updated to utilize new test section in data to allow for reuse of a given test across multiple objects while still retaining unique responses and attempts per assignment. | MOB-3683 |

|--------------------------|-------------|---|--|--------------------------|
| Location/Functional Area | Type | Summary | Details | |
| Win8.1 | New Feature | Updated support for Inactive Wipe value from Sync2 environment | Updated support for inactive wipe function for Windows Tablet when the app has not been used for longer than the specified / configured inactive wipe period. The value indicates the number of days that the app can remain inactive before wiping. The wipe action occurs on the next launch of the app after the inactive wipe period has passed. Users should NOT be able to access anything within the app after the inactive period has expired and after the wipe function the app should return to the registration entry code page. | MOB-3354 |
| WinPhone 7 / 8 | Bug | Not automotically updating UI | Windows Phone app updated to better handle the update process for a UI. Changes to the UI communicated to the app are now immediately shown to the user. | MOB-3777 |
| WinPhone 7 / 8 | Bug | Unable to upload an avatar image | When attempting to upload a profile picture, the app crashes. Correction made to the Windows Phone app to allow for the upload of an avatar image. | MOB-3739 |
| WinPhone 7 / 8 | Bug | Unable to complete activity with required file uploads | Users cannot complete an activity which requires file upload as it is not letting users upload media files. Correction to the Windows Phone app to provide proper support for uploading a file as part of the Activity completion process. | MOB-3738 |
| WinPhone 7 / 8 | Enhancement | App should exit out of Active Downloads once downloads are complete | Update to Windows Phone app to automatically exit out of Active Downloads window once the downloads have finished. | MOB-3740 |
| WinPhone 7 / 8 | Enhancement | Support for Due Date functionality in Mobile Apps - Winphone | New due date functioality has been introduced for Courses, Nuggets, and Assessment Sets that allows an admin to define the due date as a fixed date or a dynamic date based on assignment date. Mobile Apps should show the due date on the Details page of the content as well as pass this information to the Mobile UIs for use in the Custom UI. Added support for the new Due Date functionality in the native UI with this value available to the Custom UI. | MOB-3670 |
| WinPhone 7 / 8 | Enhancement | Mobile Support for Prerequisites | Added support for Prerequisites to prevent users from proceeding through content if they have not met the required prerequisites. | MOB-2959 |
| WinPhone 7 / 8 | New Feature | Utilize new date format language entry for all date / time displays | A new value has been added to the language file for a customer to denote the specific date / time display for each customer. This is the value for that language for that customer that all dates should be displayed in when shown in the native UI. This value should also be added to the environment information passed to the Mobile UIs so that the Custom UI can also utilize this value and adhere to the same format. Update the native app to display all dates in the specified language specific date format. | MOB-3763 |
| Mobile Apps | | | | |
| Location/Functional Area | Type | Summary | Details | |
| Apps - OPAir | E | Added support for Activities data call | Added support for Activities data call in OPAIR. | |
